To my wife, who is also my best friend: It is hard to imagine that I would be writing this book if it were not for you. It was you, all those years ago, who encouraged me to step outside of my comfort zone and share what I knew with others. Thank you for the push I needed and for coming along on this journey with me.

To my friend Kathy Enderby: You were one of the first people to encourage me to follow my passion for programming and sharing what I had learned with others. Thank you for believing in me all those years ago and for being there when I needed someone to bounce ideas off—especially during those late-night scrambles right before deploying a new software release.

# Acknowledgments

I have to give a very special thanks to all the great folks at Sybex, especially Willem Knibbe, for working on and helping to get this project off the ground after a few years of talking about it. The next two people I would like to thank are Mary Ellen Schutz and Dassi Zeidel, the development and production editors on this book; you two made sure I stayed on track and delivered a high-quality book. I also want to thank Liz Welch (copyeditor), Candace Cunningham (proofreader), and Ted Laux (indexer) for the work you all did on this book.

Thanks to all the folks at Autodesk, who put in the long hours and are dedicated to the work they do on the Autodesk® AutoCAD® product. I cannot forget some of the most important individuals on this book, my technical editors: Rebecca Afshar, Craig Black, and Richard Lawrence. Rebecca Afshar performed the technical edit for Part I, “AutoCAD Platform Customization: User Interface and Beyond.” Rebecca has spent many years as both an instructor and user of AutoCAD; all of this experience helped to make this book even better.

Craig Black performed the technical edit for Part II, “AutoCAD Platform Customization: AutoLISP.” I have known Craig for nearly 20 years and first met him while attending an AutoLISP® session at the local Autodesk Training Center, where he was an instructor. Craig is an excellent AutoLISP programmer and was a great asset as a technical editor on this book. It is always a pleasure to collaborate with Craig and this book was no different.

Last but not least, Richard Lawrence performed the technical edit for Part III, “AutoCAD Platform Customization: VBA.” Richard is a great friend who I met many years ago at Autodesk University. He is a passionate and driven user of AutoCAD and is always looking to improve the way he uses AutoCAD.

Being a technical editor is never the easiest job, but it is one of the most important and I appreciate what you all did to make this book better.

# About the Author

**Lee Ambrosius** first started working with AutoCAD R12 for DOS in 1994. As a drafter, he quickly discovered that every project included lots of repetition. Lee, not being one to just settle for “this is just the way things are,” set out on a path that would redefine his career. This new path would lead him into the wondrous world of customization and programming—which you might catch him referring to as “the rabbit hole.”

In 1996, Lee began learning the core concepts of customizing the AutoCAD user interface and AutoLISP. The introduction of VBA in AutoCAD R14 would once again redefine how Lee approached programming solutions for AutoCAD. VBA made it much easier to communicate with external databases and other applications that supported VBA. It transformed the way information could be moved between project management and manufacturing systems.

Not being content with VBA, in 1999 Lee attended his first Autodesk University and began to learn ObjectARX®. Autodesk University had a lasting impression on him. In 2001, he started helping as a lab assistant. He began presenting on customizing and programming AutoCAD at the event in 2004. Along the way he learned how to use the AutoCAD Managed .NET API.

In 2005, Lee decided cubicle life was no longer for him, so he ventured off into the CAD industry as an independent consultant and programmer with his own company, HyperPics, LLC. After he spent a couple of years as a consultant, Autodesk invited him to work on the AutoCAD team; he has been on the AutoCAD team since 2007. For most of his career at Autodesk, Lee has worked primarily on the customization and end-user documentation. Recently, he has been working on the AutoLISP, VBA, ObjectARX, .NET, and JavaScript programming documentation.

In addition to working on documentation, Lee has been involved as a technical editor or author for various editions of *AutoCAD and AutoCAD LT Bible*, *AutoCAD for Dummies*, *AutoCAD & AutoCAD LT All-in-One Desk Reference for Dummies*, *AutoCAD 3D Modeling Workbook for Dummies*, and *Mastering AutoCAD for Mac*. He has also written white papers on customization for Autodesk and a variety of articles on customization and programming for *AUGIWorld*, published by AUGI®.

# Contents

<i>Introduction</i> .....	xxxi
---------------------------	------

## **Part I • AutoCAD Customization: Increasing Productivity through Personalization . . . 1**

### **Chapter 1 • Establishing the Foundation for Drawing Standards . . . . . 3**

Naming Standards for Projects and Files.....	3
Project Names .....	4
Filenames .....	5
Managing Standards with Drawing Templates .....	6
What Is a Drawing Template? .....	6
Units of Measurement and Format .....	7
Graphical and Named Objects .....	9
Organize Output with Layouts .....	10
Working with System Variables .....	11
Choosing a File Format for Your Drawings .....	14
Defining Plotter Configurations and Plot Styles.....	15
Configuring Output Devices .....	16
Using and Creating Plot Styles.....	18
Managing Plotter Configuration and Plot Style Files.....	21
Enforcing CAD Standards .....	22
Drawing Standards (DWS) Files (Windows Only) .....	23
Configuring, Checking, and Fixing Drawing Standards (Windows Only) .....	24
Translating Layers (Windows Only) .....	31

