Contents at a Glance

■ Contents	vi
■ About the Author	xviii
■ About the Technical Reviewer	xix
■ Acknowledgments	xx
■ Introduction	xxi
Part I: Building Essential Office Skills	1
■ Chapter 1: Getting Up to Speed with the Office Applications	3
■ Chapter 2: Learning Common Tools Across the Office Suite	25
■ Chapter 3: Working with Text	81
■ Chapter 4: Using Pictures and Shapes in Your Documents	111
■ Chapter 5: Customizing Office to Suit You	143
Part II: Creating Documents with Microsoft Word	179
■ Chapter 6: Entering Text and Using Views	181
■ Chapter 7: Adding Style: Formatting Your Documents	207
■ Chapter 8: Creating Complex Documents and Layouts	247
■ Chapter 9: Creating Business Documents with Mail Merge	285
■ Chapter 10: Revising and Reviewing Documents	303
■ Chapter 11: Printing, Securing, and Sharing Documents	331
Part III: Analyzing Data with Microsoft Excel	343
■ Chapter 12: Creating Workbooks and Entering Data	345
■ Chapter 13: Formatting Your Worksheets	377
■ Chapter 14: Creating Powerful and Persuasive Charts	421
■ Chapter 15: Crunching Numbers with Formulas and Functions	451
■ Chapter 16: Creating Simple Databases and Solving Business Problems ...	479
■ Chapter 17: Manipulating Data with PivotTables	509

Part IV: Creating Presentations with Microsoft PowerPoint..... 541

- **Chapter 18: Starting to Build a Presentation in PowerPoint 543**
- **Chapter 19: Creating Clear and Compelling Slides..... 571**
- **Chapter 20: Adding Life and Interest to a Presentation 597**
- **Chapter 21: Delivering a Presentation Live or Online..... 623**

Part V: E-mailing and Organizing with Outlook 647

- **Chapter 22: Using E-mail Effectively 649**
- **Chapter 23: Keeping Your Contacts in Order 689**
- **Chapter 24: Managing Your Calendar..... 709**
- **Chapter 25: Working with Tasks and Notes 725**
- **Index..... 739**

Contents

■ Contents at a Glance.....	iv
■ About the Author	xviii
■ About the Technical Reviewer	xix
■ Acknowledgments	xx
■ Introduction.....	xxi
Part I: Building Essential Office Skills	1
■ Chapter 1: Getting Up to Speed with the Office Applications	3
Meeting the Office Applications and Learning What You Can Do with Them.....	3
Microsoft Word	4
Microsoft Excel	5
Microsoft PowerPoint.....	6
Microsoft Outlook.....	7
Understanding the Common Features of the Applications.....	8
The Title Bar and the Close, Minimize, and Zoom Buttons	9
The Toolbars	9
The Ribbon.....	11
The Status Bar	11
Opening Applications	12
Opening an Application from the Dock	12
Opening an Application from the Applications Folder.....	13
Making a Application Launch Automatically	13
Creating a Document	14
Saving a Document.....	16
Closing a Document.....	19
Opening a Document	20
Closing an Application	24
Summary	24

■ Chapter 2: earning Common Tools Across the Office Suite	25
Using the Menus, the Toolbars, and the Ribbon	25
Using the Menus	27
Using the Toolbars	28
Using the Ribbon	28
Giving Commands from the Ribbon	30
Minimizing the Ribbon	30
Using the Toolbox	31
Using the Scrapbook to Collect Items	34
Using the Reference Tools Palette to Look Up Information	35
Using the Compatibility Report Pane to Check a Document's Compatibility with Older Versions of the Application	36
Sharing a Document with Other People	38
Sending a Document via E-mail	38
Saving a Document to SkyDrive	40
Saving a Document to a SharePoint Site	41
Saving Time and Effort with AutoCorrect	43
Choosing Standard AutoCorrect Options	45
Choosing AutoFormat As You Type Options	46
Choosing Math AutoCorrect Options	51
Creating AutoCorrect Entries	53
Creating AutoCorrect Exceptions	54
Working with Smart Buttons	55
Checking Spelling and Grammar	57
Checking Spelling	57
Checking Grammar in Word and Outlook	61
Taking Control over Spelling Checks with Custom Dictionaries	71
Printing Documents	76
Printing a Full Copy of the Document Quickly	76
Printing Exactly What You Need	76
Summary	80
■ Chapter 3: Working with Text	81
Entering Text in Your Documents	81
Entering Text in Documents Using Copy and Paste	81
Entering Text by Scanning a Document and Using Optical Character Recognition	82
Entering Text by Using Speech Recognition	82
Inserting Symbols in a Document	82
Navigating with the Keyboard and Selecting Objects	87
Applying Direct Formatting to Text and Objects	88
Using Cut, Copy, and Paste	91
Using Standard Cut, Copy, and Paste in the Office Applications	91
Using Find and Replace	93
Searching Quickly with the Search Box on the Standard Toolbar	93
Locating Text with the Find Dialog Box or Advanced Find Dialog Box	94
Replacing Text with Replace	97
Creating Tables	99
Inserting a Table	99

