Contents at a Glance

Introduction	1
Book 1: Networking Basics	5
CHAPTER 1: Welcome to Networking	7
CHAPTER 2: Network Infrastructure	25
CHAPTER 3: Switches, Routers, and VLANs	37
CHAPTER 4: Servers and Virtualization	53
CHAPTER 5: Cloud Computing	65
Book 2: Understanding Network Protocols	75
CHAPTER 1: Network Protocols and Standards	77
CHAPTER 2: TCP/IP and the Internet	99
CHAPTER 3: IP Addresses	107
CHAPTER 4: Routing	125
CHAPTER 5: DHCP	135
CHAPTER 6: DNS	151
CHAPTER 7: TCP/IP Tools and Commands	179
Book 3: Planning a Network	205
CHAPTER 1: Local Area Networks	207
CHAPTER 2: Wide Area Networks	223
CHAPTER 3: Server Architecture	235
CHAPTER 4: Virtualization Architecture	245
CHAPTER 5: Storage Architecture	257
Book 4: Implementing a Network	269
CHAPTER 1: Network Hardware	271
CHAPTER 2: Wireless Networks	283
CHAPTER 3: Windows Clients	303
CHAPTER 4: Mac Networking	313
CHAPTER 5: Network Printers	323
CHAPTER 6: Virtual Private Networks	329
Book 5: Implementing Virtualization	335
CHAPTER 1: Hyper-V	337
CHAPTER 2: VMware	355

CHAPTER 3: Azure.....	365
CHAPTER 4: Amazon Web Services.....	379
CHAPTER 5: Desktop Virtualization.....	397

Book 6: Implementing Windows Server 2016..... 405

CHAPTER 1: Installing Windows Server 2016.....	407
CHAPTER 2: Configuring Windows Server 2016.....	421
CHAPTER 3: Configuring Active Directory.....	437
CHAPTER 4: Configuring User Accounts.....	447
CHAPTER 5: Configuring a File Server.....	469
CHAPTER 6: Using Group Policy.....	483
CHAPTER 7: Configuring Internet Information Services.....	495
CHAPTER 8: Configuring Exchange Server 2016.....	505
CHAPTER 9: Configuring SQL Server 2014.....	523
CHAPTER 10: Windows Commands.....	537
CHAPTER 11: Using PowerShell.....	565

Book 7: Implementing Linux..... 583

CHAPTER 1: Installing a Linux Server.....	585
CHAPTER 2: Configuring Linux.....	597
CHAPTER 3: Basic Linux Network Configuration.....	609
CHAPTER 4: Running DHCP and DNS.....	621
CHAPTER 5: Doing the Samba Dance.....	631
CHAPTER 6: Running Apache.....	639
CHAPTER 7: Running Sendmail.....	651
CHAPTER 8: Linux Commands.....	661

Book 8: Managing a Network..... 691

CHAPTER 1: Welcome to Network Administration.....	693
CHAPTER 2: Managing Remotely.....	707
CHAPTER 3: Managing Network Assets.....	725
CHAPTER 4: Managing the Help Desk.....	737
CHAPTER 5: Solving Network Problems.....	749
CHAPTER 6: Managing Software Deployment.....	765
CHAPTER 7: Managing Email Retention.....	777
CHAPTER 8: Managing Mobile Devices.....	793

Book 9: Managing Cybersecurity	807
CHAPTER 1: Welcome to Cybersecurity	809
CHAPTER 2: Managing Firewalls and Virus Protection.....	821
CHAPTER 3: Managing Spam	833
CHAPTER 4: Managing Backups.....	845
CHAPTER 5: Managing Disaster Recovery and Business Continuity Planning.....	859
 Appendix A: Directory of Useful Websites	 867
Appendix B: Glossary	875
Index	899

