About the Authors

Brian Knight, SQL Server MVP, MCSE, MCDBA, is the co-founder of SQLServerCentral.com and JumpstartTV.com. Brian is a Principal Consultant and owner of Pragmatic Works. He runs the local SQL Server users' group in Jacksonville (JSSUG) and was on the Board of Directors of the Professional Association for SQL Server (PASS). Brian is a contributing columnist for SQL Server Standard and also maintains a regular column for the database website SQLServerCentral.com and does regular webcasts at Jumpstart TV. He has authored nine SQL Server books during the past 10 years. Brian has spoken at conferences like PASS, SQL Connections, and TechEd, and many Code Camps. You can find his blog at <http://www.pragmaticworks.com>. Brian spends weekends practicing to be a professional cage fighter and practicing for next season's *American Idol*.

Erik Veerman is a Mentor for Solid Quality Mentors focusing on training, mentoring, and architecting solutions on the SQL Server BI platform. His industry recognition includes Microsoft's Worldwide BI Solution of the Year and *SQL Server Magazine's* Innovator Cup winner. Erik has designed dozens of BI solutions across a broad business spectrum — telecommunications, marketing, retail, commercial real estate, finance, supply chain, and information technology. His experience with high-volume multi-terabyte environments and SQL Server 64-bit has enabled clients to scale their Microsoft-based BI solutions for optimal potential. As an expert in OLAP design, ETL processing, and dimensional modeling, Erik is a presenter, author, and instructor. He led the ETL architecture and design for the first production implementation of Integration Services (SSIS) and helped drive the ETL standards and best practices for SSIS on Microsoft's SQL Server 2005 reference initiative, Project REAL. Erik is also co-author of *Professional SQL Server 2005 Integration Services* and *Expert SQL Server 2005 Integration Services*, and lead author for the MS Press Training Kit *SQL Server 2005 Business Intelligence Implementation and Maintenance*. As a resident of Atlanta, GA, Erik participates in the local Atlanta SQL Server User's Group, a PASS chapter.

Grant Dickinson is a Program Manager at Microsoft, focusing on designing technologies that enable customers and partners to create innovative and scalable Business Intelligence solutions. Grant has helped qualify, architect, and implement BI solutions across a broad range of industries, including a solution that was once one of the largest Microsoft-based data warehouses in the world. He has designed and provided expertise into product features across the Microsoft BI stack, including technologies in SSIS, SQL Server, and Office. Grant helped develop the Microsoft best-practices ETL reference implementation, Project REAL, and has spoken at conferences around the world. Grant is currently focused on data quality and stewardship in the Master Data Management space. Grant was born in Zimbabwe and spent much of his youth in Southern Africa. He gained a BSc Computer Science at the University of the Witwatersrand in Johannesburg, and today he lives in Seattle with his wife and family.

Douglas Hinson splits his time between database and software development for financial applications in the logistics and insurance industries. Douglas specializes in conceptualizing, reengineering, and developing back-end solutions that connect business operational and financial functions. As a result, he has an extensive background in SQL Server and financial applications, and fits in some technical writing on the side. He has coauthored several Wrox books, including *SQL Server 2005 Performance Tuning*, *SQL Server 2005 CLR Programming*, and the previous edition of this book, *SQL Server 2005 Integration Services*.

About the Authors

Darren Herbold, MCDBA, MCSE is a dedicated consultant who is passionate about delivering business value to his clients. A principal consultant at Pragmatic Works Consulting (www.PragmaticWorks.com) and a graduate from Florida State University, he has expertise in Business Intelligence, Database Administration, and .NET Software Development. His main focus is on the SQL Server stack, where he delivers training, mentoring, and develops Data Warehouse, ETL, and Reporting solutions for his clients. He has developed a robust .NET application development framework and a code-generation tool that saves clients an average of 30 to 40 percent off of development time. Darren has also created BI and software solutions for clients such as Microsoft, Post Properties, and the University of South Florida. Visit his blog at: <http://pragmaticworks.com/community/blogs/>.