### **Chapter 2 • Working with Nongraphical Objects . . . . . 35**

Standardizing the Names of Nongraphical Objects.....	35
Layer Names .....	36
Other Object Names.....	37
Renaming Nongraphical Objects.....	37
Managing Object Properties with Layers .....	38
Setting the Default Properties for New Objects.....	39
Creating and Managing Layers .....	40
Significance of Colors.....	44
Defining Appearance with Linetypes, Lineweights, and Transparency.....	45
Controlling Output with Plot Styles .....	48
Accessing Layer Settings.....	48
Grouping and Filtering Layers.....	52
Creating and Using Layer States .....	54

Creating and Managing Annotation Styles . . . . .	55
Text Heights . . . . .	55
Text Styles . . . . .	56
Dimension Styles . . . . .	59
Table Styles . . . . .	61
Multileader Styles . . . . .	62
Annotative Styles and Annotation Scaling . . . . .	63
Defining and Managing Other Nongraphical Objects . . . . .	65
Removing Unused Nongraphical Objects . . . . .	67
<b>Chapter 3 • Building the Real World One Block at a Time . . . . .</b>	<b>69</b>
Defining and Editing a Block Definition . . . . .	69
Defining a Block Definition . . . . .	69
Editing a Block Definition . . . . .	73
Using the Block Editor . . . . .	74
Using and Managing Block Definitions . . . . .	78
Inserting or Replacing a Block Reference . . . . .	78
Renaming and Purging Unused Block Definitions . . . . .	80
Importing or Exporting a Block Definition . . . . .	81
Embedding Information in a Block Definition with Attributes . . . . .	81
Adding an Attribute Definition . . . . .	81
Inserting a Block Definition with Attributes . . . . .	85
Editing Attribute Values and Properties in a Block Reference . . . . .	85
Redefining Block Definitions with Attribute Definitions . . . . .	86
Using Fields with Attributes . . . . .	86
Adding Dynamic Properties to a Block Definition . . . . .	87
Using Parameters to Modify Geometry in a Block Definition (Windows Only) . . . . .	88
Associating an Action with a Parameter (Windows Only) . . . . .	89
Creating a Lookup Table (Windows Only) . . . . .	91
Defining Visibility States (Windows Only) . . . . .	92
Inserting and Modifying Dynamic Blocks . . . . .	94
Extracting Properties and Values from a Block Reference . . . . .	95
<b>Chapter 4 • Manipulating the Drawing Environment . . . . .</b>	<b>99</b>
Getting Started with Drawing-Environment Customization . . . . .	99
Customizing the AutoCAD Startup Process . . . . .	100
Specifying Application Preferences . . . . .	104
Customizing the Elements in the Drawing Window . . . . .	107
Configuring Command and Dynamic Input . . . . .	109
Command Input Search Options . . . . .	109
Command Input History . . . . .	110
Dynamic Input . . . . .	111
Creating and Modifying Command Aliases . . . . .	113

Defining Command Aliases . . . . .	113
Defining External Commands (Windows Only) . . . . .	115
Adding Synonym and AutoCorrect Entries (Windows Only) . . . . .	116
Working with System and Environment Variables . . . . .	117
Listing and Editing System Variables . . . . .	118
Listing and Editing Environment Variables . . . . .	119

## **Chapter 5 • Customizing the AutoCAD User Interface**

### **for Windows . . . . . 121**

Getting Started with the CUI Editor . . . . .	121
Creating Commands and Defining Command Macros . . . . .	123
Understanding the Basics of a Command Macro . . . . .	123
Creating and Modifying Commands . . . . .	128
Creating and Assigning an Image to a Command . . . . .	130
Customizing User-Interface Elements . . . . .	133
Quick Access Toolbar . . . . .	133
Ribbon . . . . .	137
Pull-Down Menus . . . . .	145
Shortcut Menus . . . . .	147
Toolbars . . . . .	150
Shortcut and Temporary Override Keys . . . . .	152
Double-Click Actions . . . . .	154
Other Elements . . . . .	156
Setting Up Rollover Tooltips and the Quick Properties Palette . . . . .	157
Organizing the User Interface with Workspaces . . . . .	159
Working with Customization Files . . . . .	162
Creating CUIx Files . . . . .	162
Loading CUIx Files . . . . .	163
Transferring User-Interface Elements between CUIx Files . . . . .	164
Loading AutoLISP Files . . . . .	164
Controlling the Tools on the Status Bars . . . . .	164

## **Chapter 6 • Customizing the AutoCAD User Interface**

### **for Mac . . . . . 167**

Getting Started with the Customize Dialog Box . . . . .	167
Creating Commands and Defining Command Macros . . . . .	168
Understanding the Basics of a Command Macro . . . . .	168
Creating and Modifying Commands . . . . .	173
Assigning an Image to a Command . . . . .	174
Customizing User-Interface Elements . . . . .	175
Pull-Down Menus . . . . .	176
Toolsets . . . . .	178
Controlling the Tools on the Status Bar . . . . .	181