Drawing a Table.....	102
Merging and Splitting Cells in a Table	103
Adding Content to a Table.....	103
Formatting a Table.....	104
Creating Hyperlinks.....	105
Summary	109
■ Chapter 4: Using Pictures and Shapes in Your Documents	111
Understanding How You Position Graphical Objects.....	111
Choosing Where to Insert a Graphical Object	112
Inserting Clip Art	112
Inserting a Clip Art Picture Using the Clip Art Browser	113
Inserting a Clip Art Picture Using the Clip Gallery	114
Managing Your Clip Art Items with the Clip Gallery	115
Inserting Pictures in Your Documents.....	120
Inserting Pictures from iPhoto	120
Inserting Pictures from Your Mac's File System	121
Adding and Formatting a Shape	123
Applying a Style to a Shape	126
Rotating a Graphical Object	127
Positioning a Graphical Object.....	128
Choosing Text Wrapping in Word.....	129
Making a Picture Look the Way You Want It	132
Adjusting a Picture's Sharpness, Brightness, Contrast, and Colors	132
Applying a Picture Style.....	133
Cropping a Picture	134
Saving Space by Compressing Pictures	136
Inserting SmartArt.....	137
Arranging Graphical Objects to Control Which Is Visible.....	140
Arranging Graphical Objects Using the Arrange Submenu	140
Rearranging Graphical Objects with Dynamic Reordering	141
Summary	142
■ Chapter 5: Customizing Office to Suit You.....	143
Choosing Which Toolbars to Display and How to Display Them	143
Choosing Which Toolbars to Display.....	143
Switching the Standard Toolbar Between Icons and Text and Icons Only.....	144
Undocking and Docking the Formatting Toolbar.....	144
Customizing the Toolbars and Menus in Word, Excel, and PowerPoint.....	146
Preparing to Customize the Toolbars, Menu Bars, or Menus.....	146
Finding the Commands to Add to the Toolbars or Menus.....	148
Customizing a Toolbar	149
Customizing a Menu	153
Customizing the Menu Bar.....	154
Customizing the Context Menus in PowerPoint.....	156
Creating Custom Toolbars Containing the Commands You Need	157
Resetting a Toolbar to Its Default Buttons	159
Customizing the Ribbon in Word, Excel, and PowerPoint.....	159
Opening the Ribbon Preferences Pane	159

Choosing General Options for the Ribbon	160
Choosing Which Tabs and Groups to Display.....	161
Closing the Ribbon Preferences Pane.....	161
Customizing the Toolbar in Outlook.....	162
Changing How the Buttons Appear	162
Changing Which Buttons Appear on the Toolbar	163
Creating Custom Keyboard Shortcuts in Word and Excel	164
Choosing Essential Preferences in Word, Excel, and PowerPoint.....	167
Opening the Preferences Dialog Box or Preferences Window	167
Setting Your User Name, Initials, and Address	169
Choosing Whether to Display the Gallery Dialog Box When the Application Opens.....	170
Choosing Whether to Receive Feedback with Sound	170
Choosing Whether to Confirm Launching Other Applications	170
Changing the Number of Recent Documents the Application Tracks	171
Choosing the Default Format for Saving Documents	172
Setting AutoRecover to Keep Backups of Your Documents for Safety.....	174
Setting the Default Folders for Saving Your Documents and Presentations.....	175
Summary	178
Part II: Creating Documents with Microsoft Word	179
■ Chapter 6: Entering Text and Using Views	181
Entering Text in Your Word Documents	181
Inserting the Text from a File in a Document.....	182
Inserting Prebuilt Blocks of Text with AutoText.....	183
Selecting Text in Word-Specific Ways	187
Selecting Text with the Mouse	187
Selecting Text with the Extend Selection Feature	187
Selecting Multiple Items at Once	188
Moving with Keyboard Shortcuts and the Browse Object.....	189
Telling Word Where to Find Your Templates.....	191
Creating Backup Documents and Recovering from Disaster	193
Using Views and Windows to See What You Need	194
Picking the Right View for What You're Doing	194
Opening Extra Windows.....	204
Splitting the Document Window into Two Panes	205
Summary	206
■ Chapter 7: Adding Style: Formatting Your Documents	207
Understanding Word's Many Types of Formatting.....	207
Understanding Direct Formatting and When to Use It.....	208
Understanding Styles and When to Use Them	208
Formatting Your Documents the Best Way	209
Applying Styles to a Document	210
Applying Styles from the Quick Styles Box on the Ribbon.....	210
Applying Styles with the Styles Pop-Up Menu on the Formatting Toolbar	212
Applying Styles with the Styles Pane.....	213
Applying Styles Using the Style Dialog Box	216
Applying Different Quick Styles to a Document	217
Changing the Styles in the Quick Style Gallery	218

Applying Styles Using the Keyboard	220
See Which Styles a Document Uses	220
Creating Custom Styles.....	221
Creating a Custom Style by Example	222
Modifying an Existing Style.....	232
Applying Direct Formatting on Top of Styles	233
Copying and Pasting Formatting Using the Format Painter	234
Navigating Quickly Around Your Documents	234
Using the Sidebar.....	234
Using Find and Replace	236
Replacing Text, Formatting, and Styles	243
Navigating with Go To.....	245
Summary	246
■ Chapter 8: Creating Complex Documents and Layouts	247
Working with Word's Extra Table Features.....	247
Converting Existing Text into a Table.....	248
Converting a Table to Text	250
Nesting One Table Inside Another Table	251
Creating Complex Documents with Multiple Sections	252
Adding Headers, Footers, and Page Numbers	254
Adding Headers and Footers to a Document	254
Inserting Page Numbers in a Document	258
Creating Newspaper-Style Columns of Text	260
Breaking Your Columns with Column Breaks	262
Removing Multiple Columns from a Section or Document	263
Using Bookmarks, Fields, and References	263
Marking Important Parts of a Document with Bookmarks.....	263
Inserting Automated Information with Fields.....	266
Adding Cross-References to Other Parts of a Document.....	270
Creating Long Documents with Outline View.....	272
How Outlines Work	272
Developing the Outline of a Document	273
Promoting and Demoting Headings	274
Expanding and Collapsing the Outline and Headings	275
Moving Paragraphs Up and Down the Document	276
Switching from Outline View to Another View	277
Adding Footnotes and Endnotes	277
Adding a Footnote.....	277
Adding an Endnote.....	279
Customizing Footnotes and Endnotes to Suit Your Document.....	280
Converting Footnotes to Endnotes or Endnotes to Footnotes	282
Navigating Among and Viewing Footnotes or Endnotes	283
Summary	284
■ Chapter 9: Creating Business Documents with Mail Merge	285
Understanding How Mail Merge Works	285
Creating the Main Document for the Mail Merge.....	287
Selecting the Recipients for the Mail Merge.....	289