Acknowledgments

As always, I must thank my wife and best friend for supporting me for the past 10 years of marriage. I've been fortunate to have found a woman who doesn't fall asleep immediately when copyediting my technical writing. Thanks to my three children: Colton, Liam, and Camille for allowing their daddy to be distracted sometimes with this book when they wanted to play. Thanks also to all the wonderful co-authors, who truly made this book possible. Once again, I must thank the Pepsi Cola Company for inventing Mountain Dew, which drove the late night writing. Lastly, thanks to my sensei and song writer Sensei Yoshi, who has helped me win my first cage fighting match and is preparing me for next year's *American Idol*.

—*Brian Knight*

First of all, I'd like to thank my kids, Meg, Nate, Kate, and Caleb, for being patient with me through the sometimes tiresome process of writing. And of course, my wife, Amy, is amazing! Also thanks to Brian Knight and the other authors who helped make this book so valuable. And thanks to Andy Leonard for his help. There's no one better at knowing how SSIS integrates with Visual Studio Team System. Thanks go to the producers of coffee beans, because without caffeine, I honestly don't know if my contribution to this book would have been worth anything!

—*Erik Veerman*

To my beautiful Heidi, thank you for your support, encouragement, and understanding, and for being the best wife and friend I could ask for. Jessica and Anna, my two wonderful little girls, I thank God every day that we have the gift of you in our lives. I cherish the times when you two sat on my lap while I (ungainly) authored this book, waiting for me to finish so we could go and play outside. You are so little but you give so much. Bruce, you are a brother and uncle-extraordinaire. Dad, Mom, Mae, Pai (and the whole fandamily); though we are spread around the world, your legacy keeps our faith, values, and family strong. Hatch, Dives, Cyril, Neil, Len, Dave, Donald, Erik, and Henk, thanks for your friendship, mentorship, and passion during these years in Microsoft. Finally, my gratitude to Brian; it's been fun presenting and writing with you — good job on another great book!

—*Grant Dickinson*

Thanks to God for the blessing of being able to do what I love for a living. To my beautiful wife, Misty, thank you for being so supportive and understanding during this project, as always. Kyle and Mariah, thanks for being so patient with your Dad while he was putting this project together. A big thanks to the Wrox and Microsoft Tech editors and our Jacksonville area SQL Server guru, Brian Knight, who has come through again with a great cast of authors and a reworked, well-crafted guide to SQL Server Integrated Services 2008.

—*Douglas Hinson*

Acknowledgments

I'd first like to thank my beautiful wife, Ashley, and my wonderful children, Sydney and Kiley, for all their patience and support during this process. I want to also thank Brian Knight for giving me the awesome opportunity to be involved in this project. He's been a fantastic mentor, friend, and overall great guy. Mt. Dew played a pivotal role in this too, for obvious reasons. I also would like to thank all the great folks at KBX Boxing Gym in Alpharetta for teaching me to dig deep when I would much rather vomit and pass out. Go Krav Maga! Lastly, I want to thank the fine staff at Wiley Publishing for their support and guidance in this endeavor.

—Darren Herbold

Union All	192
Data Flow Example	193
Summary	197
 Chapter 6: Using Expressions and Variables	 199
 The Paradigm	 199
Expression Overview	200
Variable Overview	201
Understanding Data Types	202
SSIS Data Types	202
Additional Date and Time Type Support	204
Wrong Data Types and Sizes Can Affect Performance	204

