Chapter XI.

Trial and Death.

1648

The End.

PREFACE.

[Table of Contents](#)

The history of the life of every individual who has, for any reason, attracted extensively the attention of mankind, has been written in a great variety of ways by a multitude of authors, and persons sometimes wonder why we should have so many different accounts of the same thing. The reason is, that each one of these accounts is intended for a different set of readers, who read with ideas and purposes widely dissimilar from each other. Among the twenty millions of people in the United States, there are perhaps two millions, between the ages of fifteen and twenty-five, who wish to become acquainted, in general, with the leading events in the history of the Old World, and of ancient times, but who, coming upon the stage in this land and at this period, have ideas and conceptions so widely different from those of other nations and of other times, that a mere republication of existing accounts is not what they require. The story must be told expressly for them. The things that are to be explained, the points that are to be brought out, the comparative degree of prominence to be given to the various particulars, will all be different, on account of the difference in the situation, the ideas, and the objects of these new readers, compared with those of the various other classes of readers which former authors have had in view. It is for this reason, and with this view, that the present series of historical narratives is presented to the public. The author, having had some opportunity to become acquainted with the position, the ideas, and the intellectual wants of those whom he addresses, presents the result of his labors to them, with the hope that it may be found successful in accomplishing its design.

HIS CHILDHOOD AND YOUTH.

[Table of Contents](#)

1600-1622

[Table of Contents](#)

Born in Scotland.

King Charles the First was born in Scotland. It may perhaps surprise the reader that an English king should be born in Scotland. The explanation is this:

The circumstance explained.

They who have read the history of Mary Queen of Scots, will remember that it was the great end and aim of her life to unite the crowns of England and Scotland in her own family. Queen Elizabeth was then Queen of England. She lived and died unmarried. Queen Mary and a young man named Lord Darnley were the next heirs. It was uncertain which of the two had the strongest claim. To prevent a dispute, by uniting these claims, Mary made Darnley her husband. They had a son, who, after the death of his father and mother, was acknowledged to be the heir to the British throne, whenever Elizabeth's life should end. In the mean time he remained King of Scotland. His name was James. He married a princess of Denmark; and his child, who afterward was King Charles the First of England, was born before he left his native realm.

Princess Anne.
Royal marriages.

King Charles's mother was, as has been already said, a princess of Denmark. Her name was Anne. The circumstances of her marriage to King James were quite extraordinary, and attracted great attention at the time. It is, in some sense, a matter of principle among kings and queens, that they must only marry persons of royal rank, like themselves; and as they have very little opportunity of visiting each other, residing as they do in such distant capitals, they generally choose their consorts by the reports which come to them of the person and character of the different candidates. The choice, too, is very much influenced by political considerations, and is always more or less embarrassed by negotiations with other courts, whose ministers make objections to this or that alliance, on account of its supposed interference with some of their own political schemes.

Getting married by proxy.

As it is very inconvenient, moreover, for a king to leave his dominions, the marriage ceremony is usually performed at the court where the bride resides, without the presence of the bridegroom, he sending an ambassador to act as his representative. This is called being married by proxy. The bride then comes to her royal husband's dominions, accompanied by a great escort. He meets her usually on the frontiers; and there she sees him for the first time, after having been married to him some weeks by proxy. It is true, indeed, that she has generally seen his *picture*, that being usually sent to her before the marriage contract is made. This, however, is not a matter of much consequence, as the personal predilections of a princess have generally very little to do with the question of her marriage.

James thwarted.
James sues for Anne.

Now King James had concluded to propose for the oldest daughter of the King of Denmark and he entered into negotiations for this purpose. This plan, however, did not please the government of England, and Elizabeth, who was then the English queen, managed so to embarrass and interfere with the scheme, that the King of Denmark gave his daughter to another claimant. James was a man of very mild and quiet temperament, easily counteracted and thwarted in his plans; but this disappointment aroused his energies, and he sent a splendid embassy into Denmark to demand the king's second daughter, whose name was Anne. He prosecuted this suit so vigorously that the marriage articles were soon agreed to and signed. Anne embarked and set sail for Scotland. The king remained there, waiting for her arrival with great impatience. At length, instead of his bride, the news came that the fleet in which Anne had sailed had been dispersed and driven back by a storm, and that Anne herself had landed on the coast of Norway.

