

Alexander Arnfinn Olsen

Dropped Object Prevention on Offshore Facilities and Installations

Guidance for Safety Professionals
and Practitioners

Synthesis Lectures on Ocean Systems Engineering

Series Editor

Nikolas Xiros, University of New Orleans, New Orleans, LA, USA

The series publishes short books on state-of-the-art research and applications in related and interdependent areas of design, construction, maintenance and operation of marine vessels and structures as well as ocean and oceanic engineering.

Alexander Arnfinn Olsen

Dropped Object Prevention on Offshore Facilities and Installations

Guidance for Safety Professionals
and Practitioners

Contents

1	Introduction	1
1	Class Notations	1
2	Submission of Plans	2
2	Onboard Dropped Object Prevention Programmes	3
1	General	3
2	Objective	3
3	Application	4
3.1	Dropped Object Zones for Fixed Installations	4
3.2	Dropped Object Zones for Self-Elevating Units	5
3.3	Dropped Object Zones for Floating Units and Installations	5
3.4	Dropped Object Zones for Production Units	6
4	Dropped Object Prevention Programme Elements	6
5	Roles and Responsibilities	8
5.1	General	8
5.2	Roles and Responsibilities	9
3	Risk Assessments for Dropped Object Hazards	11
1	General	11
2	Dropped Objects Risk Assessment	11
2.1	Risk Identification	12
2.2	Risk Analysis	13
2.3	Risk Evaluation	13
3	Dropped Object Control Area Designation	15
3.1	General Guidance	16
3.2	Dropped Area Zoning Designation	16
3.3	Sample Zoning Area	16
3.4	Job Safety Analysis	17
4	Documentation	17
5	Management of Change	18

4	Implementation of the Dropped Object Prevention Programme	19
1	General	19
1.1	Dropped Object Prevention Inspection Plan	20
2	Equipment and Outfitting Register Inspection Template	21
2.1	Equipment and Outfitting Register for DROP Inspection Plans	21
2.2	Template and Inspection Book	21
2.3	DROP Inspection Check Sheets	22
2.4	Equipment Installation and Maintenance	22
2.5	Inspection Findings and Incident Reporting	22
3	Practices of Dropped Object Prevention Programme	23
3.1	Equipment and Practices that are Prohibited	23
3.2	Potential Barriers to Effective Inspection and Audit	23
3.3	Practices for Working at Height	24
3.4	Managing New and Temporary Equipment	24
3.5	Tethering of Tools	25
3.6	Effective Housekeeping Practices and Regimes	25
3.7	Material Handling, Packaging, and Shipping	25
3.8	Tool Accountability	26
3.9	Hardware Accountability	26
3.10	Lost Items at Height	27
3.11	Assembly Operations	27
3.12	Controlling Access Guidelines to Risk Zones	28
5	Continuous Improvement	31
1	General	31
2	Monitor and Audit	31
3	Documentation and Recordkeeping	32
3.1	Dropped Objects and Dropped Object Damage Reporting	32
4	Effecting Continuous Improvement	33
6	Drop Programme Roles and Responsibilities	35
1	General	35
2	Roles and Responsibilities	35
2.1	Dropped Object Prevention Programme Management	35
2.2	Personnel and Safety Management	36
2.3	Quality Assurance Management	37
2.4	DROP Programme Training Management	37
2.5	Management of Change	38
2.6	Personnel	38
2.7	Supply Chain Management	39

7	Example Dropped Object Zoning Areas	41
1	General	41
2	Typical Dropped Object Zones	41
2.1	Self-Elevating Drilling Units	41
2.2	Column-Stabilised Drilling Units	41
2.3	Surface-Type Drilling Units	42
2.4	Drilling Unit	42
8	Recommended Practices for Working at Height	45
1	General	45
2	Working at Height	45
2.1	Securing of Personnel	45
2.2	Derrick Evacuation Equipment	46
2.3	Securing Tools Less Than 5 kg (11 Lbs)	47
2.4	Securing Tools Greater Than or Equal to 5 kg (11 Lbs)	47
2.5	Securing Other Portable Equipment	48
2.6	Securing Equipment and Parts	49
2.7	Tool Cabinets for Working at Height	49
9	Recommended Items for Inclusion When Auditing the Drops Prevention Programme	51
1	General	51
2	DROP Prevention Programme Management Audit	51
3	Risk Assessment Audit	51
4	Inspection Plan Audit	52
5	Equipment and Tools Audit	52
6	Equipment and Outfitting Register Audit	52
7	Risk Zoning Audit	53
8	Dropped Object Incidents Reporting	53
9	Contractor/Site, Operation Audit	53
10	Equipment Design for Dropped Object Prevention for DOPP+ and Equivalent Classification	55
1	General	55
1.1	Exclusions	55
2	Risk Assessment for Dropped Objects Hazard for Equipment Design, Installation, and Maintenance	56
2.1	Inherently Safe Equipment Design Philosophy	56
2.2	Application of Inherently Safe Design Through Risk Assessment	57
3	Specific Equipment	60

11	Equipment Design	63
1	General	63
2	Material Selections for Securing Connections	63
3	Equipment Design Considerations	64
4	Primary Securing: Bolts, Nuts, and Screws	65
4.1	General Securing Requirements	66
5	Use of Secondary Retention	66
5.1	General Procedure	66
5.2	Secondary Retention Methods	67
5.3	Additional Securing Hardware	69
5.4	Unauthorised Secondary Retention	70
12	Equipment Installation and Maintenance	71
1	General	71
2	Specific Equipment Securing	71
2.1	Electrical Equipment and Outfitting	71
3	Hydraulic Outfitting	74
3.1	Valve Handles	74
3.2	Pipe Clamps	74
3.3	Wire Sheaves	74
3.4	Walkway	75
3.5	Other Outfitting	76
4	Inspection and Maintenance	76
13	Conduct of Drops Surveys	77
1	General	77
2	Surveys at Manufacture and During Assembly	78
2.1	General Survey Requirements	78
2.2	Documentation for Surveyor Review	80
3	Onboard Surveys During Installation	80
3.1	General	80
3.2	Service Supplier	81
4	Surveys After Construction and Maintenance of Class	81
4.1	General	81
4.2	Survey Intervals	82
4.3	DROP Management System and Equipment Maintenance Records	82
4.4	Use of Temporary Equipment	83

5	Surveys Onshore for Repairs and Modifications	83
6	Survey of DROP Equipment and Systems	84
6.1	Annual Surveys	84
6.2	Special Periodical Surveys	85
7	Modifications, Damage, and Repairs	85
14	Procedural Requirements for Class Recognised Dropped Object Prevention Specialists	87
1	General	87
2	Application	87
3	Procedure for Approval and Certification	88
3.1	Documentation Requirements	88
3.2	General Requirements	88
3.3	Auditing of the DROPS Specialist	90
3.4	Certification	90
3.5	Quality Assurance System	90
4	Certificate of Approval	91
4.1	Renewal	91
5	Alterations	91
6	Cancellation of Approval	92
15	Sample Dropped Objects Survey Report	93
1	Introduction	93
2	Dropped Object Audit	93
2.1	Methodology	93
2.2	Objectives	94
2.3	References	94
3	Dropped Object Audit	94
3.1	Audit Date and Location	94
4	Observations and Recommendations	94
5	Observations and Recommendations from the 2023 Audit	96
6	Conclusions	97
	Correction to: Dropped Object Prevention on Offshore Facilities and Installations	C1
	Appendix	99