Table of Contents

INTRODUCTION	1
About This Book	2
Foolish Assumptions	3
Icons Used in This Book	3
Beyond the Book	4
Where to Go from Here	4
 BOOK 1: NETWORKING BASICS	 5
CHAPTER 1: Welcome to Networking	7
Defining a Network	8
Why Bother with a Network?	10
Sharing files	10
Sharing resources	10
Sharing programs	11
Servers and Clients	12
Dedicated Servers and Peers	13
What Makes a Network Tick?	14
Networks Big and Small	17
It's Not a Personal Computer Anymore!	17
Understanding Network Topology	19
Bus topology	19
Star topology	20
Expanding stars	21
Ring topology	22
Mesh topology	22
The Network Administrator	23
 CHAPTER 2: Network Infrastructure	 25
Introducing Infrastructure	25
Introducing Network Protocols and Standards	26
Understanding Cable Infrastructure	27
Twisted-pair cable	28
RJ45 connectors	28
Patch panels and patch cables	28
Repeaters and hubs	29
Switches	30
Understanding Ports, Interfaces, and MAC Addresses	30
Understanding Packets	32
Understanding Collisions	34
Understanding Broadcast Packets	35
Understanding Wireless Networks	36

CHAPTER 3:	Switches, Routers, and VLANs	37
	Understanding Switches	38
	Learning	40
	Forwarding	42
	Flooding	43
	Looking Deeper into Switches	44
	Collision domains	44
	Bridging	45
	SFP ports and uplinks	46
	Broadcast domains	46
	Managed and unmanaged switches	47
	Understanding Routers	48
	Network address translation	49
	Virtual private network	50
	Understanding VLANs	51
CHAPTER 4:	Servers and Virtualization	53
	Understanding Network Operating Systems	53
	Network services	54
	File-sharing services	54
	Multitasking	55
	Directory services	55
	Security services	56
	What's Important in a Server	57
	Scalability	57
	Reliability	58
	Availability	58
	Service and support	58
	Components of a Server Computer	58
	Motherboard	59
	Processor	59
	Memory	60
	Hard drives	60
	Network interfaces	60
	Video	60
	Power supply	60
	Considering Server Form Factors	61
	Tower case	61
	Rack mount	61
	Blade servers	62
	Considering Virtualization	63
CHAPTER 5:	Cloud Computing	65
	Introducing Cloud Computing	65
	Looking at the Benefits of Cloud Computing	66

Detailing the Drawbacks of Cloud Computing	68
Examining Three Basic Kinds of Cloud Services	69
Applications	69
Platforms	70
Infrastructure	70
Public Clouds versus Private Clouds	71
Introducing Some of the Major Cloud Providers	72
Amazon	72
Google	72
Microsoft	73
Getting Into the Cloud	73
 BOOK 2: UNDERSTANDING NETWORK PROTOCOLS	 75
CHAPTER 1: Network Protocols and Standards	77
Understanding Protocols	77
Understanding Standards	79
Seeing the Seven Layers of the OSI Reference Model	80
The physical layer	81
The data link layer	82
The network layer	84
The transport layer	86
The session layer	88
The presentation layer	88
The application layer	89
Following a Packet through the Layers	89
The Ethernet Protocol	90
Standard Ethernet	92
Fast Ethernet	92
Gigabit Ethernet	93
Beyond gigabit	93
The TCP/IP Protocol Suite	94
IP	95
TCP	96
UDP	96
Other Protocols Worth Knowing About	98
 CHAPTER 2: TCP/IP and the Internet	 99
What Is the Internet?	99
A Little Internet History	101
TCP/IP Standards and RFCs	102
The TCP/IP Protocol Framework	104
Network interface layer	104
Network layer	105
Transport layer	105
Application layer	106

CHAPTER 3: IP Addresses	107
Understanding Binary	107
Counting by ones	107
Doing the logic thing	110
Working with the binary Windows Calculator	111
Introducing IP Addresses	112
Networks and hosts	112
The dotted-decimal dance	113
Classifying IP Addresses	114
Class A addresses	116
Class B addresses	117
Class C addresses	118
Subnetting	118
Subnets	119
Subnet masks	119
Network prefix notation	121
Default subnets	121
The great subnet roundup	121
IP block parties	122
Private and public addresses	123
Network Address Translation	124
CHAPTER 4: Routing	125
Considering the Usefulness of Routers	126
Connecting to the Internet	126
Connecting remote locations	128
Splitting up large networks	129
Understanding Routing Tables	130
CHAPTER 5: DHCP	135
Understanding DHCP	135
Configuration information provided by DHCP	136
DHCP servers	136
How DHCP actually works	137
Understanding Scopes	138
Feeling excluded?	139
Reservations suggested	140
How long to lease?	141
Working with a DHCP Server	141
Installing a Windows Server 2016 DHCP server	142
Configuring a new scope	143
How to Configure a Windows DHCP Client	147
Automatic private IP addressing	148
Renewing and releasing leases	148

