A remind of mine

Some of my inspirations

A remind of mine

So all we start is at the birth, at that moment when we were beat at the buttock, which we confirm with a deep breath to cry for Live, in that moment we are nude. Later when we grow up we feel not nude, we feel naked and it give a shame to us. So we like to forbid any moment of nude people, in the 19th century the governments and churches did not allowed to show genitals or nipple so the past moral orbit to the woman to be alive. It was rigid.

So, how it started no one knows. But how to start to write about “Stonewall” or “human rights”. I read a lot about and find not a really point to start. A lot of things are written, but is this the story?

The oldest recording of human rights in form of the rainbow - flag a recording to the Inka's and Thomas Müntzel. Both are century fare a way. But the idea is also alive. Also from John Locke which wrote the first doctrine of the human rights. So know I sit in a café and look around to the people, to their emotions, the feelings. It seems to be free, they wear stuffs they like, they stile they Life as it seems in they opportunity and possibility. At the end of all the freedom they shine to have - it is all or nothing.

The most people did not knew what kind of inspiration of human rights are. Of course our father of nation have given us an inspiration of it and as a kind of homework, we have to build them out as they grown up perfect. You can be as

you like, but without to harm someone. Of course we have to stay in differences, but to think twice to give harmony.

When I was on therapy, my Therapist give me a question;

“What means to be an individualist?”

So I got at the end of a setting a homework to do for the next couple of days. I discuss it with people of my confidences, I discuss it by myself and collect a lot of information by internet. At the end I got a picture in my mind, I was using for years. This picture I was find deep inside of mine, I was following for years, it was inside but I didn't seen or knew it, but it was hardly following me. So as a lot of inspiration and behaviors that built up my emotion and characters. At first I bring it out as a sentence I found:

“An individuum is a person how life's through the social surrounding.”

As back to the sentence of John Locke:

“The human have the right to be themselves without harming some. The only exception is if the government is not violate this right, people may legitimately rebel!”

Okay, so fare the theory about human rights and individualism, but it is our exercise to find that out. Of course be free but did not harm someone. It is a hart work course it will not really work. Sometimes you must leave this Border, because you have to protect the subliment.

So what has this all to do with 1968 or Stonewall, all this thinks where inside of us and normally it has an influence to us. The people gone through the history of intolerance and ignore, a lot of war's where done in the past and it was time to get brothers under the sun.

The Second World War find an end in Europe but it goes on in near Asian. The people started to become free or find a will or dream of it.

Martin Luther King and the black Panthers talk with appealingly for peace and Love. He was one of them how used the word "human rights" in form of Love and peace. At the 04th of April 1968 he was shoot backside from a white man on the steps of his home. This was the act which gone around the world and the people got out of their shadow's. A couple of month later the first communities gone out of the shadow and publicized it official. This was the rising of the 68th and human rights.

During all the time, the 28th of June 1969 is the next great changing of the point of view.

Stonewall was a club, where all the dark side of society was meeting. Christopher Street was not the only point for homosexuality but it was a center of happening and refuge for stranded. But in this night, they want to stop to be harmed by police. They went out in the Christopher Street and fight for their rights. It was a collective right, to be the gender you feel or get sex which people you prefer. It was a scream to the world:

"Here we are, talk to us...."

In this night they did not only dropped stones or bottles to the police, it was the first time that people dance and sing for their rights correspond in the convention of human rights.

This book is only an inspiration of mine, but if it inspired or touch your hurt it should bring you closer the convention. So I hope you enjoy.

This book was initiated by the contact to the interpride New York and a result of a lot of workshops I absolved. So as a lot of e-mails. Of course it is in drawing and photos an inspiration of mine, but I like to share.

Now I am in London and take a look to a city which grown up and get under the influence of a modern world. I am surprised that London people have not such hectic as I seen in other cities. They take time, but in the faces I seen they are not lucky. Perhaps, in the next day's I find out why. I life in a typical London household and will live to see. Of course London is an expensive place to have an apartment. But people take time for themselves and personal contact is much importance than internet. They meet people and take time for people, it is to stay in a discounter and have time to ask politely they bee like you give back the present of courtesy. London the place where emancipation was get the first and greatest goal. 30 Years later they done a film from that time it started 68th and the woman win 1972 with help of the husbands and other people. The Film was called "We want sex". But the primary minister give to the empire the Law that it is illegal to pay female less than others or discriminate them. It will be punishment.

