Table of Contents

- Cover
- Title Page
- Modern Construction Management
- Copyright
- About the authors
- Preface to the eighth edition
- Companion website
- Chapter 1: Introduction
  - Structure of the book
  - Objectives and contents
- Chapter 2: Quality management
  - Summary
  - Introduction
  - Notions of quality
  - Quality in transition
  - Quality control and inspection
  - Quality assurance
  - Total quality management
  - A systems approach to managing quality
  - Further Reading
- Section 1: *Project production management*
  - Chapter 3: Production process improvement
    - Summary
    - Introduction to lean construction
    - Energy

Productivity
Economic development
International environmental protocols
UK emissions
Productivity improvement
Management systems
Management processes (see BS 6079)
Employee participation
Macro key performance indicators
Further Reading
Chapter 4: Planning techniques and methods
Summary
Introduction
Planning in construction
Who plans?
Planning the design process
Planning for waste management
Planning for safety, health, and the environment (SHE)
Planning techniques
Other planning techniques
Modern construction planning
Monitoring progress and managing the time model
Construction planning and scheduling with 4D CAD and BIM
Planning multiple projects
Appendix 4.A. Normal Probability Distribution Tables (Table 4.3)

Further Reading
Chapter 5: Workforce motivation
Summary
Introduction
Motivation theories
Payment systems, remuneration and performance
Further Reading
Chapter 6: Project cost control
Summary
Why cost-control is essential for construction projects
A cost-control procedure for construction works
Points to consider when choosing a cost-control system
Management of the carbon footprint
Further Reading
Chapter 7: Management of equipment
Summary
Acquisition of plant and equipment
The financing of equipment
Systematic plant selection
The essential characteristics of a decision situation
Setting hire rates
Marginal costing
Plant maintenance
Monitoring of maintenance servicing and exhaust emissions

Human-centred approaches
Further Reading
Section 2: *Business management*
Chapter 8: Project procurement
Summary
Introduction
The construction process (BS 6079-1:2002)
ISO/BS procurement standards
Appointing the team/parties to the contract
Public contracts and supplies
Project manager/leader
The contract
Health and safety considerations
Categories of contract
Separated and cooperative contracts
Management-oriented contracts
Integrated contracts
Discretionary contracts
Performance of different contract categories
Client risk exposure for different contract categories
Further Reading
Chapter 9: Estimating and tendering
Summary
Introduction
Parties involved in estimating and tendering
The estimating process
BOQ estimating

Collection and calculation of cost information
Project study
Preparing the estimate
Submitting the tender
Estimating in management contracting
Design and build
Cost planning
Cost management
Whole-life costing
Private finance initiative (PFI)
Computer aided estimating
BIM and estimating
Summary
Future Reading
Chapter 10: Competitive bidding
Summary
Introduction
Part 1: A brief review of bidding strategy
Part 2: The importance of accuracy in estimating
Part 3: Some ways of using the existing theories
Recent developments in bidding
Client evaluation of bids
Further Reading
Chapter 11: Company budgetary control
Summary
Introduction
Preparation of budgets

The carbon footprint
Further Reading
Chapter 12: Cash flow and interim valuations
Summary
Introduction
The need for cash flow forecasting by contractors
The requirements of a forecasting system
Capital lock-up
The factors that affect capital lock-up
Interim valuations and cash flow
Measurement of work in activities
Computers and cash flow
Cash flow forecast by standardised models
Closing remarks
Further Reading
Chapter 13: Economic assessments
Summary
Introduction
Interest
Economic comparisons
Profitability measures
Inflation
Accuracy of future estimates
Financial modelling
Cost-benefit analysis
Some worked examples
Appendix 13.A Tabulations of Interest and Time Relationships