<b>Chapter 7 • Creating Tools and Tool Palettes. . . . .</b>	<b>183</b>
What Is a Tool Palette? . . . . .	183
Using the Tool Palettes Window . . . . .	184
Defining Tool Palettes . . . . .	186
Creating a Tool Palette . . . . .	186
Modifying Tool Palettes . . . . .	187
Adding and Modifying Tools . . . . .	188
Creating a Tool . . . . .	189
Using a Tool . . . . .	196
Modifying Tools . . . . .	197
Adding Text Labels or Separators . . . . .	198
Organizing Tool Palettes with Tool-Palette Groups . . . . .	198
Sharing Tool Palettes and Tool-Palette Groups . . . . .	200
<b>Chapter 8 • Automating Repetitive Tasks . . . . .</b>	<b>201</b>
Creating and Running Scripts . . . . .	201
What Is a Script? . . . . .	202
Creating a Script . . . . .	206
Running a Script . . . . .	208
Recording Action Macros (Windows Only) . . . . .	209
What Is an Action? . . . . .	209
Using the Action Recorder . . . . .	210
Recording Actions for Playback . . . . .	211
Modifying Action Macros . . . . .	215
Managing Action Macros . . . . .	217
Sharing and Specifying Paths for Action Macros . . . . .	218
<b>Chapter 9 • Defining Shapes, Linetypes, and Hatch Patterns . . . . .</b>	<b>221</b>
Creating and Compiling Shapes . . . . .	221
Structure of a Shape . . . . .	221
Defining a Shape . . . . .	228
Compiling a Shape . . . . .	229
Loading and Inserting a Shape . . . . .	229
Defining a Font . . . . .	230
Creating and Using Custom Linetypes . . . . .	231
Structure of a Linetype . . . . .	232
Defining a Custom Linetype . . . . .	235
Loading a Custom Linetype . . . . .	237
Controlling the Display of Linetypes . . . . .	238
Creating and Applying Custom Hatch Patterns . . . . .	239
Structure of a Hatch Pattern . . . . .	240
Defining a Custom Hatch Pattern . . . . .	243
Using a Custom Hatch Pattern . . . . .	245

<b>Chapter 10 • Using, Loading, and Managing Custom Files</b> .....	<b>249</b>
Deploying Your Custom Files .....	249
Organizing Your Customized Files .....	250
Where to Place Customized Files .....	250
Maintaining Files Offline .....	251
Customizing the Folders Used by AutoCAD .....	252
Using and Loading Custom Programs .....	254
What Are Custom Programs? .....	254
Loading a Custom Program .....	256
Locating Custom Programs on the Internet .....	258
Backing Up and Migrating Customization .....	259

## **Part II • AutoLISP: Productivity through Programming** .....

<b>Chapter 11 • Quick Start for New AutoLISP Programmers</b> .....	<b>263</b>
Working with AutoLISP Expressions .....	263
Working with Commands and Input .....	265
Conditionalizing and Repeating Expressions .....	267
Grouping Expressions .....	269
Storing and Loading AutoLISP Expressions .....	271
<b>Chapter 12 • Understanding AutoLISP</b> .....	<b>277</b>
Getting Started with AutoLISP .....	277
Understanding the Syntax of an Expression .....	278
Executing Expressions .....	280
Accessing the AutoLISP Documentation .....	281
Storing and Retrieving Values .....	281
Setting and Using Variables .....	283
Working with System Variables .....	287
Accessing Environment Variables .....	288
Exploring Data Types .....	290
Leveraging AutoCAD and Third-Party Commands .....	292
Using the <i>command</i> Function .....	293
Using the <i>command-s</i> Function .....	294
Working with Commands That Display a Dialog Box .....	295
Defining and Using Custom Functions .....	295
Defining a Custom Function .....	296
Using a Custom Function .....	297
Example: Drawing a Rectangle .....	298
<b>Chapter 13 • Calculating and Working with Values</b> .....	<b>301</b>
Calculating Values with Math Functions .....	301
Performing Basic Math Calculations .....	301
Performing Advanced Math Calculations .....	305
Working with Bitwise Operations .....	306

