

Rafael D. Kasischke

# The WORLD Theater

The Transformation of our World  
of deception, lies and "keeping down" humanity  
to awakening, resurrection and prosperity

This book is dedicated to people who don't know  
where they stand right now:  
on the material, secure side or on the uncertain,  
unknown side, not clear and not tangible,  
hence the immaterial side.

This book is not dedicated to EGO's, narcissists,  
power people and alpha dogs.  
They know everything better. And that is a good thing.  
Because they will recognize that there are also  
other paths than those they have experienced  
and followed up to now. Or they give up.

This book is intended to give orientation, trust,  
courage, and strength to recognize a clarity.

# **Contents**

Forward

Introduction

The Transformation of the World

The CALL – The Call for a Better World

Remarks on the CALL – The Peaceful Revolution

The Transformation of Switzerland

The Transformation of the Swiss Financial Center

The Transformation of the Consultants

The Transformation of Entrepreneurs

The Transformer – The Light Maker – The Mastermind

The Transformation of Money – The New Perspective

The Transformation of Money – The Easy Money

The Transformation of Money – The New Money

The Transformation of Man – The Change of Mind

The Passing – The Death – The Soul

The new Generation and the Promised Land

The PLAY – The Church, Politics, and Money

The LIFE School – Inspiration, Intuition, and the Heart

CORONA – The Background and the Consequences

Happy Transformation – My View of the Year 2030

Conclusion

The Closing Words

Appendix – The Level of Consciousness

## **Forward**

Our world has become a world without heart, joy, orientation, and trust. The reason is our focus on material values and their attachment. Spiritual and human VALUES are lost. The belief in the matter and not in something higher have taken the people in the grip. There is a lack of role models to resurrect and awaken actual values. And "lighthouses" are missing, which show the way to other people.

Especially for the young generation, the absence of these ROLE MODELS and LIGHTHOUSES is a lack and deficit. This youth, which has come into the world with new ideas, is only waiting for these new developments to be uncovered. A new world is desired - a world full of warmth, humanity, joy, satisfaction, trust, orientation, emotional and mental stability, as well as creative power - a world without fear and without greed, a world where the LIGHT is shining.

MONEY plays a major role in our world because we cannot live without money. But the importance of money has reached a level that has gone out of the norm. "Money will decay if we don't handle it well," said a wise woman 20 years ago. Today, that's where we are - decaying. On the one hand, our world has accumulated gigantic debts through governments, companies, private households. And on the other hand, a few people have accumulated gigantic fortunes. Is that healthy?

Many people are aware that our world cannot go on like this. We have to go back to basics. First, we must reduce the importance of money to a normal level; secondly, we have

to learn to deal with money differently and thirdly, we have to use it differently – in new things that bring PROSPERITY and WEALTH to mankind.

A new money teaching is needed. And a new alternative moneyinstitute is required, which takes money and gives (lends) money like in the past, transparently, honestly, and sincerely, humanly and with heart.

This new type of institute is one of the "lighthouses". This institute will bring a new TRUST in the money system. This "transparent money institute" will be established as an endowment fund in Switzerland. Like-minded masterminds and change makers are welcome to accompany and promote this step.

The ENDOWMENT FUND has the task of taking money and giving money as loans – especially to the young generation. These young people have already come to earth with new ideas. We older and wiser people will accompany these young ones on their way of life. And we will support them - by means of money - in the realization of their new developments, which are for the WELFARE of HUMANITY. We are doing a great service to people in general as well as to money – our attitude towards money and our handling of it. Before we provide money to young people, we teach them the importance of this matter and how to handle it.

Let us envision the following metaphor: In the middle of the Atlantic Ocean, there is a tree – a big, strong tree. Many people have been carried out to sea by a huge wave (tsunami). They are now swimming in the Atlantic Ocean and trying to reach this tree to hold on to it. Because it means SAFETY for the desperate people. The tree gives support. It gives hope. It gives confidence. It radiates a new beginning. And it embodies life – hope for a meaningful new life on earth, in which:

- resources are distributed fairly among people,
- people pursue their vocations and passions,
- a world in which there is no more greed for money,
- there is no longer any fear,
- no EGO addiction and greed for power prevail.

This is the image of the new earth, and the new generation. We invite all people to accompany our path.

Look forward to a new world – a world that opens your inner being and your heart. This book is not intended to frighten you, but to encourage you to think and rethink. As the well-known neurobiologist, Prof. Gerald Hüther, said, "We older wise men want to give people inner strength and show them the way." He - like the author of this book - called for a CALL, a "RUF" for a better world.

What is the world about today? It is about ORIENTATION – about reorientation. Because our insecurity and fear are growing and our TRUST - in systems, governments, and in money - is decreasing. Humans must change their behavior. We humans, we all have a life. But it does not belong to money. And it does not belong to the banks.

Back in 2010 a visionary told the author "It's about new ways of dealing with finances. The world is in a restructuring process.

The world is rising. The MONEY also rises. We have to shake the money off the dirt." And she added: "Rafael, if the ENERGY FLOW of money is transformed and hits the HEARTS of the people, then it is a great success."

## **Introduction**

We live in a paradigm shift. Exploitation of human beings and of our earth, more and more growth, self-overestimation have had their time. Humanity needs a new master narrative, a new vision for the future. But which one? This book is telling about the master narrative and the future. The author has been thinking about it for years.

