Notes on Contributors

Isolde Brade is a geographer and a senior researcher at the Leibniz Institute for Regional Geography in Leipzig. Her specialist research interests lie in the comparative research of urban development in postsocialist Eastern Europe, with a focus on urban and regional processes in post-Soviet countries.

Sonia Hirt is Associate Professor of Urban Affairs and Planning at the College of Architecture and Urban Studies at Virginia Tech. She serves as Associate Dean of Academic Affairs. Her research targets comparative urbanism. Her book publications include *Iron Curtains*, *The Urban Wisdom of Jane Jacobs*, and *Twenty Years of Transition*.

Anneli Kährik is a researcher in human geography at the Centre for Migration and Urban Studies, University of Tartu, Estonia. Her research interests are centered on residential mobility and segregation, urban and housing issues, and urban governance in postsocialist cities. She teaches human geography theory, urban geography, and planning.

Zoltán Kovács is a scientific advisor at the Institute of Geography, Hungarian Academy of Sciences and Professor in Human Geography at the University of Szeged. His scientific work focuses on urban geography and spatial restructuring, with special attention to Budapest and other postsocialist cities. He has numerous publications on these subjects in professional journals and thematic volumes.

Kadri Leetmaa is a researcher in human geography at the Centre for Migration and Urban Studies, University of Tartu, Estonia. Her main fields of research and teaching are urban social geography (including migration and

residential mobility), residential preferences, suburbanization, urban planning and transition periods in postsocialist cities, inter-ethnic contacts and spatial segregation of ethnic groups in cities.

Andrzej Lisowski is Professor of Geography at the University of Warsaw. He serves as Dean of the Faculty of Geography and Regional Studies. His research focuses on social urban geography, suburbanization processes, and the philosophy of geography. His book publications include *Concepts of Space in Human Geography*.

Alla Makhrova is a principal research fellow at the Faculty of Geography, Moscow Lomonosov State University. Her research interests are in urbanization and cities, spatial planning, and residential property markets. Her book publications include *Moscow, Capital City-Region; Moscow Oblast: Today and Tomorrow*; and *Geography and Urban Planning*.

Dorota Mantey is Lecturer in the Department of Urban Areas and Spatial Organization, University of Warsaw. Her main research interest is in suburbanization processes and quality of life in suburban areas. Her publications include the book *Spontaneity of Residential Location in the Rural Areas of the Metropolitan Area of Warsaw*.

Ondřej Mulíček is Assistant Professor in the Department of Geography, Faculty of Science, Masaryk University Brno, Czech Republic. His research is focused on the analysis of urban systems, metropolitan areas, time geography, and territorial planning.

Tatyana Nefedova is a head researcher in the Department of Economic and Social Geography in the Institute of Geography, Russian Academy of Science. Her research interests are in regional rural and urban development in Russia. Her book publications include *The Environs of*

Russian Cities, The End of Peasantry, and Moscow Oblast Today and Tomorrow.

Mari Nuga is a doctoral candidate in human geography at the University of Tartu, Estonia. Her research interests are in the urban geographies of postcommunist countries, with a particular focus on urban fringe processes. Her dissertation project deals with the transformation of Soviet-era summer home areas into areas of permanent settlement.

Nataša Pichler-Milanović is a senior research associate at the Faculty of Civil and Geodetic Engineering, University of Ljubljana, Slovenia. Her research interests are focused on comparative patterns of urban and regional development in Europe. Her book publications include *Transformation of Cities in Central and Eastern Europe; Challenges of Spatial Development of Ljubljana and Belgrade*; and the co-authored report "Metropolisation and Polycentric Development in Central Europe."

Kiril Stanilov is a senior research associate in the Department of Architecture, University of Cambridge, England. His research interests are centered on explorations of contemporary patterns of urban growth and change and on the evolution of urban form. His book publications include *The Post-socialist City, Twenty Years of Transition*, and *Suburban Form*.

Luděk Sýkora is Professor of Social Geography and Regional Development at the Faculty of Science, Charles University, Prague. He focuses on transformations in postcommunist cities, specifically processes of suburbanization, gentrification, and segregation, paying attention to globalization, real estate development, housing and urban policies, and developments in urban and regional systems.

Tiit Tammaru is Professor of Population and Urban Geography in the Department of Geography at the University of Tartu. His current research focuses on social and ethnic differences in migration and on housing and residential segregation in Estonia and other cities in Eastern Europe.

Iván Tosics is a sociologist, principal of the Metropolitan Research Institute in Budapest. He is currently involved in the URBACT programme as one of the thematic pole managers. He has published extensively on European urban development, divided cities, sustainability, metropolitan areas, regional policy, multilevel governance and postsocialist cities.

Waldemar Wilk is Senior Lecturer at the Faculty of Geography and Regional Studies, University of Warsaw, Poland. His research interests include location theory, with a focus on services and spatial aspects of economic changes in Poland. He recently published the book *Network Theory and Retail Chains in Poland* (in Polish).
