Acknowledgements

My thanks go to my family and friends who have made me who I am today. Special thanks to all those who supported me in writing this book. I would like to thank all my classmates, teachers, fellow students, lecturers, demonstrators, activists, colleagues, companies and countries with whom I have had the privilege of sharing the experiences from which all the ideas in this book have emerged. I would like to thank the staff of Books on Demand for their kind helpfulness. I thank the citizens of Seligenstadt for the harmony and solidarity in which I was able to write.

Foreword

This policy concept contains a variety of proposals for possible political reforms. It can be peacefully and democratically adapted to any current political system of any state in the world, but also to political systems in families, clubs, associations or companies. Wherever humans make or submit to rules that manage living together, the following proposals can be helpful. Readers who find the proposals so helpful that they would like to implement them together with like-minded people can contact the author. The contact form on the last page can be used for this purpose.

Faults and defects

I ask for your understanding that this volume was not professionally proofread. I could only afford professional proofreading for the summary. Spelling errors and unfortunate phrasing may therefore occur. As soon as this volume has sold enough to pay for a professional proofreading, it will be done. After that, a new edition will be published.

English version

Please understand that this volume has been translated automatically. I could only afford a professional translation for the summary. Poor wording and spelling errors may therefore occur. In case of doubt, the German version shall prevail. As soon as this volume has sold enough to pay for a professional translation, it will be done. After that, a new edition will be published. It was more important to me that no one in the world should have an information advantage than individual translation errors in the complete work.

References

If something has been quoted directly, it is set in italics. If the headings contain footnotes, the sources for direct and indirect quotations apply in the chapter for which the heading stands. Otherwise, quotations or source references are directly at the word or at the end of the sentence or paragraph. This book contains parts of text based on the Federal Constitution of the Swiss Confederation of 18 April 1999 (as of 12 February 2017), abbreviated to BV¹ and the Constitution of the Canton of Bern of 6 June 1993 (as of 11 March 2015), abbreviated to KV².

If the constitutional paragraph, or individual paragraphs thereof, are based in whole or in part on extracts from the BV or KV, this is indicated in a footnote. The references to the corresponding footnotes for constitutional paragraphs are usually found after the heading of the affected chapter and sometimes in the body of the text. Articles used in the Swiss constitutions are listed in the footnote with a number after the title of the constitutional paragraph. Example: §123
Sample title: BV Art.123, KV Art.123.

All internet sources are fully cited in the footnotes. They were last accessed on 30.09.2021. All literature sources are also listed in full in the footnotes.

All references to tasks undertaken by other ministries and described in more detail there are given in footnotes. Example: Model Ministry - 1.2.3 Model Chapter.

All footnotes are to be viewed in comparison to the respective source, so-called indirect quotations. Direct quotations are set in italics, but hardly ever occur. The source reference is intended to enable further investigation and to take copyright into account.

All keywords used, based on the names of the responsible units, departments and ministries of Germany, are listed at the end of this volume in the chapter on the conversion of ministries.