Manipulating Strings .....	310
Concatenating Strings .....	311
Getting the Length of and Searching for Strings .....	311
Replacing and Trimming Strings .....	313
Changing the Case of a String .....	317
Evaluating Values to Strings .....	318
Converting Data Types .....	319
Converting Numeric Values to Strings .....	319
Converting Strings to Numeric Values .....	320
Converting Numeric Values to Other Number Types .....	322
Returning a Value from a Custom Function .....	323
Exercise: Drawing a Rectangle (Revisited) .....	325
Creating the <i>drawplate.lsp</i> File .....	326
Revising the <i>drawplate</i> Function .....	327
Adding the Revised <i>drawplate</i> Function to <i>drawplate.lsp</i> .....	328
Creating the <i>utility.lsp</i> File .....	329
Loading the LSP Files into AutoCAD .....	330
<b>Chapter 14 • Working with Lists .....</b>	<b>333</b>
What Are Lists? .....	333
Creating a List .....	335
Getting an Element from a List .....	336
Retrieving a Specific Element .....	337
Stepping Through a List .....	340
Appending, Substituting, and Removing Elements .....	341
Appending Elements .....	341
Substituting Elements .....	343
Removing Elements .....	343
Determining Whether an Item Exists in a List .....	344
Sorting the Elements of a List .....	346
Using Point Lists to Calculate Geometric Values .....	346
Measuring Angular and Distance Values .....	347
Calculating Points .....	348
Finding and Snapping to Points .....	348
Translating Points .....	350
Converting Measurement Units .....	350
Accessing the AutoCAD Calculator .....	351
Converting Lists to Strings and Strings to Lists .....	352
Exercise: Adding Holes to the Plate .....	352
Defining the New <i>Get-Sysvars</i> and <i>Set-Sysvars</i> Utility Functions .....	353
Defining the New <i>createcircle</i> Utility Function .....	355
Revising the <i>drawplate</i> Function .....	356
Using the Revised <i>drawplate</i> Function .....	357

<b>Chapter 15 • Requesting Input and Using Conditional and Looping Expressions</b> . . . . .	<b>359</b>
Interacting with the User . . . . .	359
Requesting Input at the Command Prompt . . . . .	360
Providing Feedback to the User . . . . .	375
Working with the Graphics Windows . . . . .	380
Conditionalizing and Branching Expressions . . . . .	382
Comparing Values . . . . .	382
Grouping Comparisons . . . . .	388
Validating Values . . . . .	388
Evaluating if a Condition Is Met . . . . .	389
Testing Multiple Conditions . . . . .	391
Repeating and Looping Expressions . . . . .	393
Repeating Expressions a Set Number of Times . . . . .	394
Performing a Task While a Condition Is Met . . . . .	395
Exercise: Getting Input from the User to Draw the Plate . . . . .	399
Revising the <i>drawplate</i> Function . . . . .	399
Using the Revised <i>drawplate</i> Function . . . . .	402
<b>Chapter 16 • Creating and Modifying Graphical Objects</b> . . . . .	<b>405</b>
Working with Entity Names and Dotted Pairs . . . . .	405
Creating a Dotted Pair . . . . .	407
Accessing the Elements of an Entity Data List and Dotted Pair . . . . .	408
Adding Objects to a Drawing . . . . .	409
Selecting Objects . . . . .	414
Selecting an Individual Object . . . . .	414
Working with Selection Sets . . . . .	416
Filtering Selected Objects . . . . .	422
Modifying Objects . . . . .	423
Listing and Changing the Properties of an Object Directly . . . . .	424
Updating an Object's Properties with an Entity Data List . . . . .	430
Deleting an Object . . . . .	433
Highlighting Objects . . . . .	434
Working with Complex Objects . . . . .	435
Creating and Modifying Polylines . . . . .	435
Creating and Modifying with Block References . . . . .	438
Extending an Object's Information . . . . .	442
Working with XData . . . . .	442
Defining and Registering an Application Name . . . . .	443
Attaching XData to an Object . . . . .	443
Querying and Modifying the XData Attached to an Object . . . . .	446
Removing XData from an Object . . . . .	448
Selecting Objects Based on XData . . . . .	448
Exercise: Creating, Querying, and Modifying Objects . . . . .	449
Revising the Functions in <i>utility.lsp</i> . . . . .	449
Testing the Changes to the <i>drawplate</i> Function . . . . .	450

Defining the New *Get-DXF-Value* and *Set-DXF-Value* Utility Functions . . . . . 451  
 Moving Objects to Correct Layers . . . . . 452  
 Creating a Basic Block Attribute Extraction Program . . . . . 454  
 Using the Functions in the *furntools.lsp* File . . . . . 458

**Chapter 17 • Creating and Modifying Nongraphical Objects . . . . . 461**

Working with Symbol Tables . . . . . 461  
     Accessing and Stepping through Symbol Tables . . . . . 462  
     Adding and Modifying Entries in a Symbol Table . . . . . 464  
     Creating and Modifying Block Definitions . . . . . 470  
 Working with Dictionaries . . . . . 472  
     Accessing and Stepping through Dictionaries . . . . . 472  
     Creating a Custom Dictionary . . . . . 475  
     Storing Information in a Custom Dictionary . . . . . 477  
     Managing Custom Dictionaries and Entries . . . . . 477  
 Exercise: Creating and Incrementing Room Labels . . . . . 478  
     Revising the *createlayer* Function in *utility.lsp* . . . . . 479  
     Creating the Room Label Block Definition . . . . . 479  
     Inserting a Block Reference Based on the Room Label  
         Block Definition . . . . . 481  
         Prompting the User for an Insertion Point and Room Number . . . . . 484  
         Adding Room Labels to a Drawing . . . . . 486