Their marriage.
James in Copenhagen.

James immediately conceived the design of going himself in pursuit of her. But knowing very well that all his ministers and the officers of his government would make endless objections to his going out of the country on such an errand, he kept his plan a profound secret from them all. He ordered some ships to be got ready privately, and provided a suitable train of attendants, and then embarked without letting his people know where he was going. He sailed across the German Ocean to the town in Norway where his bride had landed. He found her there, and they were married. Her brother, who had just succeeded to the throne, having received intelligence of this, invited the young couple to come and spend the winter at his capital of Copenhagen; and as the season was far advanced, and the

sea stormy, King James concluded to accept the invitation. They were received in Copenhagen with great pomp and parade, and the winter was spent in festivities and rejoicings. In the spring he brought his bride to Scotland. The whole world were astonished at the performance of such an exploit by a king, especially one of so mild, quiet, and grave a character as that which James had the credit of possessing.

Charles's feeble infancy.

Young Charles was very weak and feeble in his infancy. It was feared that he would not live many hours. The rite of baptism was immediately performed, as it was, in those days, considered essential to the salvation of a child dying in infancy that it should be baptized before it died. Notwithstanding the fears that were at first felt, Charles lingered along for some days, and gradually began to acquire a little strength. His feebleness was a cause of great anxiety and concern to those around him; but the degree of interest felt in the little sufferer's fate was very much less than it would have been if he had been the oldest son. He had a brother, Prince Henry, who was older than he, and, consequently, heir to his father's crown. It was not probable, therefore, that Charles would ever be king; and the importance of every thing connected with his birth and his welfare was very much diminished on that account.

Death of Elizabeth.
Accession of James to the English crown.

It was only about two years after Charles's birth that Queen Elizabeth died, and King James succeeded to the English throne. A messenger came with all speed to Scotland to announce the fact. He rode night and day. He arrived at the king's palace in the night. He gained admission to the king's chamber, and, kneeling at his bedside, proclaimed him King

of England. James immediately prepared to bid his Scotch subjects farewell, and to proceed to England to take possession of his new realm. Queen Anne was to follow him in a week or two, and the other children, Henry and Elizabeth; but Charles was too feeble to go.

Second sight.
Prediction fulfilled.

In those early days there was a prevailing belief in Scotland, and, in fact, the opinion still lingers there, that certain persons among the old Highlanders had what they called the gift of the second sight—that is, the power of foreseeing futurity in some mysterious and incomprehensible way. An incident is related in the old histories connected with Charles's infancy, which is a good illustration of this. While King James was preparing to leave Scotland, to take possession of the English throne, an old Highland laird came to bid him farewell. He gave the king many parting counsels and good wishes, and then, overlooking the older brother, Prince Henry, he went directly to Charles, who was then about two years old, and bowed before him, and kissed his hand with the greatest appearance of regard and veneration. King James undertook to correct his supposed mistake, by telling him that that was his second son, and that the other boy was the heir to the crown. "No," said the old laird, "I am not mistaken. I know to whom I am speaking. This child, now in his nurse's arms, will be greater than his brother. This is the one who is to convey his father's name and titles to succeeding generations." This prediction was fulfilled; for the robust and healthy Henry died, and the feeble and sickly-looking Charles lived and grew, and succeeded, in due time, to his father's throne.

An explanation.

Now inasmuch as, at the time when this prediction was uttered, there seemed to be little human probability of its fulfillment, it attracted attention; its unexpected and startling character made every one notice and remember it; and the old laird was at once an object of interest and wonder. It is probable that this desire to excite the admiration of the auditors, mingled insensibly with a sort of poetic enthusiasm, which a rude age and mountainous scenery always inspire, was the origin of a great many such predictions as these; and then, in the end, those only which turned out to be true were remembered, while the rest were forgotten; and this was the way that the reality of such prophetic powers came to be generally believed in.