CHAPTER 6: DNS	151
Understanding DNS Names	151
Domains and domain names	152
Fully qualified domain names	154
Top-Level Domains	154
Generic domains	155
Geographic domains	155
The Hosts File	157
Understanding DNS Servers and Zones	160
Zones	161
Primary and secondary servers	162
Root servers	164
Caching	167
Understanding DNS Queries	167
A real-life DNS example	168
Zone Files and Resource Records	169
SOA records	170
NS records	172
A records	172
CNAME records	173
PTR records	173
MX records	173
Reverse Lookup Zones	174
Working with the Windows DNS Server	175
How to Configure a Windows DNS Client	177
 CHAPTER 7: TCP/IP Tools and Commands	 179
Using the arp Command	179
Using the hostname Command	180
Using the ipconfig Command	181
Displaying basic IP configuration	181
Displaying detailed configuration information	181
Renewing an IP lease	182
Releasing an IP lease	183
Flushing the local DNS cache	183
Using the nbtstat Command	184
Using the netstat Command	185
Displaying connections	185
Displaying interface statistics	186
Using the nslookup Command	188
Looking up an IP address	188
Using nslookup subcommands	190
Displaying DNS records	190
Locating the mail server for an email address	192
Taking a ride through DNS-Land	193

Using the pathping Command	196
Using the ping Command.	197
Using the route Command.	198
Displaying the routing table.	198
Modifying the routing table	201
Using the tracert Command	202
BOOK 3: PLANNING A NETWORK	205
CHAPTER 1: Local Area Networks	207
Making a Network Plan.	207
Being Purposeful.	208
Taking Stock	209
What you need to know	209
Programs that gather information for you	211
Considering Cable	212
Surmising Switches	213
Planning the Network Topology	216
Planning the TCP/IP Implementation	217
Drawing Diagrams.	219
More Questions Your Network Plan Should Address	220
CHAPTER 2: Wide Area Networks	223
Connecting to the Internet.	223
Connecting with cable or DSL	224
Connecting with T1 lines.	225
Connecting with fiber	226
Connecting with a cellular network	227
Choosing a Router.	227
Choosing a small office router.	228
Choosing an enterprise router	229
Choosing a cellular router	230
Securing Your Connection with a Firewall	230
Providing Redundancy for Your Internet Connection	232
Securing Connections to Remote Locations and Users	233
CHAPTER 3: Server Architecture	235
Deciding How Many Servers You Need	235
Deciding Which Servers You Need	236
Domain controllers	236
DHCP servers	237
Mail servers	237
File servers	238
Print servers	239
Web servers	239
Database servers	240

Application servers	240
Backup servers.	240
License servers.	241
Deployment servers	241
Update servers.	241
Virtualization management platform.	242
Connecting Your Servers	242
CHAPTER 4: Virtualization Architecture	245
Understanding Virtualization.	246
Understanding Hypervisors.	247
Understanding Virtual Disks	249
Understanding Network Virtualization.	252
Considering the Benefits of Virtualization.	252
Choosing Virtualization Hosts	254
Understanding Windows Server 2016 Licensing	255
CHAPTER 5: Storage Architecture	257
Considering Disk Space	257
Considering Disk Drive Types	259
Hard disk drives.	259
Solid state drives	259
Considering Drive Interfaces	260
SATA.	260
SAS.	261
Considering RAID.	262
RAID 10	262
RAID 5	263
RAID 6	264
Considering Attachment Types	265
Direct attached storage	265
Storage area networks	266
Network attached storage	267
BOOK 4: IMPLEMENTING A NETWORK.	269
CHAPTER 1: Network Hardware.	271
Working with Cable	271
Cable categories	271
What's with the pairs?.	272
To shield or not to shield	273
When to use plenum cable	273
Sometimes solid, sometimes stranded	274
Installation guidelines.	274
Getting the tools that you need.	276
Pinouts for twisted-pair cables	277