Creating a New Data Source in Word.....	289
Opening an Existing Data Source.....	293
Using Contacts from the Office Address Book	293
Using Contacts from the Mac OS X Address Book.....	293
Using Data from a FileMaker Pro Database	294
Inserting Placeholders in Your Main Document.....	294
Filtering the Recipients of the Merge Document	295
Previewing the Results of the Mail Merge	297
Completing the Mail Merge.....	298
Merging Individual Documents to a Printer	299
Merging to a New Document	300
Merging to E-mail Messages	300
Restoring a Mail Merge Main Document to a Normal Document.....	301
Summary	302
■ Chapter 10: Revising and Reviewing Documents.....	303
Understanding How You Can Work on Documents with Your Colleagues	303
Editing a Document Simultaneously with Your Colleagues	304
Sharing Documents with Your Colleagues on a Network	308
Tracking the Changes in a Document.....	309
Choosing Which Changes to Track	310
Turning On Track Changes for a Document.....	313
Ensuring Your Colleagues Use the Track Changes Feature	313
Working in a Document with Track Changes On	314
Choosing How to View the Document's Changes and Markup	316
Controlling Which Changes Word Displays	317
Integrating Tracked Changes into a Document.....	318
Using Track Changes in Full Screen View.....	320
Adding Comments to a Document	321
Adding a Comment	321
Viewing and Reviewing Comments.....	323
Deleting Comments.....	325
Comparing or Combining Different Versions of the Same Document	326
Summary	329
■ Chapter 11: Printing, Securing, and Sharing Documents.....	331
Using Word's Features for Printing Documents.....	331
Printing a Custom Range of Pages	331
Printing Markup and Other Items.....	333
Securing a Document	335
Removing Sensitive Information from a Document	335
Protecting a Document with a Password.....	337
Marking a Document As Read-Only.....	339
Making a Document You Can Open with Earlier Versions of Word	340
Creating PDF Documents for Digital Distribution	342
Summary	342
Part III: Analyzing Data with Microsoft Excel.....	343
■ Chapter 12: Creating Workbooks and Entering Data	345
Creating and Saving a New Workbook.....	345

Creating a New Workbook	345
Saving a Workbook	347
Navigating the Excel Interface, Worksheets, and Workbooks	348
Understanding Workbooks, Worksheets, Columns, and Rows	350
Moving the Active Cell	351
Selecting and Manipulating Cells	352
Enter Data in Your Worksheets	354
Typing Data in a Cell	354
Editing a Cell	355
Entering Data Quickly Using AutoFill	357
Pasting Data into a Worksheet	361
Copying and Moving Data with Drag and Drop	365
Inserting, Deleting, and Rearranging Worksheets	366
Inserting and Deleting Worksheets	366
Rearranging the Worksheets in a Workbook	367
Making Excel Display Worksheets the Way You Need	369
Understanding Excel's Views	369
Splitting the Window to View Separate Parts of a Worksheet	370
Opening Extra Windows to Show Other Parts of a Workbook	371
Changing the Window and Arranging Open Windows	372
Zooming to Show the Data You Need to See	373
Freezing Rows and Columns So That They Stay On-Screen	374
Summary	375
■ Chapter 13: Formatting Your Worksheets	377
Working with Rows and Columns	377
Inserting and Deleting Rows, Columns, and Cells	377
Setting Row Height	380
Setting Column Width	381
Hiding Rows and Columns	382
Formatting Cells and Ranges	383
Understanding the Three Main Tools for Applying Formatting	383
Controlling How Data Appears by Applying Number Formatting	386
Setting the Workbook's Overall Look by Applying a Theme	388
Setting Alignment	389
Choosing Font Formatting	391
Applying Borders and Fills	392
Applying Protection to Cells	393
Applying Conditional Formatting to Identify Particular Values	394
Understanding Excel's Preset Types of Conditional Formatting	394
Applying a Preset Form of Conditional Formatting	396
Using Data Validation to Check for Invalid Entries	397
Formatting Quickly with Table Formatting and Styles	402
Formatting with Table Formatting	402
Formatting with Styles	402
Adding Headers and Footers to Your Worksheets	407
Adding Headers and Footers Using the Page Setup Dialog Box	407
Adding Headers and Footers Directly on the Worksheet	410
Printing Your Excel Worksheets and Workbooks	411

Telling Excel Which Part of the Worksheet to Print.....	411
Checking the Page Layout and Where the Page Breaks Fall	412
Printing a Worksheet or Workbook	414
Sharing Your Workbooks with Your Colleagues.....	415
Protecting a Workbook or Some of Its Worksheets	415
Sharing a Workbook So That Your Colleagues Can Edit It	417
Working in a Shared Workbook	419
Resolving Conflicts in a Shared Workbook	419
Summary	420
■ Chapter 14: Creating Powerful and Persuasive Charts	421
Learning the Essentials of Charts in Excel.....	421
Understanding Embedded Charts and Chart Sheets.....	422
Understanding the Components of a Chart.....	423
Understanding Excel's Chart Types and Choosing Which to Use.....	426
Creating, Laying Out, and Formatting a Chart.....	427
Creating a Chart.....	427
Changing a Chart from an Embedded Chart to a Chart Sheet.....	429
Changing the Chart Type	430
Switching the Rows and Columns in a Chart.....	430
Changing the Source Data for a Chart	430
Choosing the Layout for the Chart	432
Adding a Separate Data Series to a Chart	432
Applying a Style to a Chart.....	433
Adding a Title to a Chart	434
Adding Axis Titles to the Chart.....	434
Changing the Scale or Numbering of an Axis	435
Adding a Legend to a Chart	438
Adding Axis Labels from a Range Separate from the Chart Data	439
Adding Data Labels to the Chart	439
Choosing Which Gridlines to Display	440
Formatting a Chart Wall and Chart Floor.....	441
Formatting Individual Chart Elements.....	443
Copying Chart Formatting	444
Reusing Your Own Designs by Creating Custom Chart Types.....	445
Adding Sparklines to Your Worksheets.....	446
Inserting Sparklines.....	447
Formatting Your Sparklines	448
Summary	450
■ Chapter 15: Crunching Numbers with Formulas and Functions.....	451
Understanding the Difference Between Formulas and Functions	452
Referring to Cells and Ranges in Formulas and Functions	452
Referring to a Cell.....	452
Referring to Ranges	454
Referring to Named Cells and Ranges	455
Performing Custom Calculations by Creating Formulas	456
Meeting Excel's Calculation Operators	456
Using the Calculation Operators	458