Charles's titles of nobility.

Feeble and uncertain of life as the infant Charles appeared to be, they conferred upon him, as is customary in the case of young princes, various titles of nobility. He was made a duke, a marquis, an earl, and a baron, before he had strength enough to lift up his head in his nurse's arms. His title as duke was Duke of Albany; and as this was the highest of his nominal honors, he was generally known under that designation while he remained in Scotland.

WINDSOR CASTLE.

Charles's governess.

When his father left him, in order to go to England and take possession of his new throne, he appointed a governess to take charge of the health and education of the young duke. This governess was Lady Cary. The reason why she was appointed was, not because of her possessing any peculiar qualifications for such a charge, but because her husband, Sir Robert Cary, had been the messenger employed by the English government to communicate to James the death of Elizabeth, and to announce to him his accession to the throne. The bearer of good news to a monarch must always be rewarded, and James recompensed Sir Robert for his service by appointing his wife to the post of governess of his infant son. The office undoubtedly had its honors and emoluments, with very little of responsibility or care.

Windsor Castle.

One of the chief residences of the English monarchs is Windsor Castle. It is situated above London, on the Thames,

on the southern shore. It is on an eminence overlooking the river and the delightful valley through which the river here meanders. In the rear is a very extensive park or forest, which is penetrated in every direction by rides and walks almost innumerable. It has been for a long time the chief country residence of the British kings. It is very spacious, containing within its walls many courts and quadrangles, with various buildings surrounding them, some ancient and some modern. Here King James held his court after his arrival in England, and in about a year he sent for the little Charles to join him.

Journey to London.
A mother's love.

The child traveled very slowly, and by very easy stages, his nurses and attendants watching over him with great solicitude all the way. The journey was made in the month of October. His mother watched his arrival with great interest. Being so feeble and helpless, he was, of course, her favorite child. By an instinct which very strongly evinces the wisdom and goodness which implanted it, a mother always bestows a double portion of her love upon the frail, the helpless, and the suffering. Instead of being wearied out with protracted and incessant calls for watchfulness and care, she feels only a deeper sympathy and love, in proportion to the infirmities which call for them, and thus finds her highest happiness in what we might expect would be a weariness and a toil.

Rejoicings.
Charles's continued feebleness.

Little Charles was four years old when he reached Windsor Castle. They celebrated his arrival with great rejoicings, and a day or two afterward they invested him with the title of Duke of York, a still higher distinction than he had before attained. Soon after this, when he was perhaps five or six

years of age, a gentleman was appointed to take the charge of his education. His health gradually improved, though he still continued helpless and feeble. It was a long time before he could walk, on account of some malformation of his limbs. He learned to talk, too, very late and very slowly. Besides the general feebleness of his constitution, which kept him back in all these things, there was an impediment in his speech, which affected him very much in childhood, and which, in fact, never entirely disappeared.

His progress in learning.

As soon, however, as he commenced his studies under his new tutor, he made much greater progress than had been expected. It was soon observed that the feebleness which had attached to him pertained more to the body than to the mind. He advanced with considerable rapidity in his learning. His progress was, in fact, in some degree, promoted by his bodily infirmities, which kept him from playing with the other boys of the court, and led him to like to be still, and to retire from scenes of sport and pleasure which he could not share.

The same cause operated to make him not agreeable as a companion, and he was not a favorite among those around him. They called him *Baby* Charley. His temper seemed to be in some sense soured by the feeling of his inferiority, and by the jealousy he would naturally experience in finding himself, the son of a king, so outstripped in athletic sports by those whom he regarded as his inferiors in rank and station.

Charles improves in health.
Death of his brother.

The lapse of a few years, however, after this time, made a total change in Charles's position and prospects. His health
