Medical Ethics For Dummies[®]

Table of Contents

[Introduction](#)

[About This Book](#)

[Conventions Used in This Book](#)

[What You're Not to Read](#)

[Foolish Assumptions](#)

[How This Book Is Organized](#)

[Part I: Medical Ethics, or Doing the Right Thing](#)

[Part II: A Patient's Right to Request, Receive, and Refuse Care](#)

[Part III: Ethics at the Beginning and End of Life](#)

[Part IV: Advancing Medical Knowledge with Ethical Clinical Research](#)

[Part V: The Part of Tens](#)

[Icons Used in This Book](#)

[Where to Go from Here](#)

Part I: Medical Ethics, or Doing the Right Thing

Chapter 1: What Are Medical Ethics?

Defining Medical Ethics

What are ethics?

The four principles of medical ethics

Differences between ethics and legality

Reconciling medical ethics and patient care

Turning to ethical guideposts and guidelines

Looking at the Common Medical Ethics Issues

Privacy and confidentiality concerns

Reproduction and beginning-of-life issues

End-of-life issues

Access to care

Moving Medicine Forward: The Ethics of Research

Chapter 2: Morality in Medicine

Distinguishing among Ethics, Morality, and Law

Looking at the Hippocratic Oath and Its Modern Descendants

Noting why the Oath was updated

Taking a new oath at graduation

Understanding humanitarian goals: The Declaration of Geneva

Rules for Engagement: Today's Codes of Medical Ethics

American Medical Association Code of Ethics

American Nursing Association Code of Ethics

Bedside Manners: Ethics inside the Hospital

Understanding the hospital ethics panel

Patient bill of rights

[Emergency room ethics](#)

[Bioethics as a Field of Study](#)

[Chapter 3: The Provider-Patient Relationship](#)

[Protecting Patient Privacy](#)

[Understanding confidentiality](#)

[Balancing privacy with public good](#)

[Confidentiality in research](#)

[Clear and Ethical Communications](#)

[Communicating with the patient](#)

[Informed consent](#)

[Understanding Full Disclosure: Telling the Patient What Matters](#)

[Decoding conflicts of interest](#)

[Deciding who has access to medical information](#)

[Choosing not to disclose information to a patient](#)

[Understanding Appropriate Referrals](#)

[Considering second opinions](#)

[Discovering the need for specialist referrals](#)

[Choosing Whom to Serve](#)

[Refusing to treat a patient](#)

[Ending a doctor-patient relationship](#)

[Giving medical advice to non-patients](#)

[Patient Rights and Obligations](#)

[Patient autonomy: Patient as decision-maker](#)

[Encouraging honesty](#)

[Balancing treatment and cost](#)

[Chapter 4: Outside the Examining Room: Running an Ethical Practice](#)

Propriety in the Paperwork: Medical Records

Complying with the Health Insurance Portability and Accountability Act (HIPAA)

Training staff to handle records

Preventing identity theft

Releasing medical records

Safeguarding anonymity

Modern Managed Care and Today's Office Practice

Ethical concerns of managed care

Working with midlevel providers

Prescribing good care while still getting paid

Third-Party Issues

Dealing with insurance companies and HMOs

Perks and freebies

Targeted advertising and ethics

Chapter 5: Learning from Mistakes: Disclosing Medical Errors

Types of Medical Errors and Ways to Prevent Them

Understanding diagnostic errors

Understanding treatment errors

Medication errors

Communication errors

Administrative errors

Lab errors

Equipment failures

Admitting Your Mistakes

Understanding truth telling

Disclosing an error to a patient

[Balancing ethics with legal protection](#)

[Telling a higher-up that you've made an error](#)

[When Colleagues Don't Disclose: Your Ethical Obligations](#)

[Healthcare Provider Impairment](#)

[Knowing the warning signs of impairment](#)

[Addressing a colleague's impairment](#)

[Testifying before a medical board](#)

[How Reporting Errors Helps Medicine as a Whole](#)

[Creating a no-blame system for reporting errors](#)

[Understanding how to reduce errors](#)

[Part II: A Patient's Right to Request, Receive, and Refuse Care](#)

[Chapter 6: The Ethical Challenges in Distributing Basic Healthcare](#)

[Ethics of Healthcare Distribution](#)

[Exploring Healthcare Rationing](#)

[How services are rationed](#)

[The ethics of rationing](#)