Understanding the Order in Which Excel Evaluates Operators	461
Nesting Parts of Formulas to Control Operator Precedence	462
Entering Formulas Quickly by Copying and Using AutoFill	463
Troubleshooting Common Problems with Formulas	463
Performing Standard Calculations by Inserting Functions.....	468
Understanding Function Names and Arguments	469
Inserting Functions with the AutoSum Pop-up Menu	470
Inserting Functions with the Formula Builder.....	471
Inserting Functions with the Insert Pop-up Menu.....	475
Inserting Functions by Typing Them into a Worksheet.....	476
Summary	477
■ Chapter 16: Creating Simple Databases and Solving Business Problems... 479	
Creating Databases in Excel	479
Understanding What You Can and Can't Do with Excel Database Tables	480
Creating a Database Table and Returning Data	481
Resizing a Database Table.....	487
Sorting a Database Table by One or More Fields.....	488
Identifying and Removing Duplicate Records in a Database Table.....	490
Filtering a Database Table	492
Solving Business Problems with Scenarios and Goal Seek.....	494
Examining Different Scenarios in a Worksheet.....	495
Using Goal Seek.....	505
Summary	507
■ Chapter 17: Manipulating Data with PivotTables 509	
Understanding What PivotTables Are and What You Can Do with Them	509
Creating and Laying Out a PivotTable	511
Creating a PivotTable Automatically	511
Creating a PivotTable Manually	513
Changing the PivotTable to Show Different Data.....	521
Changing the Function Used to Summarize a Field	525
Controlling the Design of a PivotTable	526
Formatting a PivotTable.....	528
Applying a PivotTable Style.....	528
Choosing Options for a PivotTable Style	528
Naming a PivotTable and Setting Options for It	529
Renaming a PivotTable	530
Choosing Display Options for a PivotTable	530
Choosing Layout Options for a PivotTable	532
Choosing Data Options for a PivotTable.....	533
Refreshing the Data in a PivotTable.....	535
Changing the Source of a PivotTable	535
Sorting and Filtering a PivotTable.....	536
Summary	539
Part IV: Creating Presentations with Microsoft PowerPoint..... 541	
■ Chapter 18: Starting to Build a Presentation in PowerPoint 543	
Creating a Presentation	544
Changing a Presentation's Theme, Fonts, or Colors.....	547

Changing the Slide Size or Orientation	548
Navigating the PowerPoint Window.....	549
Add Content to a Slide	551
Adding, Deleting, and Rearranging Slides	552
Adding a Slide.....	552
Deleting a Slide.....	555
Rearranging Slides.....	555
Using Views to Work on Your Presentation.....	556
Creating Your Slides in Normal View	556
Rearranging Your Slides in Slide Sorter View	556
Creating Notes Pages in Notes Page View.....	558
Running a Presentation in Slide Show View	559
Opening Extra Windows to See Different Parts of the Presentation	560
Creating the Outline of a Presentation	560
Organizing Your Slides into Sections	561
Collaborating on a Presentation with Your Colleagues	563
Editing a Presentation Simultaneously with Your Colleagues.....	564
Comparing Two Copies of the Same Presentation.....	568
Summary	570
■ Chapter 19: Creating Clear and Compelling Slides.....	571
Planning the Slides in Your Presentation.....	571
Choosing Slide Layouts to Suit the Contents	573
Using PowerPoint's Built-in Slide Layouts.....	573
Creating Custom Slide Layouts.....	574
Formatting Text on Your Slides.....	575
Changing the Font, Font Size, and Alignment.....	575
Changing the Indentation and Line Spacing of Text	577
Rotating Text.....	578
Using Bulleted Lists	580
Adding Tables, SmartArt, Charts, and Hyperlinks to Slides	584
Adding Tables to Slides	585
Adding SmartArt Graphics to Slides.....	589
Adding Charts to Slides.....	589
Adding Hyperlinks to Slides	594
Summary	595
■ Chapter 20: Adding Life and Interest to a Presentation	597
Adding Pictures to a Presentation.....	597
Adding Movies and Sounds to a Presentation	599
Adding a Movie to a Slide	599
Adding a Sound to a Slide.....	603
Adding Transitions to Slides	606
Adding Animations to Slides.....	609
Understanding the Essentials of Animations	609
Adding an Animation to an Object	610
Changing the Order of Animations.....	612
Using Animation to Display Bulleted Paragraphs One at a Time	613
Animating SmartArt Graphics, Charts, and Tables.....	615

Keeping Extra Information Up Your Sleeve with Hidden Slides	618
Creating Custom Slide Shows Within a Presentation	619
Opening the Custom Shows Dialog Box.....	620
Creating a Custom Slide Show	620
Playing a Custom Slide Show	622
Editing or Deleting a Custom Slide Show	622
Summary	622
■ Chapter 21: Delivering a Presentation Live or Online.....	623
Getting Ready to Deliver a Presentation in Person	623
Setting Up Your Display and Choosing the Resolution.....	624
Using Presenter View.....	626
Practicing Your Presentation	628
Rehearsing Timings for Slides.....	629
Delivering a Presentation to a Live Audience	630
Starting a Presentation	630
Displaying the Slides You Need	630
Annotating the Slides.....	632
Controlling a Presentation Using the Keyboard	633
Displaying a White Screen or Black Screen.....	634
Creating a Handout for a Presentation.....	634
Recording Narration into a Presentation.....	636
Exporting and Sharing a Presentation	637
Broadcasting a Slide Show	639
Saving a Presentation as Pictures	642
Saving a Presentation as a Movie.....	643
Summary	645
Part V: E-mailing and Organizing with Outlook.....	647
■ Chapter 22: sing E-mail Effectively	649
Setting Up Outlook	650
Launching Outlook.....	650
Adding an E-mail Account to Outlook	651
Importing an Existing E-mail Account.....	657
Meeting the Outlook Interface	658
Using the Toolbar, Ribbon, and Menu Bar	659
Using and Customizing the Navigation Pane	659
Using and Customizing the Message List and Reading Pane	660
Using and Customizing the Reading Pane	664
Sending and Receiving Messages	667
Sending an E-mail Message	667
Receiving and Reading Messages	674
Sending and Receiving Attachments	677
Sending a File As an Attachment.....	677
Receiving a File as an Attachment.....	677
Replying to and Forwarding Messages.....	679
Deleting, Storing, and Organizing Messages	680
Moving a Message to a Mail Folder	681
Creating a New Mail Folder	682