Transformation is in the air. Transformation is a must in all areas of our lives, our earth, our businesses as well as systems: political, health, financial, educational, legal systems, etc.

And every single person experiences this transformation within themselves. The author had the pleasure to experience it 20 years ago. And he knows many people who have already undergone their own transformation.

Others have been forced to transform by Corona. Because it is not the virus that has called for transformation, but our consciousness. And that is the main cause of the virus and the epidemic. Our consciousness and our view, the perception of ourselves and of the world as well as of our companies and employers, and of the political arena is changing - now.

We are stepping out of the hamster wheel of the daily, repetitive routine of life. We are taking ourselves into our own hands. And we are changing our perception - our consciousness.

I am happy to take you dear readers by the hand on this fantastic path to a new promised land and to lead you into the "new land". 10 years ago, a friend wrote: "Rafael -

tender and powerful at the same time - you lead us out of the fog". Yes, many people are in the fog.

They no longer see clearly - through the fog. We are going through the fog now.

Before going to the promised land, we have to go through a valley - a valley full of tears. That is part of the transformation. Without going through the valley, we will not come to our own transformation. Those who do not want to go this way, their soul says goodbye and goes on another way: into the multiverse.

However, those who have passed through the valley will experience the promised land - a land full of bliss, love, joy, and health. No more envy, jealousy, strife, fighting and negative emotions. The table of consciousness in the appendix draws attention to the individual stages.

Many people feel as if they are in a fog. Others live like on an island of bliss - on the one hand incomprehension about the measures decided by the governments, about the flooding of the financial markets, etc. On the other hand: arrogance, know-it-all, pride, superiority, Ego, power,.....

I compare our last 20 years with those of 100 years ago: the golden 20s of the last century. There was celebration, consumption, the money and champagne flowed in mass. But the flow stopped a long time ago. The money no longer flows so easily. Many companies are making efforts to produce money - to make profits. The exceptions are Apple, Amazon, Alphabet and Facebook. These companies have produced gigantic profits through sales or through advertising.

However, are these clean business models? Yes, of course - according to old consciousness. But this consciousness is

"old school". Does mankind need so much advertising by Facebook, Google? Does humanity need so much consumption by Amazon? Does humanity need so many iPhones by Apple? NO!

Many people are broken or torn internally. They no longer see any light in the dark tunnel. So instead of iPhones, consumption and advertising our attention has to be directed to the human being and his inner support, his inner wealth, his inner strengthening. That is the transformation. That's what transformation is all about. But people do not yet recognize it. Therefore, they have to go through the valley of tears.

Hundred years ago, the valley of tears was the collapse of the stock market (1929) and with it the collapse of the economy (Great Depression) and then World War 2.

And what does the valley of tears look like today? It takes place on two levels: On the one hand it takes place on the earth plane. We are experiencing great natural disasters: whether storms, earthquakes, seaquakes, volcanic eruptions, fire, and water.

As a result, parts of countries are breaking away. The earth will be reshaped. The previous parts of the earth will not remain in the form we know today but will be reshaped. And the earth will rotate: the north and south poles will interchange (see reversal of the polarity of the magnetic field shift).

As a result of the natural catastrophes, there will be collapses on the financial market. Prices will collapse. And with them savings. As a result, people consume less because they have less purchasing power. People will cut back. "Back to basics" becomes the general thinking.

On a personal level, many people will say goodbye. Tears will flow to the families left behind. Those who have said goodbye are happy to leave the earth. It was too hard for many. Their lives were too painful. But they should and wanted to make this experience. And that is good – for each and every one of them.

Today, they no longer have the strength to go the way to the promised land. Because the way there is somewhat difficult. They no longer have the necessary strength to go the way. They also do not want to change their consciousness. Because a world, which is not material, which is unknown, uncertain, not clear, and touchable, these people do not want to experience. They are afraid of it. They feel comfortable only in the material which gives them safety.

In any case, I am there to accompany every person who wants to set out for the promised land, and at the same time teach them the ability to lead themselves. This is the worldwide "peaceful revolution". It is the beginning – the departure into a new world.

*"Per aspera ad astra" - "Over rough paths one reaches the stars".*

## **The Transformation of the World**

I am a friend of people. I am a people person. As I write in all my books, I am on the side of the people – people who are considered or made to be immature, incompetent, and unqualified as well as small by others, i.e., institutions such as the church, politics, companies as well as our systems. I stand for them – these people. I stand on their side. Too much nonsense, untruths, fraud, lies and manipulation have been done to the people in the last 2,000 years. Many have been broken by these untruths, exploitations and injuries through the institutions mentioned.

I see it as my duty and mission to give them a voice. Because over the years I have recognized these lies and the deception of humanity and today I see through these untruths and manipulations of the institutions and the system. I myself have first had to make the experience of being kept down and exploited by society and the systems. I went through that – through the valley of tears. Fortunately, I recognized that at some point.

Today we live in the time of TRANSFORMATION. The untruths are now coming to the table. They are made public so that they can be transformed into good – these Wirecard, VW Diesel scandals, these Credit Suisse and UBS scandals, these Swiss nonchalance's, the German subservience and obedience to authority, this American show off and rip-off society, this Catholic Church, which has been telling the untruth and luring people into ruin for over 2,000 years.

Today, it is no longer about hearing confession. It's no longer about confession and "God forgives everything." It is