[Looking at Healthcare in the United States](#)

[The current system and its ethical challenges](#)

[The reformed system and potential ethical speed bumps](#)

[Examining universal healthcare](#)

[Chapter 7: When Spirituality and Cultural Beliefs Affect Care](#)

[Accommodating Religious Beliefs](#)

[Religions that limit or ban medical care](#)

[Discussing religion and understanding objections](#)

[Offering alternatives to care](#)

Respecting Cultural Diversity

Attitudes and beliefs that affect care

Communicating with non-English-speaking patients

Discussing cultural beliefs

When the Patient Refuses Treatment

Determining competency

Making sure the patient understands

Validating concerns and assuaging fears

Accepting refusals

Chapter 8: Parental Guidance and Responsibilities

Acknowledging Parental Rights to Choose or Refuse Care

Responsibilities of a parent

Weighing parental choice against a child's best interest

Caring for a child when parents disagree with you

Knowing when and how to treat impaired infants

Vaccination: The Evidence and the Ethics

Understanding vaccination as a public health issue

Considering risk-benefit analysis

Understanding full disclosure

Addressing parent opposition to vaccines

Child Endangerment: The Healthcare Provider's Role

Discovering signs of abuse and neglect

Reporting abuse and working with Child Protective Services

Confidentiality, Care, and the Adolescent Patient

Understanding adolescent patients' rights

Balancing privacy and patients' rights

[Talking to teens about informed consent](#)

[Mature minors and emancipated minors](#)

[Part III: Ethics at the Beginning and End of Life](#)

[Chapter 9: Two Lives, One Patient: Pregnancy Rights and Issues](#)

[Medical Intervention: Rights of the Mother versus Rights of the Fetus](#)

[Setting forth rights with the Fourteenth Amendment](#)

[Understanding self-determination](#)

[Balancing treatments for a woman and fetus](#)

[The role of technology](#)

[Considering a Father's Rights](#)

[Birth Control](#)

[Educating your patient about birth control](#)

[Balancing your beliefs about birth control with a patient's rights](#)

[Understanding religious ethics and birth control](#)

[Fetal Abuse](#)

[Maternal drug abuse or neglect: Crimes against the fetus](#)

[Detecting fetal abuse: Ethical and legal obligations](#)

[Limiting maternal freedom for fetal well-being](#)

[Seeing into the Future: Prenatal and Genetic Testing](#)

[Understanding the ethical use of prenatal testing](#)

[Understanding tests and accuracy issues](#)

[Genetic counseling and sharing results with parents](#)

[Chapter 10: When Science Supersedes Sex: Reproductive Technology and Surrogacy](#)

[In Vitro Fertilization](#)

[Understanding acceptable versus unacceptable harm](#)

[Pre-implantation genetic diagnosis: Choosing which embryos to implant](#)

[Multiple pregnancy reduction: When IVF works too well](#)

[Decoding embryo storage and destruction](#)

[Artificial Insemination](#)

[Understanding safe, anonymous, and consensual sperm donation](#)

[Sex selection: Is it ever ethical?](#)

[Surrogacy: Carrying Someone Else's Child](#)

[Paying for pregnancy: The ethics of commercial surrogacy](#)

[Considering the emotional and physical health of the surrogate](#)

[Looking at the contract and surrogate responsibilities](#)

[Understanding rights of the child](#)

[The doctor's responsibilities](#)

[Sterilization: Preventing Reproduction](#)

[Voluntary sterilization as birth control](#)

[The ethics of involuntary birth control](#)

[Understanding eugenics: Social engineering](#)

[Chapter 11: Walking a Fine Line: Examining the Ethics of Abortion](#)

[When Does Personhood Begin?](#)

[What, and who, is a person?](#)

[Applying ethical principles to personhood](#)

[Looking at Each Side's Point of View](#)

[Understanding the pro-life stance](#)

[Understanding the pro-choice stance](#)

[Therapeutic Abortion: To Protect Maternal Health and Life](#)

[Reasons for therapeutic abortion](#)

[Informing the patient](#)

[Counseling for the family](#)

[When a patient refuses medical advice](#)

[Abortion Due to Fetal Defect](#)

[Reasons for abortion because of fetal defect](#)

[Weighing the ethics of selective abortion](#)

[Voluntary Abortion](#)

[Legal definition and limitations](#)

[A less invasive option: RU-486](#)