Adding Consistent Closings to Your Messages with Signatures	682
Dealing with Spam	685
Removing Nonspam Messages from the Junk E-mail Folder	685
Marking Spam Messages as Junk	685
Changing Your Junk E-mail Protection Settings	685
Creating a List of Safe Domains for E-mail	686
Removing Senders You've Blocked by Mistake	687
Summary	688
■ Chapter 23: Keeping Your Contacts in Order	689
Creating Contacts	689
Creating a Contact from Scratch	689
Importing Contacts from Other Address Books	695
Working with Contacts	704
Viewing Your Contacts	704
Arranging Your Contacts	705
Searching for a Contact	706
Editing Contact Information	706
Communicating with Your Contacts	706
Summary	707
■ Chapter 24: Managing Your Calendar	709
Meeting the Calendar Interface	709
Displaying the Dates You Want	711
Customizing the Calendar Settings	711
Understanding Appointments, Events, and Meetings	713
Creating Appointments and Events	713
Creating One-Shot Appointments	713
Creating Repeating Appointments	717
Scheduling Meetings	719
Setting Up a Meeting	719
Tracking the Status of Meeting Invitations You've Sent	721
Dealing with Invitations to Meetings	722
Summary	723
■ Chapter 25: Working with Tasks and Notes	725
Creating Tasks	725
Meeting the Tasks Interface	725
Creating One-Shot Tasks	726
Creating Recurring Tasks	728
Viewing, Arranging, and Filtering the Task List	730
Viewing Your Tasks in the My Day Window	733
Managing Your Tasks	733
Taking Notes	735
Meeting the Notes Interface	735
Creating a Note	736
Editing and Using Your Notes	737
Summary	737
■ Index	739

About the Authors

Guy Hart-Davis is the author of more than 60 computer books, including *Beginning Microsoft Office 2010* and *Integrating Macs into Windows Networks*.

About the Technical Reviewer

Jennifer Ackerman Kettell has written and contributed to dozens of books about software applications, web design, and digital photography. She has worked for Microsoft and other top companies, and has done freelance web design and online community management. Jenn has lived all over the United States, but currently calls upstate New York home.

Acknowledgments

My thanks go to the many people who helped create this book:

- Michelle Lowman for signing me to write the book
- Tom Welsh for developing the manuscript
- Jenn Kettell for reviewing the manuscript for technical accuracy and contributing helpful suggestions
- Kim Wimpsett for editing the manuscript with care
- Adam Heath for coordinating the book project and keeping things running
- MacPS, LLC for laying out the chapters of the book
- John Collin for creating the index

Introduction

Do you need to get your work done with the Office:Mac 2011 applications—smoothly, easily, and quickly? Good! You’ve picked up the right book.

Who Is This Book For?

This book is designed to help beginning and intermediate users get up to speed quickly with the Office:Mac 2011 applications and immediately become productive with them.

If you need to learn to use Word, Excel, PowerPoint, and Outlook to get everyday tasks done, at work or at home, you will benefit from this book’s focused approach and detailed advice. You can either start from the beginning of the book and work through it, or use the Table of Contents or the Index to find the topic you need immediately, and then jump right in there.

What Does This Book Cover?

This book contains five parts that cover the shared Office features and the four applications.

Part 1 of the book brings you up to speed with the common features that the Office applications share:

- Chapter 1, “Getting Started with Office 2011,” introduces you to Office’s four applications—Word, Excel, PowerPoint, and Outlook—and what you can do with them. You learn how to open and close the applications; you meet key features such as the new Ribbon interface; and you create, save, close, and reopen documents.
- Chapter 2, “Learning Common Tools Across the Office Suite,” shows you how to control the Office applications using the menus, the toolbars, and the Ribbon, and how to make the most of the tools in the Toolbox. This chapter also explains Office’s common ways of sharing a document with others, how to save time and effort by using the AutoCorrect and AutoFormat features the smart way, and how to use the spelling and grammar checkers. You’ll also learn how to print documents.
- Chapter 3, “Working with Text,” shows you how to do everything from entering text (using the keyboard or other means) to creating tables and hyperlinks. Along the way, you’ll learn how to work with cut, copy, and paste, and how to use the Find and Replace features.

- Chapter 4, “Using Pictures and Shapes in Your Documents,” teaches you how to add visual interest to your Office document by adding pictures and shapes. You’ll learn how to insert clip art, pictures (such as photos), and shapes; how to rotate and position graphical objects; and how to use Office’s tools for making pictures look the way you want them. This chapter also covers inserting SmartArt diagrams and arranging graphical objects to control which is visible.
- Chapter 5, “Customizing Office to Suit You,” walks you through customizing the toolbars, the Ribbon, and keyboard shortcuts to make the applications easier and faster to use. You’ll also learn how to set essential preferences in the applications, such as the General preferences and the Save preferences.

Part 2 of the book covers using Microsoft Word, the powerful word processing application:

- Chapter 6, “Entering Text and Using Views,” shows you how to enter text quickly in Word documents. You’ll learn how to select text in advanced ways with the mouse and the keyboard, how to move around your documents, and how to tell Word where to find your custom templates. You’ll also learn to create backup documents automatically, and to make the most of Word’s seven different views of a document.
- Chapter 7, “Adding Style: Formatting Your Documents,” teaches you the right way to format a document quickly and consistently by using styles rather than applying direct formatting bit by bit. It also shows you how to get around your documents by using the Sidebar and the Find feature, and how to harness the power of the Replace feature.
- Chapter 8, “Creating Complex Documents and Layouts,” starts by showing you how to use Word’s extra features for creating tables. The chapter then explains how to break a document into multiple sections; how to add headers, footers, and page numbers; and how to create newspaper-style columns of text. You’ll learn to use bookmarks and cross-references, develop your documents using Word’s powerful Outline view, and add footnotes and endnotes to your documents.
- Chapter 9, “Creating Business Documents with Mail Merge,” shows you how to use Word to create business documents swiftly and efficiently. You’ll learn to set up mail merge documents (such as letters or labels), connect them to data sources, and save or print the results.
- Chapter 10, “Revising and Reviewing Documents,” covers how to use Word’s features for working with your colleagues on documents. You’ll learn how to edit a document either simultaneously or separately, how to use the Track Changes feature to mark revisions, and how to integrate changes into a document. You’ll also see how to add comments to a document and compare two document versions that contain untracked changes.
- Chapter 11, “Printing, Sharing, and Securing Documents,” explains how to print an entire document or just parts of it, with or without markup, and how to print markup without the document. You’ll also learn how to remove sensitive information from documents, create a document you can open with earlier versions of Word, and create PDF files from documents.

