Acknowledgments

A revision of an existing book is much different from a project started from scratch, in large part because the final result builds on the work of the previous author. So, first and foremost, much appreciation to Jim Boyce for all of his efforts in creating the body of work that *Windows 8 Bible* is built upon. With such a short project timeline, having a solid foundation was critical.

The authors also want to recognize Carol Long and Carole McClendon for bringing us this opportunity. This project would not have stayed on track without Adaobi Obi Tulton pushing and pulling us. Finally, we offer our appreciation and thanks to the rest of the editorial team for their help in pulling together this project: Todd Meister, Nancy Rapoport, Sydney Argenta, Maureen Spears, Rayna Erlick, Claire Johnson, and Daniel Scribner.

It was a great experience.