Unicode and Non-Unicode Conversion Issues	205
Casting in SSIS Expressions	206
Using Variables	208
Defining Variables	208
Variable Data Types	209
Working with Expressions	211
C#-Like? Close, but Not Completely	211
The Expression Builder	213
Syntax Basics	214
Using Expressions in SSIS Packages	227
Summary	236
 Chapter 7: Joining Data	 237
 The Lookup Component	 238
The Merge Join Component	239
Contrasting to the Relational Join	239
New Lookup Features	242
Building the Basic Package	242
Creating the Basic Package	244
Using a Relational Join in the Source	245
Using the Merge Join Component	247
Using the Lookup Component	252
Full-Cache Mode	252
No-Cache Mode	255
Partial-Cache Mode	257
Multiple Outputs	259
Expressionable Properties	264
Cascaded Lookup Operations	264
Cache Connection Manager and Transform	266
Summary	268
 Chapter 8: Creating an End-to-End Package	 271
 Basic Transformation Tutorial	 271
Creating Connections	272
Creating the Tasks	274
Creating the Data Flow	275
Completing the Package	276
Saving the Package	277
Executing the Package	277

Contents

Typical Mainframe ETL with Data Scrubbing	278
Creating the Data Flow	280
Handling Dirty Data	280
Finalizing	284
Handling More Bad Data	285
Looping and the Dynamic Task	288
Looping	288
Making the Package Dynamic	289
Summary	291
 Chapter 9: Scripting in SSIS	 293
Scripting?	293
Getting Started in SSIS Scripting	295
Selecting the Scripting Language	296
Using the VSTA Scripting IDE	297
Example: Hello World	298
Adding Code and Classes	300
Using Managed Assemblies	302
Using the Script Task	306
Configuring the Script Task Editor	306
The Script Task Dts Object	307
Accessing Variables in the Script Task	308
Connecting to Data Sources in a Script Task	315
Raising an Event in a Script Task	322
Writing a Log Entry in a Script Task	329
Using the Script Component	330
Differences from a Script Task	330
Configuring the Script Component Editor	331
Accessing Variables in a Script Component	334
Connecting to Data Sources in a Script Component	335
Raising Events	335
Logging	336
Example: Data Validation	337
Essential Coding, Debugging, and Troubleshooting Techniques	347
Structured Exception Handling	347
Script Debugging and Troubleshooting	350
Summary	353

Chapter 10: Loading a Data Warehouse	355
Data Profiling	356
Initial Execution of the Data Profiling Task	356
Reviewing the Results of the Data Profiling Task	359
Turning Data Profile Results into Actionable ETL Steps	365
Data Extraction	366
Dimension Table Loading	366
Loading a Simple Dimension Table	367
Loading a Complex Dimension Table	375
Considerations and Alternates to the SCD Transformation	387
Fact Table Loading	388
SSAS Processing	400
Master ETL Package	408
Summary	411
Chapter 11: Using the Relational Engine	413
Data Extraction	414
SELECT * Is Bad	414
WHERE Is your Friend	416
Transform during Extract	417
Many ANDs Make Light Work	420
SORT in the Database	421
Modularize	423
SQL Server Does Text Files Too	425
Use Set-Based Logic	428
SQL Server 2008 Change Data Capture	430
Benefits of SQL Server 2008 CDC	431
Preparation	432
Capture Instance Tables	434
The CDC API	436
Using CDC from within SSIS	438
Data Loading	442
Database Snapshots	442
The MERGE Operator	444
Summary	448

Chapter 12: Accessing Heterogeneous Data	449
Excel and Access	450
Limited 64-Bit Support	450
Working with Excel Files	452
Access	452
Oracle	460
Oracle Client Setup	460
Importing Oracle Data	460
XML and Web Services	463
Configuring the Web Service Task	463
Working with XML Data as a Source	476
Flat Files	481
Loading Flat Files	481
Extracting Data from Flat Files	483
ODBC	486
Other Heterogeneous Sources	489
Summary	490
Chapter 13: Reliability and Scalability	491
Restarting Packages	491
Simple Control Flow	492
Containers within Containers and Checkpoints	496
Variations on a Theme	499
Inside the Checkpoint File	501
Package Transactions	502
Single Package, Single Transaction	503
Single Package, Multiple Transactions	506
Two Packages, One Transaction	508
Single Package Using a Native Transaction in SQL Server	509
Error Outputs	511
Scaling Out	514
Architectural Improvements	514
Scale Out Memory Pressures	515
Scale Out by Staging Data	515
Summary	520
Chapter 14: Understanding and Tuning the Data Flow Engine	521
The SSIS Engine	521
Understanding the SSIS Data Flow and Control Flow	522
Handling Workflows with the Control Flow	525

