Fiber-Reinforced Composite Materials

Characterization and Computational
Predictions of Mechanical Performance

Synthesis Lectures on Mechanical Engineering

This series publishes short books in mechanical engineering (ME), the engineering branch that combines engineering, physics and mathematics principles with materials science to design, analyze, manufacture, and maintain mechanical systems. It involves the production and usage of heat and mechanical power for the design, production and operation of machines and tools. This series publishes within all areas of ME and follows the ASME technical division categories.

Fiber-Reinforced Composite Materials

Characterization and Computational
Predictions of Mechanical Performance

V. Tuninetti
Department of Mechanical Engineering
Universidad de La Frontera
Temuco, Chile

A. Salas
Department of Mechanical Engineering
University of Concepción
Concepción, Chile

E. Fernández 
Department of Aerospace and Mechanical
Engineering
University of Liège
Liège, Belgium

G. Pincheira
Department of Industrial Technologies
University of Talca
Curicó, Chile

C. Medina
Department of Mechanical Engineering
University of Concepción
Concepción, Chile

I. Valdivia
Department of Mechanical Engineering
University of Concepción
Concepción, Chile

M. Meléndrez
Advanced Nanocomposites Research Group
Hybrid Materials Laboratory
Department of Materials Engineering
University of Concepción
Concepción, Chile

P. Flores
Plastic Omnium—New Energies
Genk, Belgium

Contents

| | | |
|----------|---|----|
| 1 | Introduction to Fiber-Reinforced Composites Materials | 1 |
| 1.1 | Organization of the Book | 4 |
| | References | 5 |
| 2 | Out-of-Plane Compressive Fatigue Behavior of Unidirectional Glass Fiber-Reinforced Composite | 9 |
| 2.1 | Manufacturing of Fiber-Reinforced Composite | 11 |
| 2.2 | Methodology for Determining the Influence of IFSS Out-of-Plane Fatigue Behavior | 11 |
| 2.3 | Micro- and Macro-Scale Analysis | 13 |
| 2.4 | Conclusions | 16 |
| 3 | Analysis and Prediction of Failure in FRP | 19 |
| 3.1 | Failure Criteria for Composite Materials | 20 |
| 3.2 | Material Characterization | 22 |
| 3.3 | Experimental Setup and Sample Manufacturing for Failure Model Validation | 23 |
| 3.4 | Computational Failure Analysis | 23 |
| 3.5 | Conclusions | 28 |
| | References | 29 |
| 4 | Impact of the Multiwall Carbon Nanotubes on the Transverse Compressive Strength and Damage | 31 |
| 4.1 | Investigated FRC Engineered with MWCNT | 33 |
| 4.2 | Experimental Monotonic and Cyclic Compression Testing | 34 |
| 4.3 | Microcracking Analysis and Characterization of Material Degradation ... | 35 |
| 4.4 | Conclusions | 43 |
| | References | 44 |