Further Reading
Section 3: *Administration and company management*
Chapter 14: Company organisation
Summary
Introduction
The function of a manager
Company organisational structures
Departments/functions
Health, safety, occupational welfare and pensions
Educational qualifications and vocational training
Corporate social responsibility
Management attitude
Construction companies in an internet age
Virtual companies
Collaborative working
Further Reading
Chapter 15: Market planning and business development
Summary
Introduction
Market planning
The business-development process
Chapter 16: International construction logistics and risks
Summary
Introduction
The international environment

- Further Reading
- Chapter 17: Towards BIM and digital construction
  - Summary
  - Introduction
  - Information and information management
  - The construction company's business
  - Processes involved in a construction business
  - Information needs to support business processes
  - Management of contractors' information resources
  - Construction information systems
  - The construction information manager
  - The emergence of BIM
  - BIM standards
  - Digital construction
  - Further Reading
- Chapter 18: Financial management
  - Summary
  - Introduction
  - Types of businesses
  - Types of capital
  - The control of capital
  - The company accounts
  - Regulatory authorities
  - Further Reading
- Section 4: *Self-learning exercises*
  - Chapter 19: Questions – construction management[1]
    - Questions

Note
Chapter 20: Questions – operational research (OR)
Summary
Questions
Chapter 21: Questions – six sigma*
Six sigma
Problems (readers should start with Problem 1)
Problem 1 One-tail left test
Problem 2 Two-tail t-test
Problem 3 Paired samples one-tail right t-test
Problem 4 Two-sample two-tail Z test
Problem 5 Two sample one-tail t-test
Problem 6 F test
Problem 7 Binomial distribution
Problem 8 Two-sample two-tail proportion test
Problem 9 Poisson distribution – probability of success
Problem 10 Chi squared goodness-of-fit test
Problem 11 Correlation analysis
Problem 12 Linear univariate regression analysis
Problem 13 Time series
Problem 14 One-way ANOVA
Problem 15 Two-way ANOVA (two factors)
Problem 16 Two-way ANOVA (interaction of the variables)
Problem 17 Bayes' theorem or law

List of Tables

Chapter 2
Table 2.1 Role of QA in the TQM process.

Table 2.2 The key elements for a quality system in a building contracting fir...

Table 2.3 Key elements to achieve a total quality company within construction...

Chapter 3

Table 3.1 International and UK environmental agreements.

Table 3.2 National reports on construction industry productivity.

Table 3.3 Stakeholder levels.

Table 3.4 Method study questioning technique.

Chapter 4

Table 4.1 The calculations for a line-of-balance schedule.

Table 4.2 Expected duration (weeks) and variances for activities.

Table 4.3 Cumulative probabilities of the normal probability distribution (ar...

Chapter 5

Table 5.1 Summary of incentive schemes.

Table 5.2 Directly proportional incentive scheme calculation (time allowed = ...

Table 5.3 Geared incentive schemes calculation.

Table 5.4 Geared incentive schemes.

Table 5.5 Audit tool for monitoring organisation-wide motivation levels.

Chapter 6

Table 6.1 Budgeted costs.

Table 6.2 Updated costs at Week 52.

Chapter 7

Table 7.1 Evaluation of crane selection – Crane no. 1.

Table 7.2 Evaluation of crane selection – Crane no. 2.

Table 7.3 Evaluation of crane selection – Crane no. 3.

Table 7.4 Cost comparison of alternative crane purchases.

Table 7.5 Declining-balance depreciation example.

Table 7.6 Sinking-fund depreciation example.

Table 7.7 Sum-of-digits depreciation example.

Table 7.8 Calculating a crane hire rate using DCF method.

Table 7.9 The effect of inflation on the rate calculation.

Table 7.10 Marginal costing.

Chapter 8

Table 8.1 Current approximate proportions of total contracts.

Table 8.2 Performance expectations of procurement methods.

Table 8.3 Procurement selection method.

Chapter 9

Table 9.1 Example of an operational build-up for the plant element for placin...

Table 9.2 Example of a unit rate build-up.

