Palliative Care Nursing at a Glance

Edited by

Christine Ingleton

Professor of Palliative Care Nursing
School of Nursing and Midwifery
The University of Sheffield
Sheffield, UK

Philip J. Larkin

Professor of Clinical Nursing [Palliative Care]
Head of Discipline, Children's Nursing
Director of Clinical Academic Partnership
University College Dublin School of Nursing,
Midwifery and Health Systems
and Our Lady's Hospice and Care Services
University College Dublin
Dublin, Ireland

Series Editor: Ian Peate

CONTENTS

[Contributors](#)

[Preface](#)

[Abbreviations](#)

[About the companion website](#)

[Part 1: Introduction](#)

[1: Setting the scene](#)

[Introduction](#)

[What is palliative care?](#)

[Who receives palliative care?](#)

[Where is palliative care delivered?](#)

[Who provides palliative care?](#)

[References](#)

[2: Managing the needs of family caregivers](#)

[Introduction](#)

[What is a family caregiver?](#)

[Key assessment issues for family caregiving](#)

[The consequences of caregiving](#)

[Critical points for reflection](#)

[Reference](#)

[3: Principles of effective communication](#)

[Effective communication](#)

[Difficult conversations](#)

[Looking ahead](#)

[References](#)

[4: Advance care planning](#)

What is advance care planning?

Key principles of ACP

Putting ACP into practice

Aims in clinical consultation

Summary

References

5: Delivering palliative approaches in different care contexts

At home

Nursing and residential care homes

Acute hospitals

Hospices

Day care, out-patient and drop-in clinics

References

6: Integrated care pathways

What is an integrated care pathway?

ICPs used in palliative care

Variances

Summary

References

Part 2: Clinical applications

7: Principles of symptom management

Introduction

Always offer a holistic assessment and evaluation

Treating symptoms and goals of care

The importance of anticipation

Focus on the individual

Reassess and evaluate

Provide clear explanation and information

Reference

8: Best practice in pain management

Best practice in pain management

Acute and chronic pain

Management of pain

The pain history

References

9: Managing pain

Managing pain

Pain assessment

Opioid analgesic therapy

References

10: Complex pain problems and treatment challenges

Bone pain

Radiotherapy and chemotherapy

Nerve blocks

Opioid side effects and toxicity

Nursing role

References

11: Managing nausea and vomiting

Introduction

Prevalence

Common causes

Assessment

Management

Medications

Evaluation

References

12: Managing constipation

Introduction

Assessment

Constipation and opioids

Management: fact and fiction

Treatment

Evaluation

Management at the end of life

References

13: Understanding depression

Assessment

Screening for depression

Pharmacological and non-pharmacological
methods of treatment

References

14: Understanding delirium and confusion

Definition and descriptors

Assessment

Management

References

15: Managing myoclonus, tremors and muscle spasms

Introduction

Causes

Assessment

Management

Medications

Nursing care

References

16: Managing lymphoedema

Introduction

What is lymphoedema?

Assessment

Management

References

17: Managing hypercalcaemia of malignancy

Introduction

Definition

Calcium regulation in the body

Pathophysiology

Symptoms and signs

Management

Other measures

References

18: Assessing and managing oral hygiene

Introduction

Assessment

Best practice principles for oral care

Clinical treatment

Evaluation

Management at the end of life

References

19: Caring for people with dysphagia

Introduction

Assessment

Addressing treatment and goals of care

[The role of 'tube' feeding](#)

[Management at the end of life](#)

[Reference](#)

[20: Managing breathlessness](#)

[Introduction](#)

[Causes](#)

[Assessment](#)

[Management](#)

[Pharmacological interventions in breathlessness](#)

[Non-pharmacological interventions in
breathlessness](#)

[References](#)

[21: Cough and haemoptysis](#)

[Introduction](#)

[Prevalence](#)

[Causes](#)

[Assessment](#)

[Management and nursing care](#)

[Major haemoptysis](#)

[Summary](#)

[References](#)

[22: Explaining and exploring cachexia, anorexia and fatigue](#)

[Definitions](#)

[Causes](#)

[Management](#)

[Exercise as a palliative intervention](#)

[References](#)

23: Continual subcutaneous infusion: using a syringe pump

What is continuous subcutaneous infusion?

What is the best type of CSCI equipment to use and why?

Indications for use

Key considerations in set-up of a CSCI

Advantages of the CSCI

Disadvantages of the CSCI

Drug conversion and drug compatibility.

Specific consideration in relation to diluent

Reference

24: Emergencies: superior vena cava obstruction

Palliative care emergencies

Causes

References

25: Emergencies: haemorrhage

Haemorrhage

Causes

Signs and symptoms

Reflect

Plan: minor bleeding

Plan: haemorrhage

References

26: Emergencies: malignant spinal cord compression

Causes

Signs and Symptoms

Reflect

Plan
