

Roland Proesch

# Signal Analysis for Radio Monitoring

EACH SIGNAL IS INFORMATION

## **Acknowledgement:**

Thanks for those persons who did support me in the preparation of this book:

Aikaterini Daskalaki-Proesch  
ANgazu  
Rapidbit

**Disclaimer:**

The information in this book has been collected over years. The main problem is that there are not many open sources to get information about this sensitive field. Although I tried to verify this information from different sources it may be that there are mistakes. Please do not hesitate to contact me if you discover any wrong description.

# Content

1. **LIST OF PICTURES**
2. **LIST OF TABLES**
3. **GENERAL**
4. **INTRODUCTION**

## **Tools**

### Audio Tools

Adobe Audition 1.5 or 3.0

Sound Card Oscilloscope

### Analysis Tools

Signals Analyzer

### Decoding Tools

CODE 300-32

go2DECODE

## **Bit Analysis**

go2ANALYSE

## **Recordings and Playback**

IQ File Format

Wave File Format

Recognizing File Formats

Audio, real, one channel

Audio, real, two channels

I/Q, complex, two channels

I/Q, complex, one channel

### **Sound Card Clock Correction**

Measurement of the Clock Error with CheckSR

Clock Correction Example HOKA Code 300-32

Clock correction using a FAX station

Clock correction using a STANAG signal

Clock Correction with Signals Analyzer SA

Clock correction using a STANAG signal

## **5. DESCRIPTION OF WAVEFORMS AND ANALYSIS**

### **Analogue Modulation**

Amplitude Modulation (AM)

Double Sideband Reduced Carrier (DSB-RC)

Double Sideband Suppressed Carrier (DSB-SC)

Single Sideband Full Carrier

Single Sideband Reduced Carrier (SSB-RC)

Single Sideband Suppressed Carrier (SSB-SC)

Single Sideband Modulation (SSB)

Independent Sideband Modulation (ISB)

Vestigial Sideband Modulation (VSB)

Frequency Modulation (FM)

Wide Frequency Modulation (WFM)

Pre-emphasis and De-emphasis

Analysis of a WFM signal

### **Digital Waveforms**

Amplitude Shift Keying (ASK)

Analysis of an ASK

- Determination of Baud rate of an ASK

  - Oscilloscope Display

  - Spectrum Measurement

  - Eye Diagram Measurement

Frequency Shift Keying (FSK)

Analysis of a FSK

- Center, Mark and Space Frequency

- Frequency Shift

- Baudrate (Bd)

Modulation Index

Automatic Detection of Center Frequency

Manual Detection of Center Frequency

- Frequency Resolution of FFT

Frequency Measurements

- Single Cursor

- Two Cursors

- Three or Harmonic Cursor

Determination of Baud rate

- Baud rate by Sonogram

- Baud rate by Spectrum via the Envelope Method

- Baud Rate by Time Length of a Demodulated Bit Stream

Auto-Correlation Function ACF for a FSK signal

- ACF measurement of a FSK signal with HOKA Code300-32

ACF measurement of a FSK signal with  
Signals Analyzer

Continuous Phase Frequency Shift Keying  
(CPFSK)

Double Frequency Shift Keying (DFSK)

Analysis of a TWINPLEX Signal

Constant Envelope 4-Level Frequency  
Modulation (C4FM)

Minimum Shift Keying (MSK)

Tamed Frequency modulation (TFM)

Gaussian Minimum Shift Keying (GMSK)

Recognition of a GMSK Signal

Multi Frequency Shift Keying (MFSK)

Analysis of MFSK signals

Phase Shift Keying (PSK)

Binary Phase Shift Keying (BPSK)

Shaped Binary Phase Shift Keying (SBPSK)

Quadrature Phase Shift Keying (QPSK)

Offset Quadrature Phase Shift Keying (OQPSK)

Staggered Quadrature Phase Shift Keying  
(SQPSK)

$\pi/4$  Quadrature Phase Shift Keying ( $\pi/4$  QPSK)

Compatible Differential Offset Quadrature Phase  
Shift Keying (CQPSK)

Coherent Phase Shift Keying (CPSK)

Differential Coherent Phase Shift Keying (DCPSK)

8PSK Modulation

Differential Phase Shift Keying (DPSK)

Differential Binary Phase Shift Keying  
(DBPSK)

Differential Quadrature Phase Shift Keying (DQPSK)

Differential 8 Phase Shift Keying (D8PSK)

Quadrature Amplitude Modulation (QAM)

Analysis of a PSK

Measurement of Baud rate and Center Frequency

Baud rate Measurement with AM- or ASK-Method on PSK Signals

Phase Tools CODE 300-32

Power Spectrum 600 Bd BPSK

Measurement of exact Center Frequency

Example 8PSK A

Absolute PSK (PSK-A) and Differential PSK (PSK-B)

