## About the Authors

---

**Adam Jorgensen** ([www.adamjorgensen.com](http://www.adamjorgensen.com)), lead author for this edition of the SQL Server 2012 Bible, is the president of Pragmatic Works Consulting ([www.pragmaticworks.com](http://www.pragmaticworks.com)); a director for the Professional Association of SQL Server (PASS) ([www.sqlpass.org](http://www.sqlpass.org)); a SQL Server MVP; and a well-known speaker, author, and executive mentor. His focus is on helping companies realize their full potential by using their data in ways they may not have previously imagined. Adam is involved in the community, delivering more than 75 community sessions per year. He is based in Jacksonville, FL, and has written and contributed to five previous books on SQL Server, analytics, and SharePoint. Adam rewrote or updated the following chapters: 1, 53, 54, and 57.

**Jose Chinchilla** is a Microsoft Certified Professional with dual MCITP certifications on SQL Server Database Administration and Business Intelligence Development. His career focus has been in Database Modeling, Data Warehouse and ETL Architecture, OLAP Cube Development, Master Data Management, and Data Quality Frameworks. He is the founder and CEO of Agile Bay, Inc., and serves as president of the Tampa Bay Business Intelligence User Group. Jose is a frequent speaker, avid networker, syndicated blogger ([www.sqljoe.com](http://www.sqljoe.com)), and social networker and can be reached via twitter under the @SQLJoe handle or LinkedIn at [www.linkedin.com/in/josechinchilla](http://www.linkedin.com/in/josechinchilla). He rewrote or updated the following chapters: 3, 24, 25, 29, 32, 33, 43, 58, and 59.

**Patrick LeBlanc**, former SQL Server MVP, is currently a SQL Server and BI Technical Specialist for Microsoft. He has worked as a SQL Server DBA for the past 9 years. His experience includes working in the educational, advertising, mortgage, medical, and financial industries. He is also the founder of [TSQLScripts.com](http://TSQLScripts.com), [SQLLunch.com](http://SQLLunch.com), and the president of the Baton Rouge Area SQL Server User Group. Patrick rewrote or updated the following chapters: 6, 7, 8, 10, 11, 12, 28, 48, 49, and 51.

**Aaron Nelson** is a SQL Server Architect with more than 10 years' experience in architecture, Business Intelligence, development, and performance tuning. He has the distinction of being a second-generation DBA, having learned the family business at his father's knee. Aaron is the chapter leader for the PowerShell Virtual Chapter of PASS and volunteers for Atlanta MDF, the Atlanta PowerShell User Group, and SQL Saturday. He blogs at <http://sqlvariant.com> and can be found on Twitter as @SQLvariant. He loves walking on the beach, winding people up, and falling out of kayaks with his beautiful daughter, Dorothy. When Aaron is not busy traveling to PASS or Microsoft events, he can usually be found somewhere near Atlanta, GA. Aaron rewrote or updated the following chapters: 9, 30, 36, 37, 38, 41, and 42.

## About the Authors

---

**Jorge Segarra** is currently a DBA consultant for Pragmatic Works and a SQL Server MVP. He also authored *SQL Server 2008 Pro Policy-Based Management* (APress, 2010). Jorge has been an active member of the SQL Server community for the last few years and is a regular presenter at events such as webinars, user groups, SQLSaturdays, SQLRally, and PASS Summit. He founded SQL University, a free community-based resource aimed at teaching people SQL Server from the ground up. SQL University can be found online at <http://sqluniversity.org>. Jorge also blogs at his own site <http://sqlchicken.com> and can be found on Twitter as @sqlchicken. He rewrote or updated the following chapters: 4, 5, 19, 20, 21, 22, 23, 26, 27, and 50.

## About the Contributors

---

**Tim Chapman** is a Dedicated Support Engineer in Premier Field Engineering at Microsoft where he specializes in database architecture and performance tuning. Before coming to Microsoft, Tim Chapman was a database architect for a large financial institution and a consultant for many years. Tim enjoys blogging, teaching and speaking at PASS events, and participated in writing the second SQL Server MVP Deep Dives book. Tim graduated with a bachelor's degree in Information Systems from Indiana University. Tim rewrote or updated chapters 39, 40, 44, 45, 46, and 47.

**Audrey Hammonds** is a database developer, blogger, presenter, and writer. Fifteen years ago, she volunteered to join a newly formed database team so that she could stop writing COBOL. (And she never wrote COBOL again.) Audrey is convinced that the world would be a better place if people would stop, relax, enjoy the view, and normalize their data. She's the wife of Jeremy; mom of Chase and Gavin; and adoptive mother to her cats, Bela, Elmindreda, and Aviendha. She blogs at <http://datachix.com> and is based in Atlanta, Georgia. Audrey rewrote or updated the following chapters: 2, 16, 17, and 18.

**Scott Klein** is a Technical Evangelist for Microsoft, focusing on Windows Azure SQL Database (formerly known as SQL Azure). He has over 20 years working with SQL Server, and he caught the cloud vision when he was introduced to the Azure platform. Scott's background includes co-owning an Azure consulting business and providing consulting services to companies large and small. He speaks frequently at conferences world-wide as well as community events, such as SQL Saturday events and local user groups. Scott has authored a half-dozen books for both Wrox and APress, and co-authored the book *Professional SQL Azure* (APress, 2010). Scott is also the founder of the South Florida Geek Golf charity golf tournament, which has helped raise thousands of dollars for charities across South Florida, even though he can't play golf at all. As much as he loves SQL Server and Windows Azure, Scott also enjoys spending time with his family and looks forward to getting back to real camping in the Pacific Northwest. Scott rewrote or updated the following chapters: 13, 14, 15, and 31.