	Attaching RJ-45 connectors	278
	Wall jacks and patch panels	279
	Installing Switches	280
	Daisy-Chaining Switches	281
CHAPTER 2:	Wireless Networks	283
	Installing a Wireless Access Point	283
	Configuring a Wireless Access Point	284
	Basic configuration options	284
	DHCP configuration	285
	Connecting to a Wireless Network	286
	Paying Attention to Wireless Network Security	288
	Understanding wireless security threats	288
	Securing your wireless network	292
	Troubleshooting a wireless network	298
CHAPTER 3:	Windows Clients	303
	Configuring Network Connections	303
	Joining a Domain	309
CHAPTER 4:	Mac Networking	313
	Basic Mac Network Settings	314
	Joining a Domain	317
	Connecting to a Share	319
CHAPTER 5:	Network Printers	323
	Configuring Network Printers	323
	Adding a network printer	324
	Accessing a network printer using a web interface	326
CHAPTER 6:	Virtual Private Networks	329
	Understanding VPN	329
	Looking at VPN Security	331
	Understanding VPN Servers and Clients	332
	BOOK 5: IMPLEMENTING VIRTUALIZATION	335
CHAPTER 1:	Hyper-V	337
	Understanding the Hyper-V Hypervisor	337
	Understanding Hyper-V Virtual Disks	338
	Enabling Hyper-V	339
	Getting Familiar with Hyper-V	340
	Creating a Virtual Switch	341
	Creating a Virtual Disk	344
	Creating a Virtual Machine	347
	Installing an Operating System	351

CHAPTER 2: VMware	355
Looking at vSphere	355
Getting Started with VMware Player	356
Creating a Virtual Machine	358
Installing VMware Tools	362
CHAPTER 3: Azure	365
Looking at Azure Services	366
Creating an Azure Account	367
Examining the Azure Portal	368
Creating a Windows Virtual Machine	369
Managing an Azure Virtual Machine	375
Connecting to an Azure Virtual Machine	377
CHAPTER 4: Amazon Web Services	379
Looking at What Amazon Web Services Can Do	380
Creating an Amazon Web Services Account	381
Examining the Amazon Web Services Console	382
Creating a Windows Virtual Machine	384
Managing an Amazon Web Services Virtual Machine	391
Connecting to an Amazon Web Services Virtual Machine	393
CHAPTER 5: Desktop Virtualization	397
Introducing Desktop Virtualization	397
Considering Two Approaches to Desktop Virtualization	399
Looking at VMware's Horizon View	400
Looking at Citrix XenApp	401
BOOK 6: IMPLEMENTING WINDOWS SERVER 2016	405
CHAPTER 1: Installing Windows Server 2016	407
Planning a Windows Server Installation	407
Checking system requirements	407
Reading the release notes	408
Deciding whether to upgrade or install	408
Considering your licensing options	409
Thinking about multiboot	409
Planning your partitions	410
Deciding your TCP/IP configuration	410
Choosing workgroups or domains	411
Before You Install	412
Backing up	412
Checking the event logs	412
Disconnecting UPS devices	412
Running Setup	412
Adding Server Roles and Features	417

CHAPTER 2:	Configuring Windows Server 2016	421
	Using the Administrator Account	421
	Using Remote Desktop Connection	422
	Enabling remote access	422
	Connecting remotely	424
	Using Microsoft Management Console	425
	Working with MMC	425
	Taking an overview of the MMC consoles	427
	Customizing MMC	428
	Adding snap-ins	428
	Adding taskpads	430
CHAPTER 3:	Configuring Active Directory	437
	What Directories Do	437
	Remembering the Good Ol' Days of NT Domains	438
	PDCs and BDCs	438
	Trusts	439
	NetBIOS names	439
	Active Directory to the Rescue	440
	Understanding How Active Directory Is Structured	440
	Objects	440
	Domains	441
	Organizational units	442
	Trees	443
	Forests	443
	Creating a New Domain	444
	Creating an Organizational Unit	445
CHAPTER 4:	Configuring User Accounts	447
	Understanding Windows User Accounts	447
	Local accounts versus domain accounts	448
	User account properties	448
	Creating a New User	449
	Setting User Properties	452
	Changing the user's contact information	452
	Setting account options	453
	Specifying logon hours	454
	Restricting access to certain computers	455
	Setting the user's profile information	455
	Resetting User Passwords	456
	Disabling and Enabling User Accounts	457
	Deleting a User	458
	Working with Groups	458
	Group types	459
	Group scope	459

