Chapter 5

- Closing words: Lean back and enjoy

Introduction

Do you belong to the people who have already entered the terms: additional income, supplementary income, investment opportunity in search engines of the WorldWideWeb?

If you do, then I have something for you here!

In this book, I would like to show you how you can easily generate additional passive income with Bitcoin and Co.

As a beginner, or someone busy, sitting down and staring at trading chart for hours might be challenging. It might even put you off the whole venture especially if you are not a full time trader or busy at your 9-5 job.

The good news is you can use a bot to trade and save yourself the time and hassle. We will show you how to create a bot in about 90 minutes and the big advantage is that you can dispose of your deposit at any time.

In this book, you will receive step-by-step instructions in pictures on how to proceed until you have created your own Trading Bots. At the same time, you will receive a setting recommendation from me, which is adapted to the different market phases of Bitcoin.

In addition, you will find the appropriate links to the required Internet sites for registration, which will give you a permanent 5% discount on any trading fees.