[Roe v. Wade: Legal Status of Abortion and Ethical Implications](#)

[Looking at changes on the state level](#)

[Accurate medical counseling](#)

[The Religious Divide](#)

[Toward Common Ground](#)

[Chapter 12: Determining Death: Not an Event, but a Process](#)

[Defining Death](#)

[Using heart and lung function to define death](#)

[Adding brain function to the definition of death](#)

[Examining Brain Death](#)

[A quick look at how the brain works](#)

[Looking at the types of brain death](#)

[Current standards of brain death](#)

[Declaring a patient brain dead](#)

[Understanding Cases That Defined Brain Death](#)

[Karen Ann Quinlan](#)

[Nancy Cruzan](#)

[Withdrawing Life-Sustaining Treatment](#)

[Weighing the benefits of further treatment](#)

[Counseling the family](#)

[Examining Euthanasia and Physician-Assisted Suicide](#)

[Relieving suffering with mercy-killing](#)

[Understanding the history of physician-assisted suicide](#)

[When a doctor aids in death](#)

[Chapter 13: Death with Dignity: The Right to Appropriate End-of-Life Care](#)

[Roadmaps for the End of Life](#)

[Understanding advance directives](#)

[Looking at living wills](#)

[Looking at Durable Power of Attorney for Health Care](#)

[Do Not Resuscitate and Do Not Intubate orders](#)

[Physician's Order for Life-Sustaining Treatment \(POLST\)](#)

[Of Sound Mind: Establishing Mental Capacity](#)

[Understanding informed consent and a patient's ability to give it](#)

[Assessing decision-making capacity](#)

[Substitute decision-makers: When a patient is declared incompetent](#)

[Relief of Pain and Suffering](#)

[Understanding palliative care](#)

[Walking a fine line: The double-effect rule](#)

[Easing pain with terminal sedation](#)

[Organ Donation and Allocation for Transplants](#)

[Legality of organ donation](#)

[Sustaining life for organ harvesting](#)

[Looking at living donation](#)

[The financial inequities of transplant eligibility](#)

[Compensation for donation: The ethical challenges](#)

[Xenotransplantation, or animal to human transplant](#)

[Part IV: Advancing Medical Knowledge with Ethical Clinical Research](#)

[Chapter 14: Toward Trials without Error: The Evolution of Ethics in Clinical Research](#)

[An Introduction to Medical Research](#)

[Moving from lab experiments to research on humans](#)

[Understanding the importance of informed consent in clinical trials](#)

[Turning Points in Medical Research in America](#)

[The Tuskegee Syphilis Study: The ethics of withholding treatment](#)

[The establishment of the Office for Human Research Protections and IRBs](#)

[Guiding Principles of Ethical Studies](#)

[The Nuremberg Code: New research standards in the wake of World War II](#)

[The Declaration of Helsinki: A global roadmap for ethical clinical research](#)

[Good Clinical Practice Guidelines: Replacing the Declaration of Helsinki](#)

[The Belmont Report: Best ethical practices in U.S. research](#)

[Chapter 15: Beyond Guinea Pigs: Anatomy of an Ethical Clinical Trial](#)

[Elements of a Valid Trial: Leveling the Playing Field Ethically](#)

[Collective clinical equipoise: Asking whether a trial is needed](#)

[Understanding basic trial design](#)

[Choosing ethical controls](#)

[Preventing bias with blind studies and randomization](#)

[Minimizing any risk of harm](#)

[The Institutional Review Board: Ethical Gatekeepers of Clinical Research](#)

[Looking at the role of the IRB](#)

[Evaluating and green-lighting a clinical trial](#)

Recruiting Study Participants

Deciding to ask patients to participate

Laying out all the risks and benefits with informed consent

Full disclosure: Explaining financial and institutional conflicts of interest

Ending a Trial Early

Remembering obligations to patients

Looking at implications for research

Publicizing preliminary results

Chapter 16: Research in Special Populations

Animal Research

Understanding why animals are used

Ethical treatment of research animals

Psychiatric Research and Consent

Assessing decision-making ability in psychiatric patients

Protecting the patient: Risk versus benefit

Pregnancy and Pediatrics

Understanding research with pregnant women

Why risk may outweigh the benefits

Research on children: Surrogate consent

Chapter 17: It's All in the Genes: The Ethics of Stem Cell and Genetic Research

Understanding Stem Cell Research

Who will benefit? The case for stem cell research

The ethical debate over embryonic stem cell lines

Focusing on adult stem cells

Genetic Testing: Looking for Problems in DNA

Knowing what we can and can't change

[Weighing the risks and benefits](#)