	Default groups	460
	Creating a group	462
	Adding a member to a group	463
	Working with User Profiles	464
	Types of user profiles	465
	Roaming profiles	465
	Creating a Logon Script	467
CHAPTER 5:	Configuring a File Server	469
	Understanding Permissions	469
	Understanding Shares	471
	Managing Your File Server	472
	Using the New Share Wizard	472
	Sharing a folder without the wizard	477
	Granting permissions	479
CHAPTER 6:	Using Group Policy	483
	Understanding Group Policy	483
	Enabling Group Policy Management on Windows Server 2016	484
	Creating Group Policy Objects	485
	Filtering Group Policy Objects	491
CHAPTER 7:	Configuring Internet Information Services	495
	Installing IIS	495
	Understanding the Default Website	498
	Creating Websites	500
CHAPTER 8:	Configuring Exchange Server 2016	505
	Creating a Mailbox	505
	Managing Mailboxes	508
	Enabling mailbox features	508
	Creating a forwarder	509
	Setting mailbox storage limits	511
	Configuring Outlook for Exchange	515
	Viewing Another Mailbox	518
CHAPTER 9:	Configuring SQL Server 2014	523
	What Is a Database?	523
	What Is a Relational Database?	524
	What Is SQL?	525
	SQL dialects	525
	SQL statements	526
	Using the select statement	527

Using SQL Server 2014 Management Studio	528
Creating a New Database	529
Creating Tables	531
Editing Tables	534
Working with Queries	534
Working with Scripts	535
CHAPTER 10: Windows Commands	537
Using a Command Window	538
Opening and closing a command window	538
Editing commands	539
Using the Control menu	539
Special Command Tricks	540
Wildcards	540
Chaining commands	540
Redirection and piping	541
Environment variables	542
Batch files	544
The EventCreate Command	545
Net Commands	546
The Net Accounts command	546
The Net Computer command	547
The Net Config command	548
The Net Continue command	549
The Net File command	549
The Net Group command	550
The Net Help command	551
The Net Helpmsg command	552
The Net Localgroup command	552
The Net Pause command	554
The Net Session command	554
The Net Share command	555
The Net Start command	556
The Net Statistics command	557
The Net Stop command	558
The Net Time command	558
The Net Use command	559
The Net User command	560
The Net View command	562
The RunAs Command	562
CHAPTER 11: Using PowerShell	565
Using PowerShell	565
Understanding PowerShell Commands	567
Using Cmdlets	568

Using Parameters	569
Getting Help	571
Using Aliases	573
Using the Pipeline	575
Using Providers	578
Using Scripts	580
BOOK 7: IMPLEMENTING LINUX	583
CHAPTER 1: Installing a Linux Server	585
Planning a Linux Server Installation	585
Checking system requirements	585
Choosing a distribution	586
Going virtual	588
Deciding on your TCP/IP configuration	588
Installing Fedora 26	589
CHAPTER 2: Configuring Linux	597
Linux: It Isn't Windows	597
X Window	598
Virtual consoles	598
Understanding the file system	599
On Again, Off Again	600
Logging on	600
Logging off	601
Shutting down	601
Using GNOME	602
Getting to a Command Shell	603
Enabling the SUDO Command	604
Managing User Accounts	607
CHAPTER 3: Basic Linux Network Configuration	609
Using the Network Configuration Program	609
Restarting Your Network	613
Working with Network Configuration Files	614
The Network file	614
The ifcfg files	615
The Hosts file	616
The resolv.conf file	617
The nsswitch.conf file	617
The xinetd.conf file	619
Displaying Your Network Configuration with the ifconfig Command	620