**David Liebman** is a developer specializing in .Net, SQL, and SSRS development for more than 5 of the 18 years he has spent in the IT industry, working for some big companies in financial, healthcare, and insurance sectors. Dave has written some custom reporting solutions and web applications for large companies in the Tampa Bay area using .NET, SSRS, and SQL. He is currently a senior developer at AgileThought located in Tampa, FL. Dave rewrote or updated the content in the following chapters: 34 and 35.

**Julie Smith** has spent the last 12 years moving data using various tools, mostly with SQL Server 2000–2012. She is an MCTS in SQL Server 2008 BI, and a Business Intelligence Consultant at Innovative Architects in Atlanta, GA. She is a co-founder of <http://Datachix.com>, where she can be reached. With the help of MGT (Mountain Dew, Gummy Bears, and Tic Tacs), she revised and updated the following chapters: 52, 55, and 56. She dedicates her effort on this book to her husband, Ken.

## About the Technical Editors

---

**Kathi Kellenberger** is a Senior Consultant with Pragmatic Works. She enjoys speaking and writing about SQL Server and has worked with SQL Server since 1997. In her spare time, Kathi enjoys spending time with friends and family, running, and singing.

**Bradley Schact** is a consultant at Pragmatic Works in Jacksonville, FL and an author on the book *SharePoint 2010 Business Intelligence 24-Hour Trainer* (Wrox, 2012). Bradley has experience on many parts of the Microsoft BI platform. He frequently speaks at events like SQL Saturday, Code Camp, SQL Lunch, and SQL Server User Groups.

**Mark Stacey** founded Pragmatic Works South Africa, the first Pragmatic Works international franchise, and works tirelessly to cross the business/technical boundaries in Business Intelligence, working in both Sharepoint and SQL.

# Acknowledgments

*From Adam Jorgensen:*

Thank you to my team at Pragmatic Works, who are always a big part of any project like this and continue to give me the passion to see them through. I would also like to thank my furry children, Lady and Mac, for their “dogged” persistence in keeping me awake for late nights of writing. Thank you especially to the SQL Community; my fellow MVP’s; and all of you who have attended a SQL Saturday, other PASS event, spoke at a user group, or just got involved. You are the reason we have such a vibrant community, the best in technology. Keep it up; your passion and curiosity drives all of us further every day.

I want to thank my incredible author and tech editing teams. This team of community experts and professionals worked very hard to take a great book and re-invent it in the spirit of the changing landscape that we are witnessing. There were so many new features, focuses, messages, and opportunities to change the way we think, do business, and provide insight that we needed an amazing team of folks. They put up with my cat herding and hit “most” of their deadlines. Their passion for the community is tremendous, and it shines throughout this book. Thank you all from the bottom of my heart. You readers are about to see why this book was such a labor of love! A special thanks to Bob and Ami over at Wiley for their support and effort in getting this title completed. What a great team!

*From Jose Chinchilla:*

Many thanks to the team that put together this book for keeping us in line with our due dates. Thanks to my lovely family for allowing me to borrow precious time from them in order to fulfill my writing and community commitments. I also want to thank Nicholas Cain for his expert contribution to the SQL Clustering Chapter and to Michael Wells for his SQL Server deployment automation PowerShell scripts that are part of his Codeplex project named SPADE.

*From Aaron Nelson:*

Thank you to my parents, Michael & Julia Nelson. Thanks to my daughter, Dorothy Nelson, for being patient during this project. Finally, thank you to my Atlanta SQL Community members that helped me make this happen: Audrey Hammonds, Julie Smith, Rob Volk, and Tim Radney.

## Acknowledgments

---

*From Jorge Segarra:*

First and foremost I'd like to thank my wife. There's no way I would've been able to get through the long nights and weekends without her. To our amazing editors, Ami Sullivan and Robert Elliott, and the rest of the folks at Wrox/Wiley: Your tireless efforts and ability to herd A.D.D.-afflicted cats is astounding and appreciated. Thanks to Adam Jorgensen for giving me and the rest of this author team the opportunity to write on this title.

To my fellow authoring team, Adam Jorgensen, Patrick LeBlanc, Aaron Nelson, Julie Smith, Jose Chinchilla, Audrey Hammonds, Tim Chapman, and David Liebman: Thank you all for your tireless work and contributions. To the authors of the previous edition: Paul Nielsen, Mary Chipman, Scott Klein, Uttam Parui, Jacob Sebastian, Allen White, and Michael White — this book builds on the foundation you all laid down, so thank you.

One of the greatest things about being involved with SQL Server is the community around it. It really is like a big family, a SQLFamily! I'd love to name everyone here I've met (and haven't met yet!) at events or online, but I'd run out of room. Special thanks to Pam Shaw for introducing me to the community and giving me my first speaking opportunity.

Finally, huge thanks to the folks at Microsoft for putting together such an amazing product! SQL Server has grown by leaps and bounds over the years and this release is by far the most exciting. In addition to the product team, special thanks to the SQL Server MVP community, of which I'm honored and privileged to be a part.