[Offering emotional counseling for patients](#)

[Genome Sequencing: Mapping DNA](#)

[Gene patents: Deciding who owns what](#)

[Looking at ethical problems with patents](#)

[Deciding who can use the human genome](#)

[Gene Therapy: Changing the Code](#)

[Weighing the risks and benefits of gene therapy](#)

[Designer genes: Going beyond therapy](#)

[Cloning: Making Copies](#)

[Cloning as a reproductive option](#)

[Growing tissues with therapeutic cloning](#)

[Part V: The Part of Tens](#)

[Chapter 18: Ten Ethical Issues to Address with Your Patients](#)

[Confidentiality in the Patient Visit](#)

[Informed Consent](#)

[Integration of Religious and Cultural Beliefs into Patient Care](#)

[The Ethics of Clinical Research](#)

[Help for the Uninsured](#)

[Screening for Genetic Diseases](#)

[Ethical Dilemmas in Infertility](#)

[Minimize Suffering in Terminal Conditions](#)

[The Living Will Discussion](#)

[Honor the Patient-Provider Relationship](#)

[Chapter 19: Ten High-Profile Medical Ethics Cases](#)

[Terri Schiavo: The Right to Die](#)

[Daniel Hauser: A Child's Right to Refuse Lifesaving Treatment](#)

[Angela Carder: Maternal versus Fetal Rights](#)

[Sister Margaret Mary McBride: Religion in Conflict with Medicine](#)

[Baby Manji: An Unclear Identity](#)

[Louise Brown: The First Test Tube Baby](#)

[Jesse Gelsinger: The Risks of Gene Therapy](#)

[Nadya Suleman: Too Much Fertility](#)

[Glen Mills: Autonomy versus Protecting Society](#)

[Baby Jane Doe: Treatment of Impaired Babies](#)

[Chapter 20: Almost Ten Ethical Issues for the Future](#)

[Cloning](#)

[Designer Babies and Future Elites](#)

[Rationing of Medical Care](#)

[Who Owns Your Genes?](#)

[The Doctor Is Online](#)

[Pandemic Influenza Outbreak](#)

[Future Clinical Trials](#)

[Artificial Wombs](#)

[The Global Spread of AIDS](#)

Table of Contents

Introduction

About This Book

Conventions Used in This Book

What You're Not to Read

Foolish Assumptions

How This Book Is Organized

Part I: Beginning with Clinical Anatomy Basics

Part II: Understanding the Thorax, Abdomen,
and Pelvis

Part III: Looking at the Head, Neck, and Back

Part IV: Moving to the Upper and Lower
Extremities

Part V: The Part of Tens

Icons Used in This Book

Where to Go from Here

Part I: Beginning with Clinical Anatomy Basics

Chapter 1: Entering the World of Clinical Anatomy

Studying the Body in Different Ways

Looking under the microscope or with
your eyes

Speaking clinically: Terms used in clinical
anatomy

Dividing the Body into Systems and Regions

Organizing the body by systems

Organizing the body by regions

Chapter 2: Getting a Grip on Terms Used in Clinical Anatomy

Describing Anatomy by Position, Region, and Plane

Beginning with the anatomical position

Figuring out what goes where in anatomical regions

Knowing what's up, down, back, and front in specific terms

Slicing the body into anatomical planes

Labeling Anatomical Movement

Bending and straightening

Going away and getting closer

Moving in circles

Surveying other ways to move

Chapter 3: Examining the Integumentary, Musculoskeletal, and Nervous Systems

Showing Interest in Integument

Looking at the layers and structures of the skin

Going in farther to the fascia

Boning Up on the Skeleton

Figuring out what makes a bone
Surveying the shapes of bones
Feeling out bumps, ridges, and
indentations

Catching Up to Cartilage

Joining the Joints

Making the Body Move with Muscles

Moving the bones with skeletal muscle
Keeping the heart ticking with cardiac
muscle
Having no control over smooth muscle

Getting on Your Nerves

Determining what's in (and on) a neuron
Coordinating input and signals with the
central nervous system
Touching and moving with the peripheral
nervous system
Feeling and reacting with the somatic
nervous system
Taking control with the autonomic
nervous system