**Chapter 18 • Working with the Operating System  
 and External Files . . . . . 489**

Storing Information in the Windows Registry or a Plist File . . . . . 489  
     Creating and Querying Entries . . . . . 490  
     Editing and Removing Entries . . . . . 492  
 Accessing Data from External Files . . . . . 493  
     Opening and Creating an External File . . . . . 493  
     Reading Characters and Lines from a File . . . . . 496  
     Writing Characters and Lines from a File . . . . . 497  
     Closing an Open File . . . . . 498  
 Working with Directories and Files in the Operating System . . . . . 499  
     Locating and Listing Files and Directories . . . . . 499  
     Managing Files and Directories . . . . . 505  
     Getting Information about a File . . . . . 506  
 Exercise: Reading and Writing Data . . . . . 506  
     Creating Layers Based on Data Stored in an External File . . . . . 507  
     Adding Layers to a Drawing with the *loadlayers* Function . . . . . 509  
     Writing the Bill of Materials to an External File . . . . . 510  
     Using the *furnbomexport* Function . . . . . 511

<b>Chapter 19 • Catching and Handling Errors</b> .....	<b>513</b>
Identifying and Tracking Down Errors .....	513
Putting Your Code Under the Microscope .....	514
Displaying Messages During Execution .....	516
Tracing Functions .....	521
Catching Errors in a Program .....	522
Defining and Using a Custom Error Handler .....	524
Grouping Functions into a Single Undo Action .....	525
Exercise: Handling Errors in the <i>drawplate</i> Function .....	528
Using the <i>drawplate</i> Function .....	529
Implementing a Custom *error* Handler and Undo Grouping .....	530
Testing the Changes to the <i>drawplate</i> Function .....	531
<b>Chapter 20 • Authoring, Managing, and Loading</b>	
<b>AutoLISP Programs</b> .....	<b>533</b>
Storing AutoLISP Expressions .....	533
Selecting an Editing Environment .....	534
Creating an AutoLISP File .....	534
Editing an AutoLISP File .....	536
Writing Modular Code .....	537
Adding Comments .....	538
Undefined and Redefining Standard AutoCAD Commands .....	541
Defining a Startup Function .....	542
Loading AutoLISP Files .....	543
Manually Loading an AutoLISP File .....	543
Automatically Loading an AutoLISP File .....	544
Using the Load/Unload Applications Dialog Box to Load a LSP File .....	546
Managing the Locations of AutoLISP Files .....	549
Specifying Support File Search Paths .....	549
Identifying Trusted Locations .....	551
Deploying AutoLISP Files .....	553
Deployment Methods (Local vs. External) .....	554
Defining a Plug-in Bundle .....	556
Implementing Help for Custom Functions .....	558
Exercise: Deploying the <i>drawplate</i> Function .....	560
Loading the <i>utility.lsp</i> File by Reference .....	560
Loading the <i>drawplate.lsp</i> File on Demand .....	561
Enabling Help Support for the <i>drawplate</i> Function .....	561
Configuring the AutoCAD Support and Trusted Paths .....	562
Testing the Deployment of the <i>drawplate</i> Function .....	563
Creating <i>DrawPlate.bundle</i> .....	564
Deploying and Testing the <i>DrawPlate.bundle</i> .....	565

**Chapter 21 • Using the Visual LISP Editor (Windows only) . . . . . 567**

Accessing the Visual LISP Editor . . . . . 567

Managing AutoLISP Files with the Visual LISP Editor . . . . . 568

Formatting an AutoLISP File . . . . . 569

    Coloring Syntax . . . . . 570

    Formatting Code . . . . . 571

    Commenting Code . . . . . 572

Validating and Debugging Code . . . . . 572

    Executing Code from the Visual LISP Editor . . . . . 572

    Checking and Loading Code in the Current Editor Window . . . . . 573

    Debugging Code . . . . . 575

Creating a Visual LISP Project . . . . . 577

Compiling LSP and PRJ Files into a VLX File . . . . . 579

Exercise: Working with the Visual LISP Editor . . . . . 580

    Formatting, Checking, and Debugging the *badcode* Function . . . . . 580

    Stepping Through and Inspecting the *badcode* Function . . . . . 582

    Creating and Compiling a Project . . . . . 585

**Chapter 22 • Working with ActiveX/COM Libraries (Windows only) . . . . . 587**

Understanding the Basics of ActiveX . . . . . 587

    Accessing Classes, Objects, and Collections . . . . . 588

    Specifying Properties and Invoking Methods . . . . . 591

    Working with Variants and Arrays . . . . . 594

Importing COM Libraries . . . . . 598

Using the AutoCAD COM Library . . . . . 599

    Accessing the AutoCAD Application and Current Drawing Objects . . . . . 600

    Working with Graphical and Nongraphical Objects in the Current Drawing . . . . . 601