CHAPTER 4:	Running DHCP and DNS	621
	Running a DHCP Server	621
	Installing DHCP	622
	Configuring DHCP	622
	Starting DHCP	624
	Running a DNS Server	624
	Installing BIND	625
	Looking at BIND configuration files	625
	Restarting BIND	630
CHAPTER 5:	Doing the Samba Dance	631
	Understanding Samba	631
	Installing Samba	632
	Starting and Stopping Samba	633
	Editing the smb.conf File	634
	Configuring global settings	635
	Creating a share	636
	Using the Samba Client	637
CHAPTER 6:	Running Apache	639
	Installing Apache	639
	Starting and Stopping Apache	640
	Confirming That Apache Is Running	640
	Using the HTTP Configuration Tool	642
	Allowing or Restricting Access to an Apache Server	644
	Configuring Virtual Hosts	645
	Configuring the default host	645
	Creating a virtual host	648
	Manually Editing Apache's Configuration Files	649
	Creating Web Pages	650
CHAPTER 7:	Running Sendmail	651
	Understanding Email	651
	Installing Sendmail	652
	Modifying sendmail.mc	653
	Enabling connections	654
	Enabling masquerading	655
	Setting up aliases	655
	Using SpamAssassin	655
	Installing SpamAssassin	656
	Customizing SpamAssassin	657
	Blacklisting and whitelisting email addresses	657
	Using the Mail Console Client	658
	Using Evolution	659

CHAPTER 8: Linux Commands	661
Command Shell Basics	661
Getting to a shell	662
Editing commands	663
Wildcards	664
Redirection and piping	664
Environment variables	665
Shell scripts	666
Running a command with root-level privileges	667
Directory- and File-Handling Commands	667
The pwd command	667
The cd command	667
The mkdir command	668
The rmdir command	668
The ls command	669
The cp command	670
The rm command	671
The mv command	672
The touch command	672
The cat command	673
Commands for Working with Packages and Services	674
The service command	674
The yum and dnf commands	676
Commands for Administering Users	677
The useradd command	677
The usermod command	678
The userdel command	679
The chage command	679
The passwd command	680
The newusers command	680
The groupadd command	681
The groupdel command	681
The gpasswd command	681
Commands for Managing Ownership and Permissions	683
The chown command	683
The chgrp command	683
The chmod command	684
Networking Commands	685
The hostname command	685
The ifconfig command	685
The netstat command	687
The ping command	688
The route command	689
The traceroute command	690

BOOK 8: MANAGING A NETWORK	691
CHAPTER 1: Welcome to Network Administration	693
Knowing What Network Administrators Do	693
Choosing the Part-Time Administrator	695
Establishing Routine Chores	696
Managing Network Users	697
Patching Up Your Operating System and Software	698
Discovering Software Tools for Network Administrators	698
Building a Library	700
Getting Certified	701
CompTIA	702
Microsoft	703
Cisco	703
Gurus Need Gurus, Too	704
Helpful Bluffs and Excuses	705
CHAPTER 2: Managing Remotely	707
Enabling Remote Desktop Connection	708
Connecting Remotely	709
Using Keyboard Shortcuts for Remote Desktop	711
Configuring Remote Desktop Options	712
Setting the Display options	713
Setting the Local Resources options	714
Setting the Programs options	715
Setting the Experience options	716
Setting the Advanced options	717
Using Remote Assistance	718
Enabling Remote Assistance	718
Inviting Someone to Help You via a Remote Assistance Session . . .	720
Responding to a Remote Assistance Invitation	722
CHAPTER 3: Managing Network Assets	725
Introducing IT Asset Management	726
Why Bother?	727
Getting Organized	727
What to Track	729
Taking Pictures	730
Picking a Number	730
Making Labels	731
Tracking Software	733
Using Asset-Tracking Software	733
Other Sources of Asset-Tracking Information	735