Data Processing in the Data Flow	526
Memory Buffer Architecture	527
Types of Transformations	529
Advanced Data Flow Execution Concepts	538
SSIS Data Flow Design and Tuning	548
Data Flow Design Practices	548
Optimizing Package Processing	555
Troubleshooting Data Flow Performance Bottlenecks	560
Pipeline Performance Monitoring	562
Summary	565
 Chapter 15: Source Control and Software Development Life Cycle	 567
Introduction to Software Development Life Cycles	568
Software Development Life Cycles: A Brief History	568
Types of Software Development Life Cycles	569
Versioning and Source Code Control	570
Microsoft Visual SourceSafe	570
Team Foundation Server, Team System, and SSIS	585
MSF Agile and SSIS	590
The Project Portal	594
Putting It to Work	594
Code Deployment and Promotion from Development to Test to Production	605
The Deployment Wizard	605
Import a Package	606
Summary	608
 Chapter 16: DTS 2000 Migration	 609
Managing DTS 2000 Packages within SQL Server Management Studio	609
Running DTS 2000 Packages under SSIS	610
Migrating DTS 2000 Packages to SSIS	611
Using the Package Migration Wizard	614
Third-Party Migration Solution	620
Summary	621
 Chapter 17: Error and Event Handling	 623
Precedence Constraint	623
Precedence Constraint Basics	624
Advanced Precedence Constraints and Expressions	625

Contents

Event Handling	633
Events	634
Inventory Example	635
Event Handler Inheritance	643
Breakpoints	645
Error Rows	648
Logging	653
Logging Providers	654
Log Events	654
Summary	659
 Chapter 18: Programming and Extending SSIS	 661
 The Sample Components	 662
Component 1: Source Adapter	662
Component 2: Transformation	663
Component 3: Destination Adapter	663
The Pipeline Component Methods	664
Design-Time Functionality	664
Runtime	668
Connection Time	670
Building the Components	670
Preparation	671
Building the Source Component	678
Building the Transform Component	690
Building the Destination Adapter	702
Using the Components	709
Installing the Components	710
Debugging Components	710
Design-Time	710
Building the Complete Package	712
Runtime Debugging	713
Upgrading to SQL 2008	716
Summary	716
 Chapter 19: Adding a User Interface to Your Component	 717
 Three Key Steps	 717
Building the User Interface	718
Adding the Project	719
Implementing IDtsComponentUI	722
Setting the UITypeName	725
Building the Form	727

Further Development	732
Runtime Connections	732
Component Properties	735
Handling Errors and Warnings	737
Column Properties	739
Other Considerations	740
Summary	740
 Chapter 20: External Management and WMI Task Implementation	 741
External Management of SSIS with Managed Code	741
Setting up a Test SSIS Package for Demonstration Purposes	742
The DTS Runtime Managed Code Library	743
Application Object Maintenance Operations	744
Package Maintenance Operations	745
Package Folder Maintenance	750
Package Role Maintenance	752
Package Monitoring	753
Package Listing	755
A Package Management Example	756
Package Log Providers	765
Specifying Events to Log	767
Programming to Log Providers	768
Package Configurations	771
Creating a Configuration	772
Programming the Configuration Object	773
Configuration Object	774
Windows Management Instrumentation Tasks	775
WMI Reader Task Explained	776
WMI Data Reader Example	777
WMI Event Watcher Task	782
WMI Event Watcher Task Example	783
Summary	786
 Chapter 21: Using SSIS with External Applications	 787
InfoPath Documents	788
ASP.NET Applications	797
Winform .NET Applications	802
Summary	808