Chapter 4: Moving Along with the Cardiovascular and Respiratory Systems

Tracing Circulatory Pathways in the
Cardiovascular System

Making the rounds: Systemic circulation
Fueling up: Pulmonary circulation

Moving Blood Away from the Heart with Arteries

Looking inside large elastic arteries
Moving to medium muscular arteries
Surveying small arteries and arterioles

Taking Blood Back to the Heart with Capillaries and Veins

Exchanging gases, nutrients, and wastes in capillaries
Peeking into veins and venules

Breathing In and Out: The Respiratory System

Chapter 5: Looking at the Immune and Lymphatic Systems

Beginning with Red Bone Marrow and Leukocytes

Fighting infection with lymphocytes
Binging on bacteria with phagocytes
Controlling histamines with basophils

Surveying the Lymphatic System

Networking with lymphatic capillaries and vessels

Filtering lymph through nodes
Collecting lymph in ducts

Assessing Additional Lymphoid Organs

The thymus

The spleen

The tonsils, the appendix, and the gut

Chapter 6: Delving into the Digestive, Urinary, and Endocrine Systems

Breaking Down and Absorbing Your Food: The Digestive System

Starting in the mouth

Continuing through the esophagus and into the stomach

Finishing in the small intestine with help from the pancreas, gallbladder, and liver

Forming and removing bulk in the large intestine

Removing Wastes: The Urinary System

Handling Hormones: The Endocrine System

The master gland: The pituitary

The pituitary's assistants: The hypothalamus and pineal glands

The body's metabolism booster: The thyroid gland

Fighting infection: The thymus

Stressing out: The suprarenals

Digestive aid: The pancreas
Mars and Venus: The testes and the ovaries

Part II: Understanding the Thorax, Abdomen, and Pelvis

Chapter 7: Checking Out the Thoracic Cage and Coverings

Getting Under Your Skin: Thoracic Bones, Joints, Muscles, and More

Forming the thoracic cage: The bones

Moving just a little: The joints

Helping you breathe: The respiratory muscles

Running through the thorax: The nerves and blood vessels

Covering It All Up: The Surface Anatomy of the Thorax

Using imaginary lines in your assessment

Looking at the anterior chest wall

Examining the posterior chest wall

Chapter 8: Assessing the Thoracic Organs

Understanding the Mediastinum and Pleural Cavities

The mediastinum

The pleural cavities

Looking at the Lungs

Surveying the lungs' surfaces and borders

Getting air in and out with the trachea

Branching into the bronchi

Checking out the lobes

Flowing with nerves, blood vessels, and lymphatics

Having a Heart

Surrounding the heart with the pericardium

Examining the surfaces of the heart

Putting together the four chambers

Feeding the heart: Arteries and veins

Giving the heart its spark

Exploring Thoracic Circulation

Circulating blood in the major vessels

Moving lymph through the lymphatic vessels

Discovering What Else Is in the Thoracic Cavity

Chapter 9: Bellying Up to the Abdominal Wall

Drawing Quadrants and Regions on the Abdominal Wall

Using two lines: The four quadrants

Using four lines: The nine regions

Making Up the Abdominal Wall: Muscles and More

Absolutely fabulous abdominal muscles

Nerves, blood vessels, and lymphatics for maintaining tissues

Lining the abdomen: The peritoneum

Inspecting the Inguinal Region

The inguinal ligament and the iliopubic tract

The inguinal canal

The spermatic cord

The testes

The scrotum

Seeing the Skin and Surface Anatomy of the Abdominal Wall

Chapter 10: Probing the Abdominal Organs

Poking Around the Peritoneum

The mesentery and the peritoneal folds and ligaments

The greater and lesser omenta

Digging into the Main Digestive Organs

Entering the esophagus

Churning in the stomach

Winding through the small intestine

Moving into the large intestine

Observing Organs that Assist with Digestion

Locating the liver

Glancing at the gallbladder

Pinpointing the pancreas

Identifying Renal Anatomy

Knowing the kidneys

Tracing the ureters

Spying the suprarenal glands

Figuring Out What Else Is in the Abdominal Cavity

The spleen

Nerves

Major abdominal blood vessels

Lymphatics

Chapter 11: Seeing the Pelvis and the Perineum

Pinpointing the Pelvic Structures

Forming the pelvic girdle: Bones and joints

Making note of muscles and fascia
Personal space: The peritoneum
Feeling out the nerves of the pelvis
Viewing blood vessels
Looking at lymphatics

