The Starting Point

The starting point took place when the professor and researcher A. k. John alias Al- Dayrani, began verifying and publishing the books of his great teacher, the savant Mohammad Amin Sheikho, and in fulfilling his wish in introducing the cupping operation to the human community in an authentic and scientific manner in order to enable people to get use of this marvelous medical gem.

After practically checking thousands of wondrous recovery cases during long elapsing years which culminated in the discovery of the cupping operation in its correct scientific rules.

In fact, Prof. Al-Dayrani oriented a big number of some great Syrian physicians in unique and distinct explanations about the cupping operation and its strict rules got from his teacher, the savant Mohammad Amin Sheikho.

That action on the part of prof. Al-Dayrani crystallized their opinions about the matter which encouraged them to work hand in hand with him to introduce that sublime therapeutic art to the human community which suffered for long from the grip of diseases and agonies in a scientific medical style speaking the language of the age, and taking into consideration that these precise rules were not known to anyone in the Arab world or in the western world before the great scholar M. Amin Sheikho spoke about it.

Scientific Medical Achievements of Cupping

The official broadcasting station of London (BBC), in one of its main news bulletins on 12/08/2001, declared the following:

“The Syrians were used to betake themselves to the British capital seeking for channels of treating their diseases of which they were desperate, or they came to make medical checkups or to perform some complicated medical operations. Such a way of acting on the part of the Syrians seemed very normal, but the unexpected act was the change in their destination from Great Britain towards the Syrian capital. A scientific medical team representing the British Royal Family began communications and dialogues with a group of Syrian physicians in Damascus in search for the cupping operation for the treatment of the hereditary disease, hemophilia. The disease confirmed its recovery in a number of sick people in Syria by means of cupping operations”.

A spokesman on behalf of the prof. A. k. Dayrani, a verifier and a publisher of the books of the Damascene erudite who vitalized the cupping operation and restored its correct methods.

The spoke man added that a delegation communicated with him to acquaint themselves with the medical studies done on hundreds of Syrian and Arab patients through the precise and accurate procedures which led to astonishing results for most diseases, especially hemophilia.