Table 9.3 Supplementary cost calculations in unit rate build-up.

Chapter 10

Table 10.1 Correlation of ‘average of mean standardised bid’ and ‘success rat...

Table 10.2 Winning bids preceded by 2, 3, 4, or 5 decrements in a contractor'...

Table 10.3 Form for conducting preliminary examination of bids.

Chapter 11

Table 11.1 Master budget.

Table 11.2 Administration budget.

Table 11.3 Budgeted sum for overheads and profit.

Table 11.4 Budgeted receipts.

Table 11.5 Table of variances.

Chapter 12

Table 12.1 Effects of different factors on cash flow.

Chapter 13

Table 13.1 Thirty-six combinations of construction time and construction cost...

Table 13.2 Summary of cost-benefit analysis for proposed road scheme.

Table 13.3 DCF example including corporation tax.

Table 13.4 The effect of different trial interest rates.

Table 13.5 DCF example including development grant.

Table 13.6 The effect of different interest rates on PW factors and on the ca...

Table 13.7 Predicted resale values.

Table 13.8 Calculating the optimal replacement age.

Table 13.A.1 Interest tables for 10%.

Table 13.A.2 Interest tables for 15%.

Chapter 17

Table 17.1 Sources of information in construction.

Table 17.2 Contractor's information matrix.

Table 17.3 Potential Benefits of a new system.

Table 17.4 Summary of current UK BIM standards.

Table 17.5 BIM maturity levels.

Chapter 18

Table 18.1 Financing alternatives.

Table 18.2 Company trading position at 31 December.

Table 18.3 Details of trading position.

Table 18.4 Profit and loss statement.

Table 18.5 Tabulated balance sheet at 31 December.

Chapter 19

Table Q5.1 Craneage activity sampling.

Table Q7.1 Activity standard and crashed costs.

Table Q9.1 Activities and resources information.

Table Q10.1 Subcontractor's labour requirements.

Table Q11.1 Resource requirements.

Table Q12.1 Resource requirements.

Table Q13.1 Operations, labour-hours and number of operatives.

Table Q14.1 Labour-hours and team size.

Table Q15.1 Operations, labour-hours, and number of operatives.

Table Q16.1 Activity times based on internal resources of company.

Table Q18.1 Bar diameter and weight.

Table Q18.2 Usage rates for steel-fixers.

Table Q18.3 Binding wire allowance.

Table Q20.1 Plant provided for the placing of concrete.

Table Q21.1 Labour allowances for planking and strutting.

Table Q23.1 Week No. 1: Summary of hours worked.

Table Q25.1 Contract programme.

Table Q25.2 Budget values (£000).

Table Q25.3 Progress at end of Week 37.

Table Q25.4 Actual costs to end of Week 37.

Table Q25.5 Actual costs up to end of Week 37 (£000).

Table Q26.1 Budgeted sum for overheads and profit.

Table Q27.1 Value of activities.

Table Q28.1 Data for cash flow forecasting exercise.

Table Q29.1 Project budget and profit distribution.

Table Q30.1 Budgeted value and profit distribution.

Table Q31.1 Monthly estimated costs for a contract.

Table Q34.1 Cost of alternative schemes.

Table Q36.1 Capital expenditure and net revenue.

Table Q37.1 Projected revenues.

Table Q39.1 Predicted resale values.

Table Q42.1 Cash flows experienced.

Table Q49.1 Specifications of four truck-mounted cranes.

Table Q54.1 Capital structures.

Table Q54.2 Performance levels.

Table Q56.1 Account balances of a construction company.

Table Q58.1 Tabulated balance sheet as at 31 December the previous year.

Table Q59.1 Quantities of excavation work

Chapter 20

Table Q1.1 Proportion of sales.

Table Q8.1 Supply and delivery of fill material.

Table Q9.1 Individual assessments.

Chapter 21

Table 21.1 Summary of parametric statistical tools covered.