Comparing Pelvic Organs

Locating pelvic organs that everyone has
Finding Mars: The male pelvic organs
Finding Venus: The female pelvic organs

Exit Strategy: The Perineum

The male perineum
The female perineum

Part III: Looking at the Head, Neck, and Back

Chapter 12: Head of the Class

Sticking to the Skull Bones

Cradling the brain in the cranial cavity
Facing forward with the facial bones

Encasing the Brain: The Meninges

The dural infoldings
The dural venous sinuses

Locating the Areas and Structures of the Brain

Thinking about the cerebrum
Going inside the diencephalon
Balancing the cerebellum
Surveying the brainstem
Draining the brain with the ventricles
Getting the glands
Counting the cranial nerves
Serving the brain: The blood supply

Putting on a Face

Expressing yourself with facial muscles
Moving with motor nerves
Feeling out sensory nerves
Viewing blood vessels
Getting a handle on lymphatics

Enveloping the Head: Facial Surface Anatomy and the Scalp

Chapter 13: Seeing, Smelling, Tasting, and Hearing

Seeing into the Eyes

Taking cover with eyelids
Having a ball — an eyeball, that is
Rolling your eyes with extraocular muscles
Serving the eyes: The nerves
Providing blood flow to and from the eyes

Knowing the Nose

Sniffing out the exterior of the nose
Scoping out the nasal cavity
Insinuating your way into the paranasal sinuses
Sensing the nerves, blood vessels, and lymphatics

Investigating the Mouth

Open wide: The oral cavity
Chew on this: The teeth and gums
Picking on the palate
Sticking out your tongue
Making spit in the salivary glands
Tapping into the temporomandibular joint
Noting nerves
Viewing blood vessels
Sorting through lymphatics

Entering the Ear

Examining the external ear
Moving into the middle ear
Diving deeper into the inner ear
Keeping an ear out for nerves and vessels

Chapter 14: It's Neck and Neck

Sizing Up the Superficial Structures: Muscles, Nerves, and Blood Vessels

Dividing the triangles: The sternocleidomastoid

Going back to the posterior triangle of the neck

Understanding the anterior triangle of the neck

Neck Deep: Diving into the Deep Structures

Flexing the neck: The prevertebral muscles

Rooting around the root of the neck

Homing In on the Neck Organs

Front and center: Thyroid and parathyroid glands

Speaking of the pharynx, larynx, and trachea

Locating lymphatic vessels and nodes

Surrounding the Neck: Skin and Surface Anatomy

Chapter 15: Back to Back

Stacking Up the Vertebral Column

Analyzing a typical vertebra

Putting the vertebrae into groups

Connecting with the vertebral joints

Studying the Spinal Cord and Meninges

Spying on the spinal cord and nerves

Coverings and cushions: Understanding the meninges and cerebrospinal fluid

Flexing Your Back Muscles

Shouldering the load: The extrinsic muscles

Twisting and turning: The intrinsic muscles

Nodding your head: The suboccipital muscles

Providing Blood Flow and Lymphatic Drainage in the Back

Assessing the Surface Anatomy of the Vertebrae and Back Muscles

Looking for curves in the spine

Seeing bones on the back's surface

Viewing the back muscles

Part IV: Moving to the Upper and Lower Extremities

Chapter 16: Shouldering the Load: The Pectoral Girdle and the Arm

Boning Up on the Shoulder and the Arm

Looking at the bones of the pectoral girdle

It's not funny, but it's humerus

Joining the Parts

Collaring the sternoclavicular joint
Reviewing the acromioclavicular joint
Hanging on to the humerus

Sniffing around the Axilla (Armpit)

Forming the apex, the base, and the walls
Tracking the axillary artery and vein

Moving the Shoulder and the Arm

Taking a look at the anterior muscles
Moving to the posterior muscles
Shaping up the shoulder muscles

Maintaining the Tissues

Acknowledging the nerves and blood supply
Remembering the lymphatic vessels

Covering Your Shoulders and Arms: The Surface Anatomy

Chapter 17: Bending the Elbow and Focusing on the Forearm

Forming the Elbow and the Forearm: The Bones

Handling the humerus
Regarding the radius
Understanding the ulna