    Monitoring Events with Reactors . . . . . 604

Leveraging the Windows and Microsoft Office COM Libraries . . . . . 606

    Accessing the Windows Shell Object . . . . . 607

    Working with Microsoft Office . . . . . 609

**Chapter 23 • Implementing Dialog Boxes (Windows only) . . . . . 611**

What Is Dialog Control Language? . . . . . 611

Defining and Laying Out a Dialog Box . . . . . 613

    Defining a Dialog . . . . . 613

    Adding Tiles . . . . . 614

    Grouping, Aligning, and Laying Out Tiles . . . . . 618

    Creating and Previewing a Dialog in a DCL File . . . . . 622

Loading and Displaying a Dialog Box . . . . . 624

    Loading and Unloading a DCL File . . . . . 624

    Displaying a Dialog . . . . . 625

    Initializing Tiles . . . . . 627

Interacting with and Responding to a User . . . . .	631
Specifying the Action of a Tile . . . . .	631
Getting Information about a Tile . . . . .	632
Terminating or Closing a Dialog Box . . . . .	633
Hiding a Dialog Box Temporarily . . . . .	634
Exercise: Implementing a Dialog Box for the <i>drawplate</i> Function. . . . .	635
Creating the <i>drawplate</i> Dialog Box . . . . .	636
Renaming the Existing <i>drawplate</i> Function. . . . .	638
Defining a New <i>drawplate</i> Function . . . . .	638
Testing the <i>drawplate.lsp</i> Changes. . . . .	641

**Part III • AutoCAD VBA: Programming with VBA and ActiveX (Windows only) . . . . . 643**

**Chapter 24 • Understanding the AutoCAD VBA Environment . . . . . 645**

What Makes Up an AutoCAD VBA Project? . . . . .	645
What You'll Need to Start . . . . .	647
Determine If the AutoCAD VBA Environment Is Installed . . . . .	647
Install the AutoCAD 2015 VBA Enabler . . . . .	648
Getting Started with the VBA Editor . . . . .	648
Identifying the Components of a VBA Project. . . . .	649
Navigating the VBA Editor Interface. . . . .	651
Setting the VBA Environment Options. . . . .	655
Managing VBA Programs . . . . .	655
Creating a New VBA Project. . . . .	656
Saving a VBA Project . . . . .	657
Loading and Unloading a VBA Project. . . . .	657
Embedding or Extracting a VBA Project. . . . .	659
Executing VBA Macros . . . . .	660
Accessing the AutoCAD VBA Documentation. . . . .	663

**Chapter 25 • Understanding Visual Basic for Applications . . . . . 665**

Learning the Fundamentals of the VBA Language . . . . .	665
Creating a Procedure . . . . .	666
Declaring and Using Variables. . . . .	668
Controlling the Scope of a Procedure or Variable . . . . .	670
Continuing Long Statements . . . . .	671
Adding Comments . . . . .	672
Understanding the Differences Between VBA 32- and 64-Bit . . . . .	673
Exploring Data Types . . . . .	674
Working with Objects . . . . .	676
Accessing Objects in a Collection. . . . .	678
Storing Data in Arrays . . . . .	679
Calculating Values with Math Functions and Operators. . . . .	682
Manipulating Strings. . . . .	683
Converting Between Data Types . . . . .	686

Comparing Values . . . . . 688  
     Testing Values for Equality . . . . . 688  
     Comparing String Values . . . . . 689  
     Determining If a Value Is Greater or Less Than Another . . . . . 690  
     Checking for Null, Empty, or Nothing Values . . . . . 691  
     Validating Values . . . . . 692  
     Grouping Comparisons . . . . . 692  
 Conditionalizing and Branching Statements . . . . . 693  
     Evaluating If a Condition Is Met . . . . . 693  
     Testing Multiple Conditions . . . . . 695  
 Repeating and Looping Expressions . . . . . 696  
     Repeating Expressions a Set Number of Times . . . . . 696  
     Stepping Through an Array or Collection . . . . . 697  
     Performing a Task While or Until a Condition Is Met . . . . . 698

**Chapter 26 • Interacting with the Application and Documents Objects . . . . . 701**

Working with the Application . . . . . 701  
     Getting Information about the Current AutoCAD Session . . . . . 702  
     Manipulating the Placement of the Application Window . . . . . 703  
 Managing Documents . . . . . 704  
     Working with the Current Drawing . . . . . 705  
     Creating and Opening Drawings . . . . . 705  
     Saving and Closing Drawings . . . . . 707  
     Accessing Information about a Drawing . . . . . 710  
     Manipulating a Drawing Window . . . . . 711  
 Working with System Variables . . . . . 712  
 Querying and Setting Application and Document Preferences . . . . . 714  
 Executing Commands . . . . . 715  
 Exercise: Setting Up a Project . . . . . 716  
     Creating the *DrawingSetup* Project . . . . . 717  
     Creating and Saving a New Drawing from Scratch . . . . . 718  
     Inserting a Title Block with the *insert* Command . . . . . 720  
     Adding Drawing Properties . . . . . 722  
     Setting the Values of Drafting-Related System Variables and Preferences . . . . . 724