Part 3 teaches you to create spreadsheets and charts with Excel:

- Chapter 12, “Creating Workbooks and Entering Data,” covers creating different types of workbooks in Excel and entering data in them. You’ll learn how to navigate the Excel interface, use workbooks and worksheets, and use Excel’s views and features to see the data you need.
- Chapter 13, “Formatting Your Worksheets,” explains how to insert, delete, and format rows and columns in worksheets; how to format cells and ranges; and how to use the advanced conditional-formatting and data-validation features to identify unusual values or erratic input. This chapter also shows you how to format quickly and consistently with styles, how to add headers and footers to worksheets, and how to share workbooks effectively with your colleagues.
- Chapter 14, “Creating Powerful and Persuasive Charts,” teaches you how Excel’s charts work and how to add them to your workbooks. You’ll learn how to lay out a chart effectively, how to make it look good, and how to hide any components you don’t want to display. You’ll even learn how to save time by reusing the custom chart formatting you create.
- Chapter 15, “Crunching Numbers with Formulas and Functions,” makes clear the difference between a formula and a function, and shows you first how to create custom formulas and then how to use Excel’s built-in functions.
- Chapter 16, “Creating Simple Databases and Solving Business Problems,” shows you how to use Excel to create databases for storing and manipulating your information. You’ll learn how to enter information into a database, how to sort the information, and how to filter it to find only the results you want. You’ll also learn how to use the Goal Seek feature and scenarios to work out solutions to business problems.
- Chapter 17, “Manipulating Data with PivotTables,” explains how to use Excel’s powerful PivotTable feature to manipulate your data so that you can discover the information you need. PivotTables take a few minutes to grasp, but you’ll be surprised how easy they are to use.

Part 4 of the book takes you through creating good-looking, persuasive presentations with PowerPoint:

- Chapter 18, “Starting to Build a Presentation,” gets you started by creating a presentation document using either a design template or a content template. The chapter then shows you how to add, delete, and rearrange slides; how to use PowerPoint’s views effectively; how to develop the outline of a presentation; and how to break a presentation into separate sections. You’ll also learn how to collaborate with your colleagues on creating a presentation.
- Chapter 19, “Creating Clear and Convincing Slides,” guides you through the toughest part of creating a good presentation: creating slides that convey your meaning clearly and powerfully. This chapter shows you how to plan a presentation, choose suitable layouts (or create your own), and add text and other content to your slides.
- Chapter 20, “Adding Life and Interest to a Presentation,” shows you ways of spicing up a presentation by using graphics, movies, sounds, animations, and transitions. You’ll also learn how to hide slides to keep them up your sleeve and how to build custom slide shows that enable you to reveal only part of a larger presentation.

- Chapter 21, “Delivering a Presentation Live or Online,” explains how to deliver the presentation you’ve created. You can deliver the presentation live in person, broadcast it across the Internet, or create a version of the presentation that you can share via e-mail or in other ways. You’ll also learn how to use PowerPoint’s Presenter view and how to create a handout for a presentation.

Part 5 of the book shows you how to manage your e-mail, schedule, contacts, and tasks with Outlook:

- Chapter 22, “Using E-mail Effectively,” first shows you how to set up Outlook to work with your ISP or e-mail provider’s servers. Once Outlook is working, you’ll learn how to get around its complex user interface, how to send and receive e-mail, and how to manage your messages.
- Chapter 23, “Keeping Your Contacts in Order,” covers creating contacts either from scratch or importing them from your address books, spreadsheets, or other sources. The chapter also shows you how to view and sort your contacts, add or update their contact information, and quickly create communications to your contacts.
- Chapter 24, “Managing Your Calendar,” brings you up to speed with Outlook’s Calendar interface, shows you how to customize it, and teaches you to use its views. After that, it explains how to create one-shot appointments and repeating appointments, schedule meetings, and respond to meeting requests.
- Chapter 25, “Working with Tasks and Notes,” shows you how to use Outlook to define the tasks you need to complete and track your progress on completing them. This chapter also explains how to use Outlook’s Notes feature to jot down information as you work.

Conventions Used in This Book

This book uses several conventions to make its meaning clear without wasting words:

- *Ribbon commands and menu commands:* The ► sign shows the sequence for choosing an item from the Ribbon or a command from the menu bar. For example, “Choose Home ► Paragraph ► Decrease indent from the Ribbon” means that you click the Home tab of the Ribbon (displaying the tab’s contents), go to the Paragraph group, and then click the Decrease Indent button. Similarly, the ► sign indicates a menu sequence. For example, “Choose Insert ► Photo ► Picture from File from the menu bar” means that you click the Insert menu on the menu bar to open the menu, click the Photo item to open the Photo submenu, and then click the Picture from File item on the Photo submenu.
- *Special paragraphs:* Special paragraphs present information that you may want to pay extra attention to. Note paragraphs contain information you may want to know; Tip paragraphs present techniques you may benefit from using; and Caution paragraphs warn you of potential problems.

- *Check boxes:* The Office applications use many check boxes—the square boxes that can either have a check mark in them (indicating that the option is turned on) or not (indicating that the option is turned off). This book tells you to “select” a check box when you need to put a check mark in the check box, and to “clear” a check box when you need to remove the check mark from it. If the check box is already selected or cleared, you don’t need to change it.
- *Keyboard shortcuts:* In the Office applications, you can often save time and effort by using a keyboard shortcut rather than a Ribbon command. This book uses + signs to represent keyboard shortcuts. For example, “press Cmd+S” means that you hold down the Cmd key, press the S key, and then release the Cmd key. “Press Cmd+Option+T” means that you hold down the Cmd key and the Option key, press the T key, and then release the Cmd key and the Option key.