CHAPTER 4:	Managing the Help Desk	737
	Establishing the Help Desk's Charter	738
	Tracking Support Tickets	739
	Deciding How to Communicate with Users	740
	Providing Remote Support	742
	Creating a Knowledge Base	742
	Creating a Self-Service Help Portal	743
	Using Satisfaction Surveys	743
	Tracking Help-Desk Performance	745
	Using Help-Desk Management Software	746
CHAPTER 5:	Solving Network Problems	749
	When Bad Things Happen to Good Computers	750
	Fixing Dead Computers	751
	Ways to Check a Network Connection	752
	A Bunch of Error Messages Just Flew By!	753
	Double-Checking Your Network Settings	754
	Time to Experiment	754
	Who's on First?	755
	Restarting a Client Computer	756
	Booting in Safe Mode	757
	Using System Restore	758
	Restarting Network Services	760
	Restarting a Network Server	761
	Looking at Event Logs	762
	Documenting Your Trials and Tribulations	763
CHAPTER 6:	Managing Software Deployment	765
	Understanding Software Licenses	766
	Using a License Server	769
	Options for Deploying Network Software	770
	Deploying software manually	770
	Running Setup from a network share	771
	Installing silently	772
	Creating an administrative installation image	773
	Pushing out software with group policy	774
	Keeping Software Up to Date	775
CHAPTER 7:	Managing Email Retention	777
	Why Email Ends Up Everywhere	778
	Creating a Retention Policy	779
	Email classification	779
	Retention duration	780
	Mailbox size limits	781

Auto-archive policies	781
Impact of backup procedures	782
Configuring Exchange Retention Policies	782
Creating message retention tags	782
Creating message retention policies	784
Applying a retention policy to a mailbox	788
Planning for a Litigation Hold	790
Using the Exchange Journaling Feature	791
Using Exchange Online Archiving	792
CHAPTER 8: Managing Mobile Devices	793
The Many Types of Mobile Devices	794
Considering Security for Mobile Devices	795
Managing iOS Devices	796
Understanding the iPhone	796
Understanding the iPad	797
Integrating iOS devices with Exchange	798
Managing Android Devices	803
Looking at the Android OS	804
Perusing Android's core applications	805
Integrating Android with Exchange	805
BOOK 9: MANAGING CYBERSECURITY	807
CHAPTER 1: Welcome to Cybersecurity	809
But We're a Small Business . . . Do We Need Security?	810
The Two Pillars of Cybersecurity	811
Considering Two Basic Approaches to Security	812
Physical Security: Locking Your Doors	812
Securing User Accounts	814
Obfuscating your usernames	814
Using passwords wisely	815
A password-generator For Dummies	816
Securing the administrator account	817
Securing the Human Firewall	818
CHAPTER 2: Managing Firewalls and Virus Protection	821
Firewalls	821
The Many Types of Firewalls	823
Packet filtering	823
Stateful packet inspection (SPI)	825
Circuit-level gateway	826
Application gateway	826

	The Built-In Windows Firewall	827
	Virus Protection	828
	What is a virus?	828
	Antivirus programs	830
	Safe computing	831
	Using Windows Action Center	831
CHAPTER 3:	Managing Spam	833
	Defining Spam	834
	Sampling the Many Flavors of Spam	835
	Using Antispam Software	836
	Understanding Spam Filters	837
	Looking at Three Types of Antispam Software	840
	On-premises antispam	840
	Antispam appliances	841
	Cloud-based antispam services	842
	Minimizing Spam	843
CHAPTER 4:	Managing Backups	845
	Backing Up Your Data	845
	Where to Back Up Your Data	846
	Backing Up to Tape	847
	Backup Software	847
	Types of Backups	848
	Normal backups	849
	Copy backups	850
	Daily backups	851
	Incremental backups	851
	Differential backups	852
	Local versus Network Backups	853
	How Many Sets of Backups Should You Keep?	854
	A Word about Tape Reliability	855
	About Cleaning the Heads	856
	Backup and Virtualization	857
	Backup Security	857
CHAPTER 5:	Managing Disaster Recovery and Business Continuity Planning	859
	Assessing Different Types of Disasters	860
	Environmental disasters	861
	Deliberate disasters	861
	Disruption of services	862

Equipment failure	862
Other disasters	863
Analyzing the Impact of a Disaster	863
Developing a Business Continuity Plan	864
Holding a Fire Drill.....	865
APPENDIX A: DIRECTORY OF USEFUL WEBSITES	867
APPENDIX B: GLOSSARY	875
INDEX.....	899