PSK Types and their Behaviour

PSK2-A

PSK2-B

PSK4-A

PSK4-B

PSK8-A

PSK8-B

Comparing MSK and DBPSK

Auto-Correlation Function ACF for a PSK signal

ACF Function in Signals Analyzer SA

ACF Function in HOKA Code 300-32

PSK-Signals and idle condition

Idle condition PSK2-A

Idle condition PSK2-B

Idle condition PSK4-A

Idle condition PSK4-B

Idle condition PSK8-A

Idle condition PSK8-B

## **Orthogonal Frequency Division Multiplexing (OFDM)**

Analysis of an OFDM or Multicarrier Signals

Measurements on a BR6028 Signal

Measurements on a CIS 12 Signal

Measurements on an OFDM Signal with 45 Channels

Measurements on a CODAN Signal

OFDM Measurements with Signals Analyzer

Spread Spectrum (SS) Modulation

Direct Sequence Spread Spectrum (DSSS)

Frequency Hopping Spread Spectrum (FHSS)

Analysis of a Frequency Hopping Signal FSK

Analysis of a Frequency Hopping Signal MFSK

Analysis of a Frequency Hopping Signal PSK

Analogue Pulse Modulation

Pulse Amplitude Modulation (PAM)

Pulse Width Modulation (PWM)

Pulse Position Modulation (PPM)

Digital Pulse Modulation

Pulse Code Modulation (PCM)

Delta Modulation

## **Various Analysis methods**

Analysis of Burst Signals

## SITOR ARQ Mode

### Analysis of RADAR Signals

#### Principle

Radio frequency

Antenna scan rate SR

Transmit time or pulse width/pulse duration PW/PD

Pulse group repetition interval PGRI

Pulse repetition time PRT

Pulse repetition frequency PRF

Pulse Amplitude PA

#### Radar Frequency Bands

### Analysis of an Over the Horizon Radar OTHR Signal

Frequency Modulation Continuous Wave (FMCW)

Frequency Modulation on Pulse FMOP

### Analysis of a VHF Radar Signal

### Analysis of Satellite Signals

#### SCPC Channels Parameter Auto-Correlation Function

SCPC BPSK FEC  $\frac{1}{2}$  (0.5)

SCPC BPSK FEC  $\frac{3}{4}$  (0.75)

SCPC BPSK FEC  $\frac{7}{8}$  (0.875)

SCPC QPSK FEC  $\frac{1}{2}$  (0.5)

SCPC QPSK FEC  $\frac{3}{4}$  (0.75)

SCPC QPSK FEC  $\frac{7}{8}$  (0.875)

SCPC 8PSK FEC  $\frac{1}{2}$  (0.5)

SCPC 8PSK FEC  $\frac{3}{4}$  (0.75)

SCPC 8PSK FEC 7/8 (0.875)

SCPC 16QAM FEC  $\frac{1}{2}$  (0.5)

SCPC 16QAM FEC  $\frac{3}{4}$  (0.75)

SCPC 16QAM FEC 7/8 (0.875)

Analysis of a SCPC signal with SA

SCPC QPSK FEC  $\frac{3}{4}$  (0.75)

## 6. **FINGERPRINTING**

General

Pre-Carrier and Post-Carrier

Fingerprinting with MFSK Signals

## 7. **ADDITIONAL INFORMATION**

Description of Modulation States

Asynchronous Data Transmission

Synchronous Data Transmission

Simplex

Duplex

Half Duplex

Semi Duplex

Baud Rate, Bit Rate, Symbol Rate

Bit Rate

Symbol Rate

Baud rate

Data Formats

NRZ (Non Return to Zero)

NRZ (S) (Non Return to Zero - Space)

NRZ (M) (Non Return to Zero - Mark)

Bi- $\Phi$ -L (Biphase Level)

Bi- $\Phi$ -S (Biphase Space)

Bi- $\Phi$ - M (Biphase Mark)

Coding

Code

Codes in Communication used for Brevity

An example: the ASCII code

Interleaving in Error-Correction Coding

Interleaving Examples

Codes to Detect or Correct Errors

Error-Correcting Code (ECC)

Forward Error Correction (FEC)

Convolutional Code

Viterbi Algorithm

Reed-Solomon Error Correction

Overview of the Method

Properties of Reed-Solomon Codes

Use of Reed-Solomon Codes in Optical and  
Magnetic Storage

Timeline of Reed-Solomon Development

Satellite Technique: Reed-Solomon + Viterbi  
coding

Turbo Code

Shannon-Hartley Theorem

Theorem

Examples

Used code tables

ITA2, ITA2P and ITA3(CCIR342-2)

Russian MTK2

Chinese Telegraph Code

CCIR476-4, HNG-FEC, PICCOLO MK VI

ITA 2 P

ITA 3