**Chapter 27 • Creating and Modifying Drawing Objects . . . . . 727**

Understanding the Basics of a Drawing-Based Object . . . . . 727  
 Accessing Objects in a Drawing . . . . . 732  
 Working with Model or Paper Space . . . . . 733  
 Creating Graphical Objects . . . . . 735  
     Adding Straight Line Segments . . . . . 735  
     Working with Curved Objects . . . . . 736  
     Working with Polylines . . . . . 740

Getting an Object in the Drawing . . . . .	743
Modifying Objects . . . . .	745
Deleting Objects . . . . .	746
Copying and Moving Objects . . . . .	746
Rotating Objects . . . . .	747
Changing Object Properties . . . . .	748
Exercise: Creating, Querying, and Modifying Objects . . . . .	749
Creating the <i>DrawPlate</i> Project . . . . .	749
Creating the Utilities Class . . . . .	750
Defining the <i>CLI_DrawPlate</i> Function . . . . .	752
Running the <i>CLI_DrawPlate</i> Function . . . . .	754
Exporting the Utilities Class . . . . .	755

## **Chapter 28 • Interacting with the User and Controlling**

<b>the Current View . . . . .</b>	<b>757</b>
Interacting with the User . . . . .	757
Requesting Input at the Command Prompt . . . . .	758
Providing Feedback to the User . . . . .	769
Selecting Objects . . . . .	771
Selecting an Individual Object . . . . .	771
Working with Selection Sets . . . . .	773
Filtering Objects . . . . .	776
Performing Geometric Calculations . . . . .	778
Calculating a Coordinate Value . . . . .	778
Measuring the Distance Between Two Points . . . . .	779
Calculating an Angle . . . . .	780
Changing the Current View . . . . .	781
Zooming and Panning the Current View . . . . .	781
Working with Model Space Viewports . . . . .	783
Creating and Managing Named Views . . . . .	786
Applying Visual Styles . . . . .	787
Exercise: Getting Input from the User to Draw the Plate . . . . .	787
Revising the <i>CLI_DrawPlate</i> Function . . . . .	788
Revising the <i>Utilities</i> Class . . . . .	791
Using the Revised <i>drawplate</i> Function . . . . .	793

## **Chapter 29 • Annotating Objects . . . . . 795**

Working with Text . . . . .	795
Creating and Modifying Text . . . . .	795
Formatting a Text String . . . . .	797
Controlling Text with Text Styles . . . . .	800
Dimensioning Objects . . . . .	802
Creating Dimensions . . . . .	802
Formatting Dimensions with Styles . . . . .	804
Assigning a Dimension Style . . . . .	806

Creating and Modifying Geometric Tolerances . . . . .	807
Adding Leaders . . . . .	808
Working with Multileaders . . . . .	808
Creating and Modifying Legacy Leaders . . . . .	811
Organizing Data with Tables . . . . .	812
Inserting and Modifying a Table . . . . .	812
Formatting Tables . . . . .	813
Assigning a Table Style . . . . .	814
Creating Fields . . . . .	814
Exercise: Adding a Label to the Plate . . . . .	815
Revising the <i>CLI_DrawPlate</i> Function . . . . .	815
Revising the <i>Utilities</i> Class . . . . .	817
Using the Revised <i>drawplate</i> Function . . . . .	817
<b>Chapter 30 • Working with Blocks and External References . . . . .</b>	<b>819</b>
Managing Block Definitions . . . . .	819
Creating a Block Definition . . . . .	820
Adding Attribute Definitions . . . . .	822
Modifying and Redefining a Block Definition . . . . .	825
Determining the Type of Block Definition . . . . .	826
Inserting and Working with Block References . . . . .	827
Inserting a Block Reference . . . . .	827
Modifying a Block Reference . . . . .	828
Accessing the Attributes of a Block . . . . .	831
Working with Dynamic Properties . . . . .	833
Managing External References . . . . .	836
Working with Xrefs . . . . .	836
Attaching and Modifying Raster Images . . . . .	841
Working with Underlays . . . . .	843
Listing File Dependencies . . . . .	845
Exercise: Creating and Querying Blocks . . . . .	846
Creating the <i>RoomLabel</i> Project . . . . .	847
Creating the <i>RoomLabel</i> Block Definition . . . . .	847
Inserting a Block Reference Based on the <i>RoomLabel</i> Block Definition . . . . .	849
Prompting the User for an Insertion Point and a Room Number . . . . .	850
Adding Room Labels to a Drawing . . . . .	852
Creating the <i>FurnTools</i> Project . . . . .	853
Moving Objects to Correct Layers . . . . .	854
Creating a Basic Block Attribute Extraction Program . . . . .	856
Using the Procedures of the <i>FurnTools</i> Project . . . . .	863
<b>Chapter 31 • Outputting Drawings . . . . .</b>	<b>865</b>
Creating and Managing Layouts . . . . .	865
Creating a Layout . . . . .	866
Working with a Layout . . . . .	866
Controlling the Display of Layout Tabs . . . . .	867