Building Essential Office Skills

To save you time and effort, the Office:Mac 2011 applications share many common features. This part of the book shows you how to get started quickly with the applications and learn to use these common features.

In Chapter 1, you'll quickly meet Office's four main applications—Word, Excel, PowerPoint, and Outlook—and learn what you can do with them. You'll grasp essential moves, such as opening and closing the applications; and you'll create, save, close, and reopen documents.

In Chapter 2, you'll take control of the applications using the menus, the toolbars, and the ribbon. You'll learn how to share a document with others, how to save time and effort by using the AutoCorrect and AutoFormat features the smart way, and how to use the spelling and grammar checkers. You'll also learn how to print documents.

In Chapter 3, you'll study how to work with text—everything from entering text using the keyboard to creating tables and hyperlinks. By the end of the chapter, you'll also know how to work with cut, copy, and paste, and how to use the Find and Replace features.

In Chapter 4, you'll add visual interest to your Office document by inserting pictures and shapes. You'll learn how to insert clip art, pictures (such as photos), and shapes; how to rotate and position graphical objects; and how to use Office's tools for making pictures look the way you want them. When you need more complex illustrations, you can add SmartArt diagrams and arrange graphical objects to overlap each other, with fine control over which object is visible.

In Chapter 5, you'll make the Office applications easier and faster to use by customizing the toolbars, the Ribbon, and keyboard shortcuts. You'll also learn how to set essential preferences in the applications, such as the general and save preferences.

Getting Up to Speed with the Office Applications

You're probably in a hurry to start being productive using Office 2011, so this chapter gets you moving quickly. First, you'll meet each of the applications, find out what you can do with them, and come to grips with key features such as the Ribbon and the toolbars. Then, I'll show you how to launch the applications or make them launch themselves. Finally, you'll look at how to create, save, and close documents, as well as how to reopen them when you need to work on them again.

Meeting the Office Applications and Learning What You Can Do with Them

Microsoft Office 2011 comes in two versions and includes either three or four main applications, which this section briefly introduces. The basic version, Microsoft Office Home & Student, includes Microsoft Word, Microsoft Excel, and Microsoft PowerPoint; the more expensive version, Microsoft Office Home & Business, adds Microsoft Outlook to those three applications. This book shows you how to become proficient with these four applications.

NOTE: Apart from the four main applications, Office also includes the Microsoft Messenger instant messaging application, the Microsoft Communicator telephony and conferencing application, the Remote Desktop Connection application for connecting remotely to Windows computers, and the Microsoft Document Connection application for connecting to SharePoint sites and Windows Live SkyDrive. This book focuses on the four main applications and doesn't cover the others.

For ease of use and to save time, the four main applications share many features, from the ways in which you create, save, and open documents to common actions you

perform in them, such as copying text from one part of a document and pasting it in at another part.

Part 1 of this book discusses these common features. Parts 2 through 5 of the book then examine each of the applications in turn.

Microsoft Word

Microsoft Word (see Figure 1–1) is a word processing application that you can use to create everything from a single-page letter to a 1,000-page book complete with a table of contents, an index, and cross-references between different parts of the book.

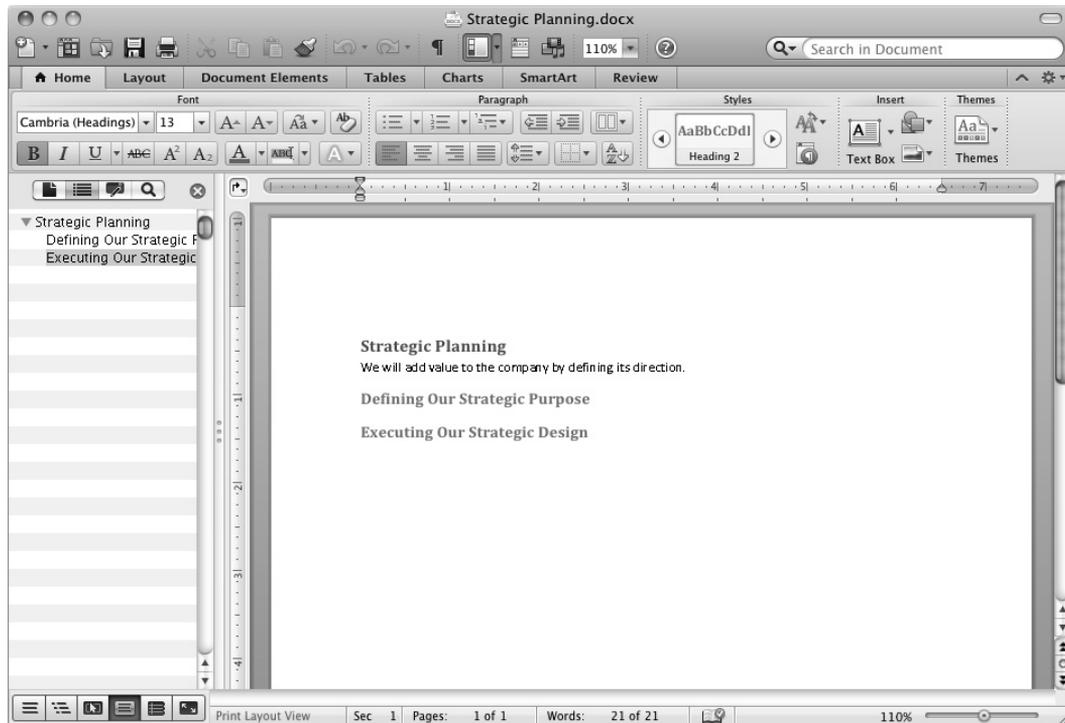

Figure 1–1. Microsoft Word is the Office application for creating text-based documents.

Part 2 of this book explains how to make the most of Microsoft Word.

Microsoft Excel

Microsoft Excel (see Figure 1–2) is a spreadsheet application that you can use to record, calculate, and analyze data. Excel includes features for creating many different types of charts for presenting your data clearly and effectively.