All that will get in the hurt of people and I did not think that Britain will change.

The globalism only work on destroying field and give illegal and criminal activity more place than it should be. That is not the system of globalization, it is that a lot of government sleep and will not see, that they must react before some think runs worse. To protect nature, people and health systems is the most important rule, but the governments thinks they have time, like Germany which take 50 years to the future to change which should done in 2020. Poison and chemicals (I mean unhealthy) have nothing to find in

foodstuffs, but no one react on it. Why people did not read which kind of foodstuffs they eat which ingredients are in side and buy only material which are clean or near less clean.

That was a part which took by the 68th they start to consume only that kind, they like. They took the responsibility and change that which they can do. No industries will produce products which will not be sell. So the people have a power which can change in a minute the world. As long as you think you are the only one how win, you have lose.

“Only if you fished the last fish, hunt the last animal, poison the last river and cut the last tree, you will find out, that you can’t eat money.”

Prophecy of the Cree.

So today it is time to wake up, of course no one will be killed, only by terrorism but people accept that way. They accept a lot of that which is unacceptable. To protect people, to protect the own folk, to protect nature, that is the way we have to go and is our assets or our ancestors.

The main opportunity is that people think they are the one that get the million, it is okay to like to earn a million or become a millionaire but the system is today not made to grown up. Normal work did not enough to live. The politic install a system where you can earn money by killing people. And the people let kill them. Today you must pay a lot of money to study without studying. You have to follow a plan and if you finish you got a title which told you that you brave learn and talk like the leader told you. There is no

time to research or find things by your own way. There is no place to be.

School and university should not cost anything, only your work and creativity and the will to learn.

I see in this day's "made in Dagenham" again and think yes, that is that what the woman fight for and today we give that away, without getting back anything. Today people not believe that they can change the world, they spend money to install in African or other parts of the world a liberate system or investigate to force the radical Islamism. So why you don't investigate in your own freedom? So why you don't fight for your own live? Why you radicalistic you?

So the rest of this story I wrote while I sitting in Soho in a coffee. At the end the right place to give some phrases to think about. Why the government did not stop the gambling with living spaces? I mean that some institution or people count houses and apartment rent so high that they fare a way of paying. The most house which sell are not less than one pound. You must restore them, but the price is like they are restored. -but they are not! It is like to create money without built some think.

One house rise up in the price like a hurricane and it is only too destroyed. No one say stop it, they government only notice that living comes so expensive that no one can stay to work. So it has to stop that.

Otherwise there is a business which create's money without a value, in Germany we call this business "Derviate" it means you sell credits which are unable to get back. This means you got a client which has a credit and did not pay

back and are "bankrot". But you take his house, his credit and sell both for the double of the price. That you do so long as one bank stop it because the action stopped by Curtis of law, because the one how as to pay back say in front of judgement that he is unable to pay back. In the most time this credit is sell three times by the double of the price and the same for the house. But the value is only a quarter of it. This game banks and other investigator done since 25 years it built up "Derivate" likes the Deutsche Bank which are 600 Billion Euro high and will not pay back. But the bank must pay for rents or kill the saving accounts of the clients. No one win, the houses falling down, because no one can pay for them and the saver lost all they money. The own think this system brings up a generation how comes pure and have not enough money to stay for live.

The income grow down and there is not enough to stay.

Also people have to change they value in Live. If I read that feminist of today agree it a good way to be abused and beat by man, they are wrong and dump. Stop that, stop the abuse, and stop beating each other.

Did you need a war than stay in the arias where war is, go they naked and cry to be killed, but did not expected to the west culture to start up a war where people abuse and beat each other.

Stop this - radical!!

I was been in a war, I know how it is, and I know what people able to do each other. But I want to come back in a civil Live and it never works. I find in the last 20 years more war of civilian than in an army. So I love the 68th the idea the ideals the Love. All that I wish in my Live but I got a war, a war I did not want, I did not start, but I fight. 25 years living in a war is like to be in the hell.