Displaying Model Space Objects with Viewports . . . . .	867
Adding a Floating Viewport . . . . .	868
Setting a Viewport as Current . . . . .	869
Modifying a Floating Viewport . . . . .	869
Controlling the Output of a Layout . . . . .	872
Creating and Managing Named Page Setups . . . . .	873
Specifying an Output Device and a Paper Size . . . . .	873
Setting a Plot Style as Current . . . . .	876
Defining the Area to Output . . . . .	878
Changing Other Related Output Settings . . . . .	879
Plotting and Previewing a Layout . . . . .	879
Exporting and Importing File Formats . . . . .	881
Exercise: Adding a Layout to Create a Check Plot . . . . .	882
Creating the Layout . . . . .	883
Adding and Modifying a Plot Configuration . . . . .	884
Inserting a Title Block . . . . .	885
Displaying Model Space Objects with a Viewport . . . . .	886
Putting It All Together . . . . .	886
Testing the CheckPlot Procedure . . . . .	890
<b>Chapter 32 • Storing and Retrieving Custom Data . . . . .</b>	<b>891</b>
Extending Object Information . . . . .	891
Working with Xdata . . . . .	892
Defining and Registering an Application Name . . . . .	893
Attaching Xdata to an Object . . . . .	893
Querying and Modifying the Xdata Attached to an Object . . . . .	896
Removing Xdata from an Object . . . . .	902
Selecting Objects Based on Xdata . . . . .	902
Creating and Modifying a Custom Dictionary . . . . .	903
Accessing and Stepping through Dictionaries . . . . .	904
Creating a Custom Dictionary . . . . .	906
Storing Information in a Custom Dictionary . . . . .	907
Managing Custom Dictionaries and Entries . . . . .	908
Storing Information in the Windows Registry . . . . .	909
Creating and Querying Keys and Values . . . . .	909
Editing and Removing Keys and Values . . . . .	911
Exercise: Storing Custom Values for the Room Labels Program . . . . .	912
Attaching Xdata to the Room Label Block after Insertion . . . . .	913
Revising the Main <i>RoomLabel</i> Procedure to Use the Windows Registry . . . . .	913
Testing the Changes to the <i>RoomLabel</i> Procedure . . . . .	916
Persisting Values for the Room Label Procedure with a Custom Dictionary . . . . .	917
Retesting the <i>RoomLabel</i> Procedure . . . . .	919
Selecting Room Label Blocks . . . . .	920

**Chapter 33 • Modifying the Application and Working with Events . . . . . 923**

- Manipulating the AutoCAD User Interface . . . . . 923
  - Managing Menu Groups and Loading Customization Files . . . . . 924
  - Working with the Pull-Down Menus and Toolbars . . . . . 925
  - Controlling the Display of Other User-Interface Elements . . . . . 937
- Using External Custom Programs . . . . . 938
- Working with Events . . . . . 939
- Exercise: Extending the User Interface and Using Events . . . . . 944
  - Loading the *acp.cuix* File . . . . . 945
  - Specifying the Location of DVB Files . . . . . 946
  - Adding the Document Events . . . . . 947
  - Implementing an Application Event . . . . . 948
  - Defining the *AcadStartup* Procedure . . . . . 949
  - Testing the *AcadStartup* Procedure . . . . . 950
  - Testing the Application and Document Events . . . . . 951

**Chapter 34 • Creating and Displaying User Forms . . . . . 953**

- Adding and Designing a User Form . . . . . 953
  - Adding a User Form to a VBA Project . . . . . 953
  - Considering the Design of a User Form . . . . . 954
- Placing and Arranging Controls on a User Form . . . . . 956
  - Placing a Control on a User Form . . . . . 956
  - Deciding Which Control to Use . . . . . 957
  - Grouping Related Controls . . . . . 960
  - Managing Controls on a User Form . . . . . 961
- Changing the Appearance of a User Form or Control . . . . . 963
- Defining the Behavior of a User Form or Control . . . . . 965
- Displaying and Loading a User Form . . . . . 968
  - Showing and Hiding a User Form . . . . . 968
  - Loading and Unloading a User Form . . . . . 969
- Exercise: Implementing a User Form for the *DrawPlate* Project . . . . . 970
  - Adding the User Form . . . . . 970
  - Adding Controls to the User Form . . . . . 971
  - Displaying a User Form . . . . . 974
  - Implementing Events for a User Form and Controls . . . . . 975
  - Testing the User Form and Controls . . . . . 980

**Chapter 35 • Communicating with Other Applications . . . . . 983**

- Referencing a Programming Library . . . . . 983
- Creating and Getting an Instance of an Object . . . . . 984
  - Creating a New Instance of an Object . . . . . 985
  - Getting an In-Memory Instance of an Object . . . . . 988
- Accessing a Drawing File from outside of AutoCAD . . . . . 990
- Working with Microsoft Windows . . . . . 991