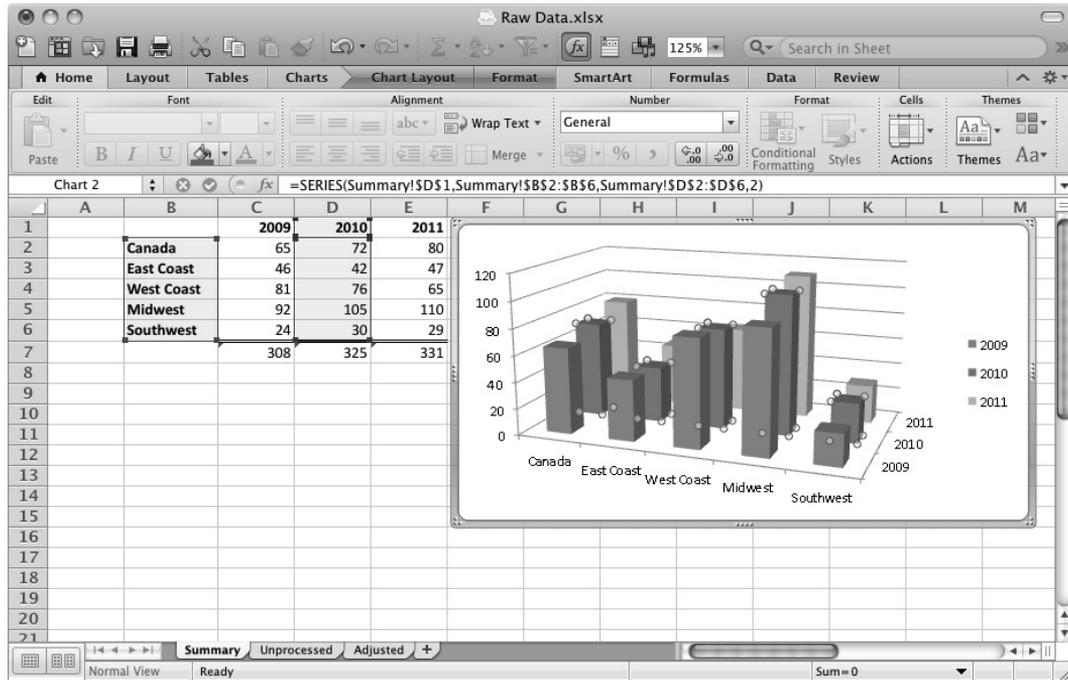

Figure 1–2. Each Microsoft Excel workbook contains as many worksheets as you need for entering and analyzing your data.

Part 3 of this book shows you how to work quickly and effectively in Microsoft Excel.

Microsoft PowerPoint

Microsoft PowerPoint (see Figure 1–3) is an application for creating and delivering presentations. Each presentation consists of slides, to which you can add any data from straightforward text to charts and movies. You can also add animations and transition effects to provide visual interest.

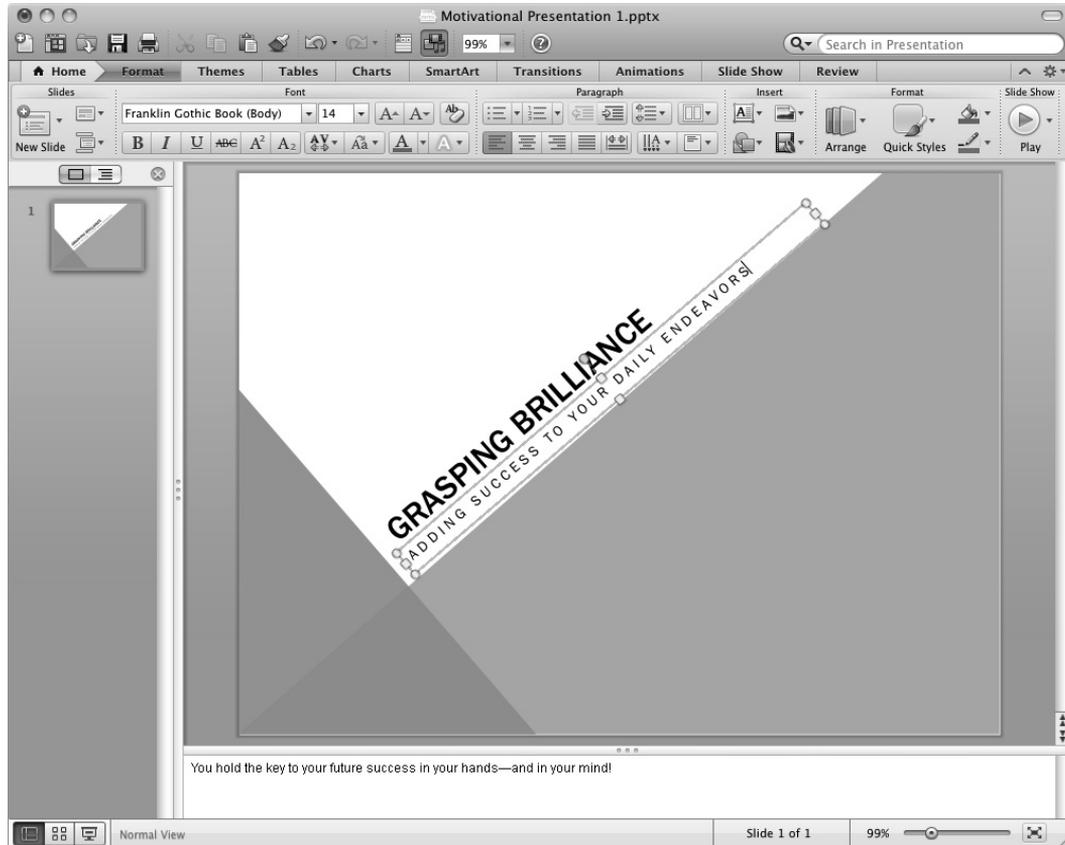

Figure 1–3. In Microsoft PowerPoint, you create slides and organize them into slide shows.

Part 4 of this book covers creating persuasive presentations in PowerPoint and delivering them to your audience either in person or online.
